

Amphenol

SHORTFORM 2021

Amphenol Australia Pty Ltd

Amphenol Corporation is one of the world's largest interconnect manufacturers. Founded in 1932, Amphenol designs, manufactures, and markets electrical, electronic, and fiber optic connectors, interconnect systems, and coaxial and specialty cables.

The market for industrial interconnect technology globally is expanding as the world becomes more modernized. Some of the major driving forces behind this come from the expansion of energy, oil & gas exploration, medical advancements, transportation, and communications. Amphenol's Industrial Products Group (AIPG) combines decades of experience with the latest technology to provide the best solutions in the industry. Our products are engineered and manufactured to the highest degree of quality and sold by a worldwide sales and marketing organization

Amphenol Australia was established in 1998 and is based in Melbourne, Victoria and is the Sales, Marketing and Engineering centre of excellence for an extensive range of professional connector and

cabling products. Continuous improvement through ISO9001, a focus on environmental awareness and development of next generation industry leading products is our philosophy.

The ability of Amphenol to provide a full range of design services required to support the customers applications design and modelling, applications engineering, fabrication, value-added assembly and testing, coupled with the largest interconnect offering on the market means that we can support all of your system level needs.

This shortform catalogue is designed as a quick-reference guide for products generally stocked in Australia. Users should not rely on the information contained within other than for simple part number identification. Product specifications and technical data is available for each series in their respective full line catalogues which can be provided on request

SurLok Plus™ Series

The Surlok Plus™ compression lug is a field installable, high reliable alternative to common compression lugs. Using industry standard crimp, screw, and busbar termination options, thus, eliminating the need to purchase special torque tools.

Amphenol’s Surlok Plus™ is an environmentally sealed version of our original Surlok but available in smaller sizes, and features a quick lock and press-to-release design. Incorporating the latest R4 RADSOK® Technology, Surlok PlusM is a compact, quick mating, and robust product line.

The RADSOK® high amperage contact technology utilizes high tensile strength properties of a stamped and formed, high conductivity alloy grid to produce low insertion forces while maintaining a large conductive surface area.

The R4 version of the RADSOK® represents the culmination of three years of research and development in laser welding copper-based alloys.

Features

- R4 RADSOK® Technology
- IP67 Rated
- Touch Proof
- Quick lock and press-to-release design
- “Keyway” design to prevent incorrect mating
- 360° rotating plug
- Various termination options (Threaded, Crimp, Busbar)
- Compact robust design

Technical Data

Contact Size*	5.7mm (120A) / 8mm (200A)
Current Rating	100A ~ 350A (up to 400A)
Operating Voltage	1000VAC/DC
Operating Temp.	-40°C to 125°C
Flammability	UL 94 V-0
Locking	Spring Locking

*Current rating dependant on cable conductor size

HPT Series

HPT Series connectors are suitable for AC power supply where a durable latch locking connector is required. They are rated at 16A, 250 Vac. HPT Series connectors can be connected or disconnected under load and are IP65 rated.

Features

- 2+PE contact layout
- Quick release, vibration resistant latch lockable
- High impact UV resistant material
- Thermoplastic Shell
- True Mains Connector with Current Breaking Capacity (CBC)
- 16A current rating (20A USA)
- Industry standard mating interface
- IP65 rated
- Patent Protected*
- UL498 certified
- UL50E enclosure type 4 (when mated or in combination with protective caps)

Standard Data

General Characteristics	
Contacts	2 + PE
Termination	2mm Hex key screw terminal (Cable Connector) Flat Tab 1/4" (Chassis Mount)
Flammability	UL94V-0
Environmental	Complies with EU RoHS 2 Directive 2011/65/EU
Electrical Characteristics	
Rated Operating Voltage	250VAC
Test Voltage AC RMS	1500V
Current Carrying Capacity	16A (20A USA)
Typical Contact Resistance	≤2mΩ
Insulation Resistance (Initial)	≥2GΩ
Insulation Resistance (after damp heat test)	≥0.1GΩ
Climatic Characteristics	
Protection Class	IP65, UL50E enclosure type 4 (in mated or in combination with protective caps)
Operating Temperature	-25°C to +80°C (-13°F to +176°F)

