The proven “W” Crimp applied with precisely controlled pressure permits the use of a shorter terminal barrel. An excellent feature for confined area termination.

The SOLISTRAND Terminals and Splices in combination with the “W” Crimp create terminations of optimum electrical properties and are completely reliable; giving long service in hard environment.

SOLISTRAND terminals are made of high conductivity copper, electro tinned for improved corrosion resistance.

The completely closed barrel with serrations inside provides an optimum tensile strength and maximum electrical contact after crimping. The barrel has a conical entry for easy wire insertion.

The “W” Crimp is actually two longitudinal crimps providing that the conductor within the barrel flows together into the serrations or dimples of the terminal barrel, creating one homogeneous mass of copper. The two indents also help to center the conductor within the barrel for uniform crimping of the barrel around the wire.

Because TE Connectivity matches the terminal to the tool each termination is uniform making quality control easy and performance consistent.

SOLISTRAND products are UL listed File E 13288 and certified by CSA File LR 7189.

AWG Identification Numbers

The International AWG Identification Numbers

Each TE Connectivity Terminal and Splice covers specific international wire range and has the applicable wire size marked on the tongue or the barrel. Insulated terminals and splices are color coded for easy identification. All application tools have a special matching control system.

With this technique the quality of the termination made can be reliably checked at any time. During crimping the application tooling marks a proper visual code on the terminal or insulation sleeve. If the code of the terminal and the mark of the tool are corresponding, a reliable termination with the correct tooling has been made.

Cross Reference of AWG Code Numbers to Wire Size Range

AWG Code Number	Wire Size Range (mm ²)	for DIN Cross Section (mm ²)
26–22	0.10– 0.40	0.14/0.20/0.25/0.35
22–16	0.25– 1.60	0.35/0.50/0.75/1.00/1.50
16–14	1.00– 2.60	1.00/1.50/2.50
16–14 HD*	1.00– 2.60	1.00/1.50/2.50
12–10	2.70– 6.60	4.00/6.00
8	6.70– 10.50	10.0
6	10.60– 16.70	16.0
4	16.80– 26.60	25.0
2	26.70– 42.40	35.0
1/0	42.50– 60.50	50.0
2/0	60.60– 76.20	70.0
3/0	76.30– 97.00	95.0
4/0	98.00–120.00	120.0
250–300 MCM	121.00–151.00	150.0
300–350 MCM	152.00–192.00	185.0
400–350 MCM	193.00–242.00	240.0
500–600 MCM	243.00–304.00	300.0

*) Heavy-duty terminals use AWG 12–10 (2.7–6.6 mm²) tooling.

Premium	10	8	Heavy Head Hand Tool (HHHT)	69355	408-1254
	10–35	8–2	Hydraulic Hand Crimping Tool with Integral Dies	59975-1	408-6758

*) Use in Hand Tool, Part No. **3-1579000-0**

Battery Tool Kits

Dies or heads can be removed from the listed tools and used with:

Part No. **1725837-[x]** for PRO-CRIMPER Tool & Die-Set
Part No. **1213804-[x]** for Double Action Hand Tool (DAHT)
Part No. **1901235-[x]** for Heavy Head Hand Tool (HHHT)

Specific dash numbers designate the type of power plug fixed to the charger.
Please call your local TE Connectivity contact or visit our Tooling Website to establish the correct dash number.

Engineering Notes

A large rectangular area filled with a light gray grid, intended for handwritten engineering notes. The grid consists of small squares, approximately 10x10 pixels each, covering the majority of the page area below the header and above the footer.
