 BIOS Version: F316
 Ctrl+M Version: 5.26
 Boot Block Version: 1.4.8
 WebBIOS: 1.59
 Qlogic 12160t firmware: 11.12.19
 Previous Release: F170/3.13/5.26/1.46

Controllers Supported:

=====
 Series 471 = MegaRAID Enterprise 1600
 Series 475 = MegaRAID Express 500
 Series 493 = MegaRAID Elite 1600
 Series 494 = MegaRAID Elite 1650

Firmware Changes:

=====
 1. Embedded BIOS version F316 into firmware.

BIOS Changes:

=====
 1. Enabled Bus mastering to be compatible with the system BIOS of various systems.
 2. Ctrl-M will not execute after POST because some system BIOS will not allow to hook :
 This has been fixed.
 3. Support added for 503/494 controllers.

Known Limitation:

=====
 WebBIOS:

1. When multiple 160m controllers are present in the system, one is displayed as unknown.
2. Default settings are different in Ctrl-H from Ctrl-M. Ctrl-H has Adaptive Read Ahead.
3. Raid 3/30 options are not present in WebBIOS.
4. WebBIOS allows you to span partial arrays.

Cluster Configuration:

-
1. This firmware has not been fully qualified for cluster configurations.
 Use C170 for cluster configurations.
