MRAC Series

Miniature Rectangular, Removable Contacts

- Closed Entry Removable Socket and Pin Contacts.
- Connector Inserts with 9 to 104 Contacts.
- Quick Crimp ... Snap in Place!
- To remove ... insert removal tool — “Push Out” Contact!

Removable contacts offer a substantial savings of time, labor and a great flexibility in the choice of circuitry. The contact is easily removed with the hand tool depicted and then placed by hand or with a simple insertion tool

The MRAC Series is an important extension of the MRA line featuring a variety of crimp and solder removable contact styles. Except for body thickness, they are similar and interchangeable with the MRA Series.

Specifications

Current Rating:	Up to 13 amps	Electrical Data:	Meets high potential performance of MIL-C-28748. The dielectric withstanding voltage is one minute electrification at 2000 VAC (sea level).
No. of Contacts:	9, 14, 18, 20, 26, 34, 41, 42, 50, 66, 75, 104	Dielectric:	MRAC Series: Standard glass filled diallyl phthalate, per MIL-M-14, SDG-F, color gray.
Contacts:	Must be ordered separately. Select from crimp, solder, dip solder, shielded or Wire-Wrap termination contacts. See 100 Series contact section.	Qualification:	Military Versions are QPL'd to M28748/3 and M28748/4.
Contact Identificaion:	Standard contact identification is alphabetical except for MRAC66 and 75 which have numerical identification. To order numerical identification on MRAC 34, 50 or 104, specify MNAC**P or S.	Polarization:	Gold plated guides provide positive polarization. Polarized nickel-plated brass and/or passivated stainless steel with anodized aluminum knobs available.
		Hoods:	Anodized aluminum. May be applied to either plug or receptacle. Both top and side opening hoods available.

How To Order: To obtain "K" or "N" guides in place of the standard "G" type, substitute the desired socket style code letter ("K" or "N") for "G" in both the Plug and Receptacle Code Numbers.

Guide Socket Code Letter	Actual Size Photo	
G*	 For General Use Phosphor Bronze	 Standard Guide Pin mates with all types Brass
K	 For High Electrical Conductivity Beryllium Copper	
N*	 For Extra Mechanical Strength Brass	

*For passivated stainless steel add SS suffix

Mounting Note: Connectors MRAC 26, MRAC 20 and smaller, use guides for mounting in a hood or on a panel. Connectors MRAC 34, MRAC 42, MRAC 50, MRAC 66, and MRAC 75 use four #4 machine screws, in addition to guides, for mounting in a hood or on a panel. Guides are not recommended for use with MRAC 104. MRAC 104 uses four #6 machine screws for mounting.

*For numerical contact identification instead of alphabetical, order MNAC.____P or S available in sizes 34, 50 and 104. Example MNAC 34P. MRAC 66 and 75 have numerical contact identification as standard.

Jackscrews & Jacksockets

Outline

Dimensions are for reference only and are subject to change. Outline drawings on request.

Polarized jackscrews give the ease and assurance of threaded positive coupling. The actuating side consists of two turnable screws, one male and one female, each with knurled and slotted knobs. On the mating half

are the two fixed screws required to complete the locking action. When mated, the jackscrews may be locked with a safety wire through the hole in the self-locking pin (in the jackscrew shaft).

New Monojacks Assemble and Disassemble With Remarkable Ease and Speed

To free the connector from the hood, simply remove four screws. Monojacks may be used on miniature rectangular connectors with from 34 to 104 contacts and with molds featuring

guide hole and two mounting holes on both ends. Molds have 2 center thru holes and 4 mounting holes.

MONOJACKS ARE CAPTIVATED IN KEYHOLE SLOT OF HOOD AS SHOWN ABOVE. WHEN USING SHELLS, MONOJACKS ARE CAPTIVATED IN KEYHOLE OF SHELL AND CLEARANCE HOLES ARE PLACED IN HOODS.

MOLDINGS HAVE STRAIGHT THRU HOLES

Outline Jackscrews and Jacksockets

Miniature Rectangular, Removable Contacts

Dimensions are for reference only and are subject to change. Outline drawings on request.

Dimensions

All jackscrews and sockets are stainless steel, passivated except J & JTD which are nickel plated brass. All knobs are aluminum, anodized except JTW and JTCW which are stainless steel, passivated.

Outline Formed Aluminum Hoods

Dimensions are for reference only and are subject to change. Outline drawings on request.

Hoods shown are MRE Hoods for use with MRAC Connectors

Dimensions

Formed Hoods for MRAC Connectors are available in top and side opening for most MRAC Connectors - Deep Drawn Hoods are available for MRAC 34, MRAC 66 and MRAC 104 connectors ... providing additional strength. Hoods and cable clamps are of anodized

aluminum. They provide support and strain relief for the cable and may be applied to either Plug or Receptacle.

Hoods may be ordered separately (see code numbers in the tables below) or assembled on connectors.