Mechanical Characteristics	
Weight ¹	15g (0.033lb) / 25g (0.055lb) [Chassis Mount] 40g (0.088lb) [Cable Connector]
Typical Cable Retention Force	Subject to cable material and O.D.
Cable O.D Range	6.0 -12.0 mm with lockable backshell 7.5 -16.0 mm with non-lockable backshell
Conductor Size Screw Terminals	2.5mm ² (AWG12)
Materials	
Shell / Finish	PA66 GF30 / Black
Insulators	PA66 GF30
Cable Boot / Backshell	Neoprene / PBT
Material / Plating	Copper Alloy / Silver
Protective Caps	Santoprene, UV resistant (Base) PA66 & Santoprene, UV resistance (Overmolded Cap) Stainless Steel SS304 (Chain)
Protective Caps (Self closing)	Polycarbonate, UV resistant (Base) Polycarbonate & Santoprene, UV resistant (Overmolded Cap) Silicone Rubber (Gasket) Stainless Steel SS304 (Chain)

ATM Series™

ATM Series™ connectors are a high-performance, cost-effective solution specifically designed for smaller AWG applications, while still maintaining the strengths of the AT Series™ product line.

The connector design incorporates an integral latching system that ensures a definitive electrical and mechanical connection. Connector housings are manufactured with a thermoplastic material that is not only durable, but has excellent UV resistance, dielectric/mechanical properties and environmentally RoHS compliant. The sealing system is comprised of an internal and rear silicone, multi-sealing perimeter against environmental ingress. Contacts are derived from quality copper alloy to ensure an electrically-reliable connection.

ATM Series™ connectors are compatible with other existing standard products industry-wide.

Product Material

Housings	Thermoplastic
Seals	Silicone Elastomer
Secondary Locks	Thermoplastic
Contacts	Copper Alloy, Nickel Plated, Gold Option

Features

Current Capacity	Size 20, 7.5A (max)
Wire Range	Size 20 contacts - 16 to 22AWG
Operating Temp. Range	-55°C to +125°C at rated current
Dielectric Value	Meets/exceeds 1500 volts min.
Drop Test	Shall not become detached or loosened when placed at 750mm and dropped to concrete eight times
Shock	No latch disengagement or discontinuity shall be the result when subjected to 50 g's in each of three axis (X, Y & Z)
Vibration	Continued continuity without degradation to mechanical or physical attributes following vibration. (max acceleration 20 g's at Sine sweep of 10-2000Hz)
Connector Terminal Retention	When subjected to a direct pull, contacts achieve a minimum pull-out force of 89 lbs
Connector Retention	A mated connector subjected to a pulling force by the exiting wire bundle at 89lbs. times the number of contacts to a maximum of 356 lbs. applying load for 30 seconds
Thermal Shock	Subjected to 10 cycles at -55°C to +125°C with no cracking, chipping or other damage detrimental to the normal operation of the connector
Insulation Resistance	1000 megohms minimum at 25°C
Mating Cycle Durability	Following 100 cycles of connection engagement and disengagement, degradation either mechanical or electrical is not evident
Contact Millivolt Drop	Size 20 contacts with 20AWG conductor -60mV (solid) drop max at 7.5A test current
Water Immersion	A mated connection, properly wired, placed in an oven at +125°C for 1 hour, then placed immediately in a depth of water 1 meter for 4 hours without loss of electronic performance

AT Series™

AT Series™ connectors are a high-performance, cost-effective solution able to be used in a variety of interconnect applications: Heavy Duty, Transportation, Marine, Diagnostic, Military, Alternative Energy and Agricultural. They contain superior environmental seals and seal retention capabilities.

The connector design incorporates an integral latching system that ensures a definitive electrical and mechanical connection. Connector housings are manufactured with a thermoplastic material that is not only durable, but has excellent UV resistance, dielectric/mechanical properties and environmentally RoHS compliant. The sealing system is comprised of a front and rear silicone, multi-sealing perimeter against environmental ingress. Contacts are derived from quality copper alloy to ensure an electrically - reliable connection.

AT Series™ connectors are compatible with other existing standard products industry-wide.

AT Panel|Mate™ Series

The Amphenol Panel|Mate™ series combines flange mounting options with the proven reliability of the AT/ATP Series™ environmentally-sealed thermoplastic connection system.

Engineered with a one-piece sealed flange design for rapid and secure mounting, its durable high temperature silicone facial seal provides a barrier of protection from lubricating oils, hydraulic fluids and fossil fuels to withstand the challenges and complexities of harsh environment applications.

BoardLock™ AT Series

The Amphenol BoardLock™ Family combines flanged or flangeless, 180° straight or 90° right angle pin-oriented, wire-to-board versatility with the proven reliability of the A Series™ environmentally-sealed thermoplastic connection system with a maximum current rating up to 25A.

