SonicWALL SOHO3

INTERNET SECURITY APPLIANCE

▷ *ICSA-certified stateful packet firewall for enterprise-class protection*

▷ *Dedicated security ASIC for fast firewall and 3DES VPN performance*

▷ *Intuitive management interface reduces the time and cost of installation and management*

The SOHO3 Internet Security Appliance is a flexible firewall solution for small businesses and branch offices. The SOHO3 offers a variety of configuration designs to meet the network size and connectivity requirements of small businesses, including the SOHO3/10 for 10-node support, the SOHO3/25V for 25-node support and the SOHO3/50V for 50-node support. Both the SOHO3/25V and the SOHO3/50V come standard with VPN, while the SOHO3/10 can be upgraded to support VPN. All of the SOHO3 configurations can be upgraded with larger node counts to support larger networks.

The SOHO3 features an intuitive Web management interface and administration wizards that simplify security management. The SOHO3 provides enterprise-class security and includes support for Network Anti-Virus, Content Filtering and Authentication Service. This eliminates the cost and complexity of installing and managing separate devices and software packages.

The desktop SOHO3 appliance, built on SonicWALL's dedicated security ASIC, delivers the fastest performance in its class. The SOHO3 includes hardened firewall protection with an ICSA-certified, stateful inspection firewall and support for SonicWALL's IPSec VPN that delivers fast, secure access and is compatible with any manufacturer's IPSec-compliant VPN gateway.

The SOHO3 requires no operating system maintenance often found in software-based security products. The SOHO3 fits perfectly into a large corporate network infrastructure and can be managed by a wide array of local or remote options including CLI, Web-interface, and SNMP. For centralized management and policy setting, the award-winning SonicWALL Global Management System is designed to reduce administration overhead as security requirements scale.

The SonicWALL SOHO3 Internet security appliance meets the demands of growing businesses and adapts to network security threats, protecting an organization's valuable data. The SOHO3 with VPN allows small businesses to securely connect to other sites or remote employees.

SONICWALL

SONICWALL SOHO3 FEATURES AND BENEFITS

Flexible,Comprehensive Security Solution. The SonicWALL SOHO3 provides a variety of configurations and services to tailor security solutions to meet the needs of small businesses and branch offices. The SOHO3 provides enterprise-class security and supports SonicWALL's comprehensive portfolio of security services,such as Complete Anti-Virus,Content Filtering and Authentication Service.

ICSA-Certified Stateful Packet Firewall. The SOHO3 adheres to industry standards for enterprise-class firewall protection with ICSA-certified,stateful packet inspection technology.

Powerful Architecture with Dedicated Security ASIC. Built on SonicWALL's dedicated security ASIC,the SOHO3 delivers the fastest performance in its class to guarantee the best possible performance for broadband connections.

IPSec VPN. The SOHO3's enterprise-class VPN delivers fast, secure access to corporate resources through any manufacturer's IPSec-compliant VPN gateway.

AutoUpdate Security. SonicWALL's AutoUpdate service sends automatic alerts of new software and feature updates as soon as they're available to ensure administrators keep network security current and lower maintenance costs.

Flexible Remote Management. The SOHO3 fits perfectly into a large corporate network infrastructure and reduces administration overhead because it can be managed locally, on a device-by-device basis using CLI, or globally using SonicWALL Global Management System.

Complete Network Protocol Support. The SOHO3 supports the full complement of broadband connectivity requirements, including NAT and DHCP, to allow all users to share a broadband Internet connection. It also supports Point-to-Point Protocol over Ethernet (PPPoE),a widely used protocol for DSL connections.

Intuitive Web Management Interface. The SOHO3 includes an easy-to-use Web management interface and administration wizards to dramatically reduce the time and cost of installing and managing security.

SONICWALL SOHO3 TECHNICAL SPECIFICATIONS

Processor:	Toshiba-133Mhz with SonicWALL's security ASIC
RAM:	16 MB
Flash Memory:	4 MB
Interfaces:	(1) WAN 10/100 Base-T auto-sensing (1) LAN 10/100 Base-T auto-sensing (1) Serial Port
LEDs:	Status (Power, Test) Ethernet (Link,100,Activity)

Firewall Performance:	75 Mbps
Firewall Nodes:	10 Nodes/25 Nodes/ 50 Nodes/Unlimited Nodes
Concurrent Connections:	6,000
3DES (168-Bit):	20 Mbps
VPN Tunnels:	10 Tunnels*
Dimensions:	8.25 x 6.5 x 2.0 inches (20.9 x 16.5 x 5.1 cm)

* If equipped or upgraded to include VPN

Weight:	1.1 lbs. (.48 kg)
Power:	100V to 240V AC
Standards:	TCP/IP, UDP, ICMP, HTTP, RADIUS, IPSec,IKE,SNMP, FTP, DHCP, PPPoE
Certifications:	ICSA Firewall
Regulatory Compliance:	EMC: FCC Class B,ICES-003 B,CE, VCCI B,C-Tick Safety: UL,cUL,TUV/GS
Environment:	Temperatures 40-105° F, 5-40° C Humidity 5-90% non-condensing

1) Power LED
2) WAN Port LEDs
3) LAN Port LEDs
4) Test LED

5) Serial Port
6) 10/100 Ethernet Ports LAN, WAN
7) Power Input