Miniature Rectangular, Removable Contacts

Vibration Locks

Lock Tabs (MRE-V shown)

Lever & Pivot Assemblies (MRE-VL shown)

Nomenclature		Used on Connectors
Lever & Pilot Assembly	Lock Tabs (See Note)	
MRE-VL	MRE-V	MRAC 9, 14, 18, 20, 26, 34, 41, and 42
MRE-VL2	MRE-V2	MRAC 50 MRAC 75

Designed for MRAC connectors, this vibration lock features genuine simplicity of design, plus complete locking effectiveness. Assembly of either the lever-and-pivot assembly or the lock

parts to the plug and receptacle is quick and easy. The unit locks automatically when the mating plug and receptacle are engaged. Unlocking and disengaging can be done with one hand.

Note 1: When panel mounting the lock-tab half of a MRAC 34, MRAC 42 or MRAC 50 connector, flat washers (.033 minimum thickness) should be used on the mounting screws to shim the molding away from the panel.
Note 2: Each code number indicates two units, i.e., the "MRE-VL" consists of two levers and two pivots (unassembled), and the "MRE-V" consists of two tabs.
Note 3: These units are supplied unassembled to facilitate handling. The pivot is easily assembled to the lever merely by inserting the hooked end through the lever opening. It will automatically snap into proper position. Patent #2,760,174.

Ordering Information

Omit steps not required

- Notes:** 1. Contacts are ordered separately. See 100 Series contact section of Rack & Panel
2. When ordering molding less hardware and hood for use with JTD Monojacks, connectors must be ordered as follows:
Pin connector = MRAC 34P8, MRAC 42P8, etc.
Socket connector = MRAC 34S8, MRAC 42S8, etc.
The number "8" indicates special housing for use with the JTD Monojack hardware (available on sizes 34, 42, 50, 66, 75 and 104).

External Miniature Rectangular, Removable Contacts

XAC34SF2A010

XAC34PM1A000

XAC34PC1A700

Designed for external installation, the XAC is the MRAC removable contact connector equipped with protective shells and mounting plates for chassis or cable mounting on metal containers, bulkheads, or any outside surface

equipment. Lighter and smaller than other external connectors, they provide dependable service under adverse conditions. Inserts are housed in protective shells and there is screw lock coupling of plug and receptacle.

Specifications

Current Rating:	Up to 13 amps	Dielectric:	Diallyl Phthalate, MIL-M-14, Type SDG-F, Color Gray
No. of Contacts:	9, 14, 18, 20, 26, 34, 42, 50, 66, 75, 104	Polarization:	Seven positions available for pin and slot polarization on shells. Additional polarization can be provided with various arrangements of jackscrews and guides.
Contacts:	Contacts must be ordered separately. Select from crimp, solder, dip solder, shielded or wire wrap terminations.	Accessories:	Shells, formed and drawn hoods, mounting plates, jackscrews and jacksockets.
Electrical Data:	Meets high potential performance requirements of MIL-C-28748. The dielectric withstanding voltage is one minute electrification at 2000 VAC. Military versions are QPL'd to M28748/3 and M28748/4.

Definition of Connector Terms

Plug: The complete connector half which has the plug shell as part of its assembly.

Receptacle: The complete connector half which has the receptacle shell as part of its assembly.

Shell: The metal housing in which a male or female insert is assembled. A shell is either a plug shell or a receptacle shell:

Plug Shell - one which is designed to be inserted into a receptacle shell.

Receptacle Shell - one which is designed to receive and enclose the plug shell upon engagement.

Male Insert: The molded insulator body containing pin contacts.

Female Insert: The molded insulator body containing socket contacts.

Pin Contacts: Male Contacts that fit into the socket contacts.

Socket Contacts: Female Contacts tubular in shape, which receive the pin contacts and retain them by spring tension.

Polarization: A means of controlling the engagement of a plug and receptacle so that correct mating of the contacts is achieved.

Accessories: Those components such as hoods and mounting plates which are attachable to a plug or receptacle to facilitate mounting and/or handling of the connector, and to prevent inadvertent cross-mating.

Contact Arrangements

External Miniature Rectangular, Removable Contacts

Dimensions are for reference only and are subject to change. Outline drawings on request.
Views are rear (wiring end) of female inserts. (Male inserts are opposite.)

XAC 75

XAC 104*

*For numerical contact identification instead of alphabetical, order XNAC**P or S available in sizes 34, 50, and 104.

Sizes 66 and 75 have numerical contact identification as standard.

The spacing, arrangement, and identification of contacts of the XAC inserts are the same as those found on the Series MRAC removable contact connectors for the same number of contacts.

Jackscrew & Jacksockets

External Miniature Rectangular, Removable Contacts

Dimensions are for reference only and are subject to change. Outline drawings on request.

Views are rear (wiring end) of female inserts. (Male inserts are opposite.)

Specifications

Turnable jackscrew-jacksocket combination (M, C, or D) assemblies on either Plug or Receptacle; the mating connector-half (either Receptacle or Plug) must then contain fixed jackscrew-jacksocket combination (F).