Featuring a compact, durable, low-profile and lightweight design, perfect for power or data signal applications in Heavy Equipment, Transportation, Industrial, Off-Road and Harsh Environments.

All BoardLock™ product lines accept A Series™ components and are compatible with other industry-standard mating connectors.

Features

- Coupling System: Integral Latch
- Available in 2, 3, 4, 6, 8, 12 and 13 position
- Housing Material: Thermoplastic
- AWG: 12 & 16AWG
- Contact Current Ratings: 7.5 – 25A
- Mating Cycles: 100+
- Contact Types: Machined, PC Tail

ATP Series™

ATP Series™ connectors are designed as a high-performance, cost-effective, thermoplastic solution to be used within the Marine, Heavy Equipment, Agricultural, Automotive, Alternative Energy fields, as well as other demanding interconnect applications.

Available in 2 and 4 position options, the ATP Series™ Connectors contain superior environmental seals, seal retention capabilities and are designed for use with 10-14AWG with size 12 contacts handling up to 25A.

ATP Series™ connectors are compatible with other existing standard products industry-wide.

Product Material

Housings	Thermoplastic
Seals	Silicone Elastomer
Secondary Locks	Thermoplastic
Contacts	Pins & Sockets: Copper Alloy Finish: Nickel Plated, Gold optional

Features

Current Capacity	Size 12, 25A (max)
Wire Range	Size 12 contacts - 12 to 14AWG
Operating Temp. Range	-55°C to +125°C at rated current
Dielectric Withstanding Voltage	Current leak less than 2 milliamps at 1500 VAC
Physical Shock	No unlocking, unmating or other unsatisfactory results during or after 50 G's in each of three usually perpendicular planes. No electrical discontinuities longer than 1 microsecond. M L-STD 202. Method 213, Condition "C".
Vibration	Maintains continuity and exhibits no mechanical or physical damage after vibration levels of 20 G's at 10-2000 Hz
Insulation Resistance	1000 megohms minimum at 25°C
Corrosion Resistance	Connectors show no evidence of corrosion after exposure to 48 hours of salt spray per MIL - STD 1344, method 1001
Submersion	IP67. Wired and mated connection will withstand immersion under three feet of water without loss of electronics qualities or leakage.
Fluid Resistance	Connectors show no damage when exposed to most fluids used in industrial applications.
Contact Retention (Minimum Load)	70lbs. for Size 12 contacts.
Thermal Cycle	No cracking, chipping or leaking after 20 test cycles from -55°C to +125°C.
Durability	No electrical or mechanical defects after 100 cycles of engagement and disengagement.

AHD Series™

Amphenol Sine Systems AHD Series™ Connectors were developed in response to the overwhelming need for an economic alternative to today's existing diagnostic product options.

Designed specifically as a cost-conscious, reliable alternative, intermateable to industry standard 6 and 9 pin connectors, the AHD Series™ is ideal for any situation where either controlled and/or uncontrolled environmental conditions exist. Amphenol Sine Systems AHD Series™ Connectors offer both a smooth, non-sealing option for controlled applications, as well as an environmentally-sealed, threaded option for more demanding applications.

Features

- Integrated Alignment Keys Tactile verification for blind mating
- Strong Thermoplastic Housing
- Extended service life
- Operating Temperature Range -55°C to +125°C - Wide range compatibility
- Economically Sound Low overall cost
- ROHS Compliant Environmentally friendly

RJ45 Industrial

RJF allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments.

With the patented RJStop® system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.

No hazardous on-field cabling and grounding!

Features

- Bayonet coupling
- Robust metallic shells based on MIL-DTL-26482 H
- RJ45 cordset retention in the plug: 100 N in the axis
- Mating cycles: 500 min
- Sealed against fluid and dust (IP68)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)
- Compatible with cable diameter from 6 mm [0.236 in] to 13 mm [0.512 in]
- RoHS Compliant

XLRnet Series

XLRnet was designed in conjunction with the Amphenol Data / Telecom product group of Amphenol Canada Corp., a subsidiary of Amphenol Corporation.

Utilising our combined expertise and knowledge of the professional audio and high-speed data markets we are proud to offer the XLRnet series. Featuring Class D (10/100 BASE-T), CAT5E (1000 BASE-T) or CAT6 (10GBASE-T) ethernet performance in A, B or D shell housings with integrated LED's and complete shielding options we have your high-speed data requirements covered.

