

# FUJIFILM DPCNXT

THE EVOLUTION HAS ARRIVED

Expand or upgrade your business  
with new variety and customisation

- A fast, easy and reliable do-it-yourself service, customised to your business requirements
- Latest generation design with a 17" touchscreen and enhanced processing capabilities
- Input images from a wide variety of digital media and devices (Media cards, cameras, mobile phones, portable media devices)
- Output images with a full range of printing and gifting products produced from in-store (Frontier Digital Minilab, Frontier Dry Minilab, Thermal instant printers, Fuji Xerox printers, wide-format printers) and out-store wholesale products (Photobooks, Photo Gifts, canvas prints etc).

# FUJIFILM

# Create Photo Gifts

## FUJIFILM DIGITAL PHOTO CENTER NXT:

- Highly customisable hardware and software – made for your business and customers
- Kiosk software provides full editing functions (crop, colour correction, red-eye removal, Sepia, B&W) for images and easy guidance to produce prints or gifting products
- Photo Gifts include a range of gifting products (mugs, mouse mats, t-shirts, key rings, ornaments), Photobooks, canvas prints, collage and poster prints, personalised stationery and greeting cards. The retailer determines their range and pricing
- Connection to ADSL facilitates gifting through the wholesale fulfillment centre as well as remote monitoring and diagnostics for servicing and updates. ADSL link to be provided by the retailer at their cost
- Generic FUJIFILM header cards and on-screen advertising included to drive customers to kiosk, with up-selling prompts to increase customer spend
- Modular component design of kiosk allows easy upgrade or replacement
- With fascia replacement a 'look and feel' upgrade path for existing DPC8 kiosks is available, allowing retailers to fully revamp their kiosk range.

## SPECIFICATIONS:

- 17" LCD monitor (1280x1024 resolution) with SAW touch screen