Both short and long turning jackscrews (M and C) have knurled and slotted knobs for locking by hand or screwdriver. Knob is assembled on shaft with hollow, removable, self-locking pin. Safety wiring of engaged halves is achieved by using the through-hole in self-locking pin in the knob.

Monojacks (D) are long turning one-piece locking devices with slotted and knurled head. Shaft has through-hole for safety wire. available with hoods only, in sizes 34, 42, 50, 66, 75, and 104.

Drawings show extension of standard knobs beyond shell and beyond hood.

Applications

Jackscrew locking device assures positive coupling of engaged connectors to prevent accidental disconnecting from vibration or physical shock. It also aids easy connection and separation of connector plug and receptacle. Mounted connector-half houses one non-turnable fixed jackscrew and jacksocket to insure connector polarization. Mating-half houses one of the three types of turning jackscrew and jacksocket (M, C, or D).

LOCKING DEVICE		SPECIFICATIONS		
		CODE LETTER	WT. OZ. See Notes 1 & 2	MATERIAL AND FINISH
Jackscrew } Fixed Jacksocket		F	0.15	Nickel Plated Brass
Jackscrew } Short Jacksocket	Turnable	M	0.30	Stainless Steel with Passivating Dip
Jackscrew } Long Jacksocket	Turnable	C	0.45	Stainless Steel with Passivating Dip
Mono-Jackscrew Long Turnable Mono-Jacksocket		D	1.07	Nickel Plated Brass
Knob Standard		—	—	Aluminum Anodized

Note 1: Weights are for pairs; i.e. for a jackscrew and jacksocket, etc., so weight figure may be added once to weights of other accessories when computing total weight of plug or receptacle.

Note 2: Weights of turnable jackscrews and turnable jacksockets include knob and rollpins, except mono-jackscrew and mono-jacksocket, which is a one-piece construction (shaft and knob made in one piece); weight of fixed jackscrew and jacksocket includes nuts.

Outline Shells- Receptacles

Dimensions are for reference only and are subject to change. Outline drawings on request.

Dimensions Shells - Receptacles

Important Note When Ordering Plug and Receptacle Shells

The shell part numbers given in the table show an asterisk (*) where the code letter for the desired polarizing position belongs - example: XMRE9-2*000 becomes XMRE9-2B000 when polarization in position "B" is desired. Specify the same position on the mating shell.

For non-polarized shells, merely omit this position, e.g. XMRE9-2000.

TYPICAL SHELLS FOR MONOJACKS STYLE No. 4000

Shells are .040 in. thick.

Shells are aluminum, anodized for protection against corrosion. Either shell style - plug or receptacle - may be used to house the female insert, thus allowing the "live" socket contacts to be cable or panel mounted, as desired. Shells also provide a means by which connector polarization is accomplished - the receptacle shell is slotted for engaging a polarizing pin on the plug shell. Any of seven positions (A, B, C, D, E, F or G) may be specified for polarization; non-polarized shells have the slot and pin omitted.

Shells are .040 in. thick.

Outline Shells – Plugs

Dimensions are for reference only and are subject to change. Outline drawings on request.

Dimensions

Important Note When Ordering Plug Shells

The shell part numbers given in the table shows an asterisk (*) where the code letter for the desired polarizing position belongs - example: XMRE9-1*000 becomes XMRE9-1B000 when polarization in position "B" is desired. Specify the same position on the mating shell.

For non-polarized shells, merely omit this position, e.g. XMRE9-1000.

Shells are .040 in. thick.

Stainless steel shells available for 66 and 104 sizes. Dimensions vary from those shown for aluminum shells. Check sales for availability and dimensions on all sizes.

TYPICAL SHELLS FOR MONOJACKS STYLE No. 3000

Shells are aluminum, anodized for protection against corrosion. Either shell style - plug or receptacle - may be used to house the female insert, thus allowing the "live" socket contacts to be cable or panel mounted, as desired. Shells also provide a means by which connector polarization is accomplished - the receptacle shell is slotted for engaging a polarizing pin on the plug shell. Any of seven positions (A, B, C, D, E, F or G) may be specified for polarization; non-polarized shells have the slot and pin omitted.

For Connector Size	A	B	C
34, 42, 50, 66, 75	.11	.120	.06R
104	.14	.150	.07R

Shells are .040 in. thick.

Ordering Informations

Omit steps not required

Note: 1. Contacts are ordered separately. See 100 Series contact section of Rack & Panel

TMRAC Series

Heavy Duty, Industrial and Commercial Mini Rectangular Rack & Panel Connector

TMRAC 34S-G

TMRAC 34P-G

Removable contacts offer a substantial savings of time, labor and a great flexibility in the choice of circuitry. The contact is easily removed with the hand tool depicted and then placed by hand or with a simple insertion tool.