Features

- Class D (10/100 BASE-T), CAT5E (1000 BASE-T) or CAT6 (10GBASE-T) ethernet performance
- A, B or D type chassis housings
- IDC or IDC 110 punch down terminals
- RJ45 feedthrough panel connectors
- Shielded or non-shielded
- LED indicators in a variety of colours.
- Compact design
- Cable plug housings
- Quick and simple installation

Options

- Horizontal or Vertical PCB contacts
- Bulk Packaging
- LED colour - Red, Green, Yellow or Blue combinations

M12 Cable Assemblies

The need for high data transmission rates is growing continuously as a result of increasing decentralization in the industrial environment. More and more nodes in the field level have to exchange large amounts of data in real time.

The M12 X-coded connector was developed to ensure reliable transmission of up to 10 Gbit/s in industrial environments with Cat. 6A performance.

The CONEC range of connection cables with Cat. 6A performance is implemented by the M12 X-coded to M12 X-coded version and by the design of M12 X-coded to RJ45. This allows cabling from the field level with increased protection requirements (IP67) directly into the control level, i.e. into a protected environment.

In order to lead the interface from a device in the control with RJ45 interface at the control cabinet to the outside, the product range is supplemented by an M12 X-coded flange with overmoulded cable connection. This allows the interface to be routed without having to carry out time-consuming assembly work in the field. The patch cables are supplied fully assembled and tested.

In case the conditions on site do not allow the use of ready-made cable assemblies, the field-attachable M12 X-coded connector with crimp connection completes the CONEC product range.

All M12 X-coded patch cords are available in both straight and angled versions and meet the requirements of CAT6A up to 500 MHz. When mated, the PUR overmoulded connectors meet protection class IP65/IP67 and can thus be used in industrial environments.

Advantages

- Easy assembly in the field
- Transmission rate up to 10 Gbit/s
- Compact design
- Protection class IP67
- 360° shielded

Fields of Application

- Automation technology
- Industrial interfaces
- Communication technology
- Machine manufacturing
- Control technology
- Telecommunications
- Wireless controller

eco|mate®

When there are rough environmental conditions the eco|mate® Series is in. The program includes a variety of housing types and a wide range of contact arrangements and contact technologies.

Solutions up to 900V or 50A can be realized. The housing is made of high performance composite material and is extremely robust and lightweight. Two types: Field installable screw termination and cost effective crimp versions for machine processing. The bayonet quick release allows for an easy and reliable mating / unmating.

Features

- ecolmate boasts an IP65/67 protection class rating in mated condition
- ecolmate circular threaded coupling connectors available in 3+PE and 6+PE, complete with clamping ring or internal strain relief
- ecolmate 3+PE, offers a screw type (0.75-2.5mm²) termination rated up to 16A @ 400VAC and is IP65 when mated
- ecolmate 6+PE, offers a solder type (max.0.75mm²) termination rated up to 10A @ 250VAC, or a crimp type (0.14-1.5mm²) termination rated up to 13A @ 250VAC and is IP67 when mated
- The stocked C16-3 5+PE, offers a screw type termination rated up to 21A @ 400VAC and is IP65 when mated
- Housing components made from premium Polyamide 6.6 molding material
- Mechanical durability of 500 Mating cycles

heavy|mate® C146 Series

heavy|mate® heavy-duty connectors are a modular connector line consisting of hoods & housings, inserts and contacts.

A customizable solution ideally suited for harsh environments where a robust design is necessary. Can be used for creating power and signal connections outdoors. heavy|mate® offers 3 to 280 poles per connector, current ratings up to 250A per contact and voltage up to 1000V.

Features

heavy|mate® C146 A

- Available in 3+PE and 4+PE
- Offers a narrow style with a screw termination insert rated to 18A @ 400VAC 3/4 +PE
- Screw terminals can accommodate wire gauge 0.25 - 2.5mm²

heavy|mate® C146 E

- Contact insert for screw termination with wire protection is rated to:
 - 22A @ 400VAC 6+PE
 - 16A @ 400VAC 10+PE
 - 16A @ 400VAC 16+PE
 - 18A @ 400VAC 24+PE
- Stocked in 6+PE, 10+PE, 16+PE, 24+PE
- Screw terminals can accommodate wire gauge 0.25 - 2.5mm²
- Offers a high protection against mismatching. (Female inserts with funnel shaped contact entry avoids mismatching)
- Housings are supplied complete with a PG threaded stud
- Housings are rated up to IP65 when mated

MS Series

Amphenol MS connectors satisfy all the performance requirements of MIL-C-5015 and are recommended for conditions where vibration, moisture, pressure and / or temperature are extreme.

