THE COMPUTER IS PERSONAL AGAIN.

HP L1750 and L1950 Flat Panel Monitors

Advanced flat panel technology for mainstream business applications.

The HP L1750 and L1950 Flat Panel Monitors offer advanced features and functionality, superior user comfort design, and the latest technologies suited to a wide variety of users.

What's new
These monitors present several new features over the previous generation of Advantage series LCDs, including:

- **Improved front-of-screen performance**: Both products offer higher contrast ratio (800:1)* and wider viewing angles (160/160 degrees)
- **Privacy filters**: Compatible with privacy filters designed to fit into the monitor bezel
- **Swivel feature**: Allows the monitor panel to be swiveled left to right vs. the whole monitor base
- **Improved cable management**: Routes cables cleanly down the sides and behind the monitor
- **Power button disable**: Allows you to disable the power button, preventing users from turning off the monitor, if desired
- **Power LED on/off control**: Disables the green power light on the front
- **OSD menu rotation**: Rotate the menu into portrait orientation
- **Set Refresh**: Automatically optimize settings

User friendly design and features
Thin bezels on the left and right sides of the screen allow tiling of several monitors for panoramic viewing with minimal visual disruption between each panel. A built-in USB hub with two USB 2.0 ports offers quick and easy connection to a variety of peripheral devices.

User comfort features
90-degree pivot rotation, along with tilt, swivel, and height adjustment features, lets you customize your viewing position. The height adjustment includes low-point settings which allow the bottom of the monitor to nearly touch the desktop work surface.

Smart software
HP Display LiteSaver allows you to schedule Sleep mode at preset times to help protect against image retention and lower power consumption and energy costs. HP Display Assistant enables monitor adjustment and color calibration through the connected PC.

Service and support
The monitors are backed by extensive testing and comprehensive HP service and support from 65,000 IT service and support professionals in 160 countries around the world.

HP L1750 and L1950 Flat Panel Monitors