The TMRAC Series was designed specifically for the industrial/ commercial customer for application in high temperature, rough service operations. This series features the same military-type anodized aluminum hoods, rugged polyester thermoplastic insulators, screw-machine removable contacts, guide and hardware as the MRAC Series.

Specifications

Insulators:	Polyester thermoplastic, black color. High potential performance: withstanding voltage is one minute electrification at 2000 VAC (sea level).	Contacts:	Must be ordered separately. Select from crimp, solder, dip solder, shielded or Wire-Wrap termination contacts. See 100 Series contact section.
Insulation Resistance:	500V	Contact Identification:	Standard contact identification is alphabetical.
Thermal Shock:	-55°F to +150°F	Sizes:	.040" diameter and .062" diameter contacts in 7.5-amp and 13-amp current ratings.
Hoods:	Anodized aluminum. May be applied on plug or receptable. Both top and side opening hoods available.	Termination Types:	Crimp, dip-solder, solder removable in .040" and .062" diameter. Wire Wrap tails and stabilizing bushings for .025" and .045" square.
Polarization:	Gold plated guides provide positive polarization. Polarized nickel-plated brass and/or passivated stainless steel jackscrews with anodized aluminum knobs are available.	Current Rating:	7.5 amps maximum for .040" contacts. 13 amps maximum for .062" contacts.
Number of Contacts:	Eight size connectors: 9-, 14-, 18-, 20-, 26-, 34-, 42- and 50-contact, available in either .040" or .062" diameter.		

CSA Certified File No.  LR34182
Recognized under the Component Program
of Underwriters Laboratories Inc. File No. E31650 

Ordering Information

Omit steps not required

Step 4

Guides

G* Phosphor Bronze Cylindrical Guides
K Beryllium Copper Cylindrical Guides
N* Brass Cylindrical Guides
"P" indicates two guide pins or two jackscrews (EX. JTCP)
"S" indicates two guide sockets or two jackscrews (EX. GS)

* For passivated stainless steel add SS suffix.

Jackscrew Locks

***J Polarized Fixed Jackscrew and Jacksocket
JT Polarized Short Turning Jackscrew and Jacksocket
JTC Polarized Long Turning Jackscrew and Jacksocket
***JTD Polarized Long Turning Mono-Jackscrew and Mono-Jacksocket for Sizes 34, 42, and 50 only.

**JZ Same as J but with 6-32 mtg. thd.
**JTW Same as JT but with knurled round knob with internal hex
**JTU Same as JT but with knurled round knob with screwdriver slot
**JTX Same as JT but with hex knob
**JTCW Same as JTC but with knurled round knob with internal hex
**JTCU Same as JTC but with knurled round knob with screwdriver slot
**JTCX Same as JTC but with hex knob
**JTCZ Same as JTC but with prybar knob

** Request availability information.

*** Material: Nickel Plated Brass standard

Notes: 1. Contacts are ordered separately. See 100 Series contact section of Rack & Panel
2. When ordering hoods, hardware and connectors separately for use with JTD Monojacks, connectors must be ordered as follows:
Pin connector = TMRAC34P8, TMRAC42P8, etc.
Socket connector = TMRAC34S8, TMRAC42S8, etc.
The number "8" indicates special housing for use with the JTD Monojack hardware (available on sizes 34, 42, and 50).

Dimensions

All dimensions for TMRAC housings are the same as MRAC housings. All hoods, hardware, and accessories used on the TMRAC Series are the same as those used on the MRAC Series. See MRAC Series section for part numbers and dimensions. Note the TMRAC Series maximum number of contacts is 50.

TXAC Series

Heavy Duty, Industrial and Commercial, External Mini Rectangular Rack & Panel Connectors

TXAC34SF2A010

TXAC34PM1A000

TXAC34PC1A700

The TXAC Series was designed for external installation specifically for the industrial/commercial customer in high temperature, rough service applications. This series features the same military-type anodized aluminum hoods, rugged polyester thermo-

plastic insulators, screw-machine removable contacts, guide and jack hardware, and protective, anodized aluminum shells as the XAC Series. These features make this Series suitable for chassis mounting, bulkheads, or any outside surface equipment.

Specifications

Insulators:	Polyester thermoplastic, green color. High potential performance: withstanding voltage is one minute electrification at 2000 VAC (sea level).	Contact Identification:	Standard contact identification is alphabetical.
Insulation Resistance:	500V	Sizes:	.040" diameter and .062" diameter contacts in 7.5-amp and 13-amp current ratings.
Thermal Shock:	-55°F to +150°F	Contact Resistance:	@ 7.5 amps, 14 millivolts max. @ 13 amps, 10 millivolts max.
Hoods:	Anodized aluminum. May be applied on plug or receptable. Both top and side opening hoods available.	Termination Types:	Crimp, dip-solder, solder removable in .040" and .062" diameter. Wire Wrap tails and stabilizing bushings for .025" and .045" square.
Polarization:	Gold Plated guides provide positive polarization. Polarized nickel-plated brass and/or passivated stainless steel with anodized aluminum knobs are available. 7-position pin and slot polarization on shells.	Current Rating:	7.5 amps maximum for .040" contacts. 13 amps maximum for .062" contacts.
Number of Contacts:	Eight size connectors: 9-, 14-, 18-, 20-, 26-, 34-, 42- and 50-contact, available in either .040" or .062" diameter.		
Contacts:	Must be ordered separately. Select from crimp, solder, dip solder, shielded or Wire-Wrap termination contacts. See 100 Series contact section.		