Features

- Harsh environment multipole connectors.
- Silver plated solder contacts.
- Resilient synthetic rubbers inserts to aid sealing.
- High grade aluminum alloy connector shells.
- Standard contact layouts available exstock in Australia.
- Cable connectors supplied complete with telescopic bushing MS3420. This is designed to keep dirt, oil and moisture out of the endbell.

Shells

Shell components are fabricated from high grade aluminum alloy. The standard hardware plating is electrically zinc plated finish with an olive drab chromate after treatment for corrosion resistance.

Contacts

Contacts are silver plated copper alloy for maximum corrosion resistance, maximum current carrying capacity and low milivolt drop. Size 16 and 12 contacts incorporate a closed entry design.

Contact Layouts

Standard contact layouts shown in this shortform are available ex-stock in Australia. Please contact us directly to check availability of non-standard inserts.

Inserts

Inserts are resilient synthetic rubber, offering high dielectric strength, high arc resistance and resistance to vibration. Proprietary design permits pressurization of either pin or socket insert.

Strain Relief

Strain relief clamp minimizes tension at the solder well connection and provides a positive mechanical moisture seal. Complete field serviceability is possible with the strain relief clamp.

Accessories

We have a large range of MIL-C-5015 accessories available including protection dust caps, EMI shielded backshells and PG, Metric or heat shrink adaptor backshells.

Pre-mating Earth

MS style connectors are also available featuring a pre-mating earth contact. Please call us to discuss your specific requirements.

Finish Options

Standard finish is not RoHS compliant

- 622 Zinc cobalt green conductive
- 624 Zinc cobalt black conductive
- 726 electrophoretic black non-conductive finish
- A23 electroless nickel

MP Series

Amphenol has an extensive range of circular and rectangular multi-pin connectors ideally suited to the entertainment industry.

Featuring rugged housings and precision made contacts these connectors have proven themselves in the most demanding of applications. The extensive arrangement of different connector sizes and contact numbers ensure we can offer a solution to your multi-pin wiring applications.

Applications

- Audio Cables and Snakes
- Lighting control
- Concert Touring Systems
- Outside Broadcast Systems

Features / Options

MP-41 Series

- 13 to 85 pins with Crimp / Solder bucket contacts
- 150 pins with Crimp contacts only
- 4 to 48 channel
- Gold plated contacts
- Synthetic inserts
- Environmental resistant
- Positive Bayonet locking
- PG cable gland
- 2000 mating cycles
- Bayonet wear pins
- Extended coupling ring
- Metal Housings

MP-62 Series

- 39 or 61 Solder bucket contacts
- Gold plated contacts
- Neoprene inserts
- Environmental resistant
- Positive Bayonet locking
- PG cable gland or NPT thread
- Metal Housings

Standard Data

General Characteristics							
Contacts	13	19	25	37	54	85	150
Channels	4	6	8	12	16	28	48
Termination	Solder / Crimp “Combo” ¹						Crimp
Wire Gauge Stranded Wire	16AWG - 20AWG						18AWG
Environmental	Complies with EU RoHS 2 Directive 2011/65/EU						
Electrical Characteristics							
Operating Voltage DC ²	250V*						
Operating Voltage AC ²	200V*						
Test Voltage AC RMS	1000V						
Current Carrying Capacity	13A						7.5A
Typical Contact Resistance	3.46m Ω						11.25m Ω
Insulation Resistance	5000M Ω						
Climatic Characteristics							
Protection Class	IP67 (when mated)						
Operating Temperature	-55°C to +125°C						
Mechanical Characteristics							
Cable Retention	PG Gland						
Mechanical Operations	2000 mating cycles						
Materials							
Connector / Shell Finish	Black Aluminium Alloy						
Insert	Synthetic Insert to MIL-R-3065						
Contact Plating	Brass / Gold Plated						
Clamping Characteristics							
PG Gland	11	13.5	16	21	29	36	
Cable Clamping Range mm	4-10	5-12	9-14	13-18	14-25	19-32	

¹Not suitable for domestic applications above 50V ²At sea level

¹Not suitable for domestic applications above 50V ²At sea level

Amphe-Sound Audio Cables

The Amphenol Amphe-Sound Audio Cables are Heavy Duty screened cables which are ultra flexible and have a solid pin male XLR as standard. They also come in the T-Series / M-Series 6.35mm plugs. Includes a reusable cable tie.