CSA Certified File No.  LR34182
Recognized under the Component Program
of Underwriters Laboratories Inc. File No. E31650 

Ordering Information

Omit steps not required

Note: 1. Contacts are ordered separately. See 100 Series contact section of Rack & Panel

Dimensions

All dimensions for TXAC housing are the same as MRAC housings. All hoods, shells, hardware, and accessories used on the TXAC Series are the same as those used on the XAC Series. See the XAC Series section for part numbers and dimensions. Note the TXAC Series maximum number of contacts is 50.

Miniature Rectangular / #16 Contacts / .062" Dia. / 13 Amps

Receptacle MRA 34S-G Plug MRA 34P-G Hood

The MRA Series offers compact, lightweight and self-aligning plugs and receptacles with unusually high current and voltage ratings for their size. Performance tests show them to well exceed military standards. Except for contact size, the MRA and MRE Series share the same hoods, hardware and accessories. Right angle, dip solder, pin or socket contacts are available. Consult factory. Dimensions are for reference only and are subject to change. Outline drawings on request.

Specifications

Current Rating:	13 amps	Dielectric:	Gray glass filled diallyl phthalate, per MIL-M-14, SDG-F.
Number of contacts:	9, 14, 20, 34, 41, 42, 50, 50-8, 66, 75, 104	Polarization:	Gold plated guides provide polarization. Polarized nickel-plated brass and/or passivated stainless steel jackscrews with anodized aluminum knobs are available.
Pin Contacts:	.062 diameter, gold plated brass	Hoods:	Anodized aluminum. May be applied to either plug or receptacle. Both top and side opening hoods available.
Socket Contacts:	Phosphor bronze, gold plated		
Terminations:	.070 dia. solder cup is standard. Will accommodate up to #16 AWG stranded wire. Pin and Socket contacts available with .030 diameter dip solder terminations. Consult Sales Dept. for lengths available.		
Electrical Data:	Meets high potential performance of MIL-C-28748. Military versions are QPL'd to M28748/1 and M28748/2. The minimum dielectric withstanding voltage is one minute electrification 1000 VAC, sea level.		

Termination Types

Solder Cup

For pin and socket contacts, .070 diameter solder cup is the standard termination for cable and panel mount applications. Wire accommodation: up to #16 AWG stranded.

Dip Solder

For pin and socket contacts, .030 diameter dip solder terminations, straight or right angle for mounting to printed circuit board or for use with flexible cable.

Guide Sockets

3 Types of Guide Sockets are Available

Guide Socket Code Letter	Application	Actual Size Photo	
G*	The "G" type socket is the standard guide supplied. It has good physical strength and may be used electrically in a low current circuit or as a contact for ground leads.	 G Type For General Use Phosphor	 Standard Guide Pin mates with all types Brass
K	The "K" guide socket is an excellent electrical conductor. Its extra spring-tension provides a high normal force uniformly distributed along the surface of the engaged pilot guide, thus minimizing electrical resistance. The multivolt drop across extreme ends of the engaged pilot and socket guide is 10 mv. at 20 amps.	 K Type For High Electrical Conductivity Beryllium Copper	
N*	The high physical strength of the "N" guide socket allows a greater degree of forcible tightening against a mounting surface than is permitted by the other guide sockets. This feature is particularly desirable for mounting connectors which will be subject to severe vibration in service. "N" guides are not to be used electrically.	 N Type For extra Mechanical Strength Brass	

* For passivated stainless steel add SS suffix

Polarized jackscrews give the ease and assurance of threaded positive coupling. The actuating side consists of two turnable screws, one male and one female, each with knurled and slotted knobs. On the mating half are the two fixed screws required to complete the locking action. When mated, the jackscrews may be locked with a safety wire through the hole in the self-locking pin (in the jackscrew shaft).

The drawings show the extension of the jackscrew knobs beyond a typical MRA connector and beyond the connector-and-hood assembly (center drawings). Dimensions given are constant for all connectors except as noted. Other dimensions applicable to various hood styles are detailed in the chart.

Jackscrews & Jacksockets

Connector with fixed Jackscrews.

Hoods - Locking

Lock Tabs (MRE-V shown)

Lever & Pivot Assemblies (MRE-VL shown)

Vibration Locks*

Vibration locks offer simplicity of design and positive locking in excess of 50G shock impact and 10G vibration acceleration. Mating halves automatically lock when engaged. To unlock, depress the levers. Drilled holes in the levers

are provided for safety wiring. Vibration locks are available separately for assembly on connectors now in service. Each code number indicates two units: two levers with two pivots, and two lock tabs.

*US Patent Number 2760174

Note: When panel mounting the lock-tab half of a MRA 34, MRA 42 or MRA 50 and MRA 66 connector, flat washers (.033 minimum thickness) should be used on the mounting screws to shim the moulding away from the panel.

Lever & Pilot Assembly	Lock Tabs (See Note)	Used on Connectors

Dimensions / Outline Pre-Shaped Nylon Potting Forms

Dimensions are for reference only and are subject to change. Outline drawings on request.

Each form matches the back opening contour of its appropriate shell, and stays easily in place during the potting operation. Of negligible weight, it need not be removed from the

connector after potting. Because of floating contacts, connector halves should always be engaged during the potting operation to preserve contact alignment.

Ordering Information

Omit steps not required

Guides

- *G Phosphor Bronze Cylindrical Guides*
- K Beryllium Copper Cylindrical Guides
- *N Brass Cylindrical Guides*

Guides are not recommended for Size 104

"P" indicates two guide pins or two jackscrews (EX. JTCP)

"S" indicates two guide sockets or two jacksockets. (Ex. GS)

Jackscrew Locks

- *** J Polarized Fixed Jackscrew and Jacksocket
- JT Polarized Short Turning Jackscrew and Jacksocket
- JTC Polarized Long Turning Jackscrew and Jacksocket
- *** JTD Polarized Long Turning Mono-Jackscrew and Mono-Jacksocket for Sizes 34, 42, 50, 66, 75, and 104 only.

** JZ Same as J but with 6-32 mtg. thd. (Std. on 104)

** JTW Same as JT but with knurled round knob with internal hex (not avail. 104)

** JTV Same as JT but with knurled round knob with screwdriver slot (not avail. 104)

** JTX Same as JT but with hex knob (not avail. 104)

** JTCW Same as JTC but with knurled round knob with internal hex (not avail. 104)

** JTCU Same as JTC but with knurled round knob with screwdriver slot (not avail. 104)

** JTCX Same as JTC but with hex knob (not avail. 104)

** JTCZ Same as JTC but with prybar knob (not avail. 104)

** Request availability information.

*** Material: Nickel-plated brass - standard.

* For passivated stainless steel add SS suffix. (**Example:** MRA34SGSS)

Mounting Note: Connectors MRA 9, MRA 14, MRA 20 and MRA41 use guides or fixed jacks for mounting in a hood or on a panel. Connectors MRA 34, MRA 42, MRA 50, MRA 66, MRA 75 use four #4 machine screws, and MRA 104 uses four #6 machine screws for mounting in a hood or on a panel. Guides are not recommended for use with MRA 104.

Note: When ordering hoods, hardware and connectors separately for use with JTD Monojacks, connectors must be ordered as follows:

Pin connector = MRA34P8, MRA42P8, etc.

Socket connector = MRA34S8, MRA42S8, etc.

The number "8" indicates special housing for use with the JTD Monojack hardware (available on sizes 34, 42, 50, 66, 75 and 104).

MRE Series

Miniature Rectangular / #20 Contacts / .040" Dia. / 7.5 Amps

Receptacle MRE 14S-G

Plug MRE 14P-G

Hood MRE 14H

MRE Series plugs and receptacles are the accepted standard for rectangular-shaped, miniature, internal-type connectors. They embody all of the features expected of true miniaturization: maximum utility of space, extremely lightweight and unusually high

working voltage and current ratings. Their long life and trouble-free service continue to make them highly popular for use in aircraft, instrumentation and portable equipment. The MRE and MRA series share the same hoods, hardware and accessories.

Specification

Current Rating:	7.5 amps	Dielectric:	volts. Brown mineral filled diallyl phthalate. Also available in gray glass filled diallyl phthalate, per MIL-M-14, SDG-F.
No. of Contacts:	7, 8, 9, 11, 14, 18, 20, 21, 26, 34, 41, 42, 50, 75, 104	Polarization:	Gold plated guides provide positive polarization. Polarized nickel-plated brass and/or passivated stainless steel jackscrews with anodized aluminum knobs are available.
Pin Contacts:	.040 dia., gold plated brass	Hoods:	Anodized aluminum. May be applied to either plug or receptacle. Both top and side openings are available.
Socket Contacts:	Phosphor bronze plated gold.		
Termination Types:	.048 dia. solder cup is standard. It will accept up to #20 AWG stranded wire. Pin and Socket Contacts available with dip solder terminations, .025 Dia. Check Sales Dept. for lengths available.		
Electrical Data:	Meets high potential performance requirements of MIL-C-28748. Military versions are QPL'd to M28748/5 and M28748/6. The dielectric withstanding voltage is one minute at 1200		

Termination Types

- Solder Cup**

.048 diameter solder cup is the standard termination for cable and panel mounting applications. It will accept up to #20 AWG stranded wire.
- Dip Solder**

For mounting on printed circuit boards, .025 diameter straight dip solder terminations (for Pin Contacts and Socket Contacts) are available. Consult the Sales Department for available lengths.

Guide Forms

3 Types of Guide Sockets are Available

Guide Socket Code Letter	Application	Actual Size Photo	
G*	The "G" type socket is the standard guide supplied. It has good physical strength and may be used electrically in a low current circuit or as a contact for ground leads.	 G Type For General Use Phosphor	 Standard Guide Pin mates with all types Brass
K	The "K" guide socket is an excellent electrical conductor. Its extra spring-tension provides a high normal force uniformly distributed along the surface of the engaged pilot guide, thus minimizing electrical resistance. The multivolt drop across extreme ends of the engaged pilot and socket guide is 10 mv. at 20 amps.	 K Type For High Electrical Conductivity Beryllium Copper	
N*	The high physical strength of the "N" guide socket allows a greater degree of forcible tightening against a mounting surface than is permitted by the other guide sockets. This feature is particularly desirable for mounting connectors which will be subject to severe vibration in service. "N" guides are not to be used electrically.	 N Type For extra Mechanical Strength Brass	

* For passivated stainless steel add SS suffix

Physical Data

HOW TO ORDER: To obtain "K" or "N" guides in place of the standard "G" type, substitute the desired socket style code letter ("K" or "N") for "G" in both the Plug and Receptacle Code Numbers. (See Code Numbers in table at right.

MRE Series

Polarized jackscrews give the ease and assurance of threaded positive coupling. The actuating side consists of two turnable screws, one male and one female, each with knurled and slotted knobs. On the mating half are the two fixed screws required to complete the locking action. When mated, the jackscrews may be locked with a safety wire through the hole in the self-locking pin (in the jackscrew shaft).

The drawings show the extension of the jackscrew knobs beyond a typical MRA connector and beyond the connector-and-hood assembly (center drawings). Dimensions given are constant for all connectors except as noted. Other dimensions applicable to various hood styles are detailed in the chart.

Jackscrews & Jacksockets

Connector with fixed Jackscrews.
Code designation: J

Mating connector half with turnable Jackscrews-with-Knobs.
Code designation: JT

Mating connector half with Hood and turnable Long Jackscrews-with Knobs. Code designation: JTCH, JTCH1

Mating connector half with Hood and turnable Monojacks. Code designation: JTDH, JTDH1

New Monojacks Assemble and Disassemble With Remarkable Ease and Speed

To free the connector from the hood simply remove four screws. Monojacks may be used on miniature rectangular connectors with from

34 to 104 contacts. Molds have 2 center thru holes and 4 mounting holes.

MOLDINGS HAVE STRAIGHT THRU HOLES

MONOJACKS ARE CAPTIVATED IN KEYHOLE SLOT OF HOOD AS SHOWN ABOVE.
WHEN USING SHELLS, MONOJACKS ARE CAPTIVATED IN KEYHOLE OF SHELL AND CLEARANCE HOLES ARE PLACED IN HOODS.

Outline Jackscrews & Jacksockets

Dimensions

All jackscrews and sockets are stainless steel, passivated, except for J & JTD which are nickel-plated brass. All knobs are aluminum, anodized except JTW and JTCW which are stainless steel, passivated.

MRE Series

Lock Tabs (MRE-V shown)

Lever & Pivot Assemblies (MRE-VL shown)

Hoods – Locking

Lever & Pilot Assembly	Lock Tabs (See Note)	Used on Connectors
MRE-VL	MRE-V	MRA 9, 14, 20, 34, 41, 42, 66
MRE-VL2	MRE-V2	MRE 50, 75

Vibration Locks*

Vibration locks offer simplicity of design and positive locking in excess of 50G shock impact and 10G vibration acceleration. Mating halves automatically lock when engaged. To unlock, depress the levers. Drilled holes in the levers

are provided for safety wiring. Vibration locks are available separately for assembly on connectors now in service. Each code number indicates two units: two levers with two pivots, and two lock tabs.

*US Patent Number 2760174

Note: When panel mounting the lock-tab half of a MRE 34, MRE 42 or MRE 50 and MRE 66 connector, flat washers (.033 minimum thickness) should be used on the mounting screws to shim the molding away from the panel.

MRE 50 and MRE 75 connectors use the standard MRE 50 and MRE 75 mounting brackets

Dimensions / Outline Pre-Shaped Nylon Potting Forms

Dimensions are for reference only and are subject to change. Outline drawings on request.

Each form matches the back opening contour of its appropriate shell, and stays easily in place during the potting operation. Of negligible weight, it need not be removed from

the connector after potting. Because of floating contacts, connector halves should always be engaged during the potting operation to preserve contact alignment.

Ordering Information

Omit steps not required

Guides

- *G Phosphor Bronze Cylindrical Guides*
- K Beryllium Copper Cylindrical Guides
- *N Brass Cylindrical Guides*

Guides are not recommended for Size 104

"P" indicates two guide pins or two jackscrews (Ex. JTCP)

"S" indicates two guide sockets or two jacksockets. (Ex. GS)

Jackscrew Locks

- ***J Polarized Fixed Jackscrew and Jacksocket
- JT Polarized Short Turning Jackscrew and Jacksocket
- JTC Polarized Long Turning Jackscrew and Jacksocket
- *** JTD Polarized Long Turning Mono-Jackscrew and Mono-Jacksocket for Sizes 34, 42, 50, 75, and 104 only.

- ** JZ Same as J but with 6-32 mtg. thd. (Not available 5-3, 8) (Std. on 104)
- **JTW Same as JT but with knurled round knob with internal hex (not avail. 5-3, 8, 104)
- **JTU Same as JT but with knurled round knob with screwdriver slot (not avail. 5-3, 8, 104)
- **JTX Same as JT but with hex knob (not avail. 5-3, 8, 104)
- **JTCW Same as JTC but with knurled round knob with internal hex (not avail. 5-3, 8, 104)
- **JTCU Same as JTC but with knurled round knob with screwdriver slot (not avail. 5-3, 8, 104)
- **JTCX Same as JTC but with hex knob (not avail. 5-3, 8, 104)
- **JTCZ Same as JTC but with prybar knob.

** Request availability information.

*** Material: Nickel-plated brass - standard
Example: MRE34SJTDBH8

* For passivated stainless steel add SS suffix (**Example:** MRE34SGSS)

Mounting Note: Connectors MRE 41, MRE 26, and smaller use guides for mounting in a hood or on a panel. Connectors MRE 34, MRE 42, MRE 50, MRE 75, use four #4 machine screws, in addition to guides, for mounting in a hood or on a panel.

Note: When ordering hoods, hardware and connectors separately for use with JTD Monojacks, connectors must be ordered as follows:

Pin connector = MRE34P8, MRE42P8, etc.

Socket connector = MRE34S8, MRE42S8, etc.

The number "8" indicates special housing for use with the JTD Monojack hardware (available on sizes 34, 42, 50, 66, 75 and 104).

XMRA & XMRE Series

XMRA & XMRE Series External Miniature Rectangular / #16 Contacts / .062" Dia. 13 Amps & #20 Contacts / .040" Dia. / 7.5 Amps

A typical Series "XMRE" Receptacle and Plug fully wired and potted.

The XMRE and XMRA Series connectors are designed to provide a sturdy, space-saving, lightweight electrical connection. Inserts are

housed in protective shells with screw lock coupling plus wall and cable mounting accessories available.

Specifications

Current Rating:	XMRA - 13 amps XMRE - 7.5 amps	Dielectric:	Brown mineral filled diallyl phthalate. Also available in gray glass filled diallyl phthalate, per MIL-M-14, SDG-F.
No. of Contacts:	XMRA - 9, 14, 20, 34, 42, 50, 50-8, 66, 75, 104 XMRE - 9, 14, 18, 20, 26, 34, 42, 50, 75, 104	Polarization:	A polarizing stud in the plug shell and a mating slot in the receptacle shell eliminates misalignment. Jackscrews and jacksockets or guide pins and sockets are alternative methods of polarization.
Pin Contacts:	XMRA - .062 diameter, gold plated brass XMRE - .040 diameter, gold plated brass	Hoods:	Anodized Aluminum. May be applied to both plug and receptacles. Both top and side opening hoods are available.
Socket Contacts:	Phosphor bronze plated gold.		
Termination Types:	XMRA - .070 dia. solder cup will accept up to #16 AWG stranded wire. XMRE - .048 dia. solder cup will accept up to #20 AWG stranded wire.		
Electrical Data:	Both XMRE and XMRA meet high potential performance requirements of MIL-C-28748. Military versions are QPL'd to M28748/1 and M28748/2 (XMRA) and to M28748/5 and M28748/6 (XMRE) The minimum dielectric withstanding voltage is one minute electrification at 1000 VAC (sea level) for XMRA and 1200 VAC for XMRE Series.		

Connector Assemblies

Connector Terms

Plug: The complete connector half which has the plug shell as part of its assembly.

Receptacle: The complete connector half which has the receptacle shell as part of its assembly.

Shell: The metal housing in which a male or female insert is assembled. A shell is either a plug shell or a receptacle shell.

Plug Shell: One which is designed to be inserted into a receptacle shell.

Receptacle Shell: One which is designed to receive and enclose the plug shell upon engagement.

Male Insert: The molded insulator body containing pin contacts.

Female Insert: The molded insulator body containing socket contacts.

Pin Contacts: Male metal conductors that fit into the socket contacts.

Socket Contacts: Female metal conductors, tubular in shape, which receive the pin contacts and retain them by spring tension.

Polarization: A means of controlling the engagement of a plug and receptacle so that correct mating of the contacts is achieved.

Potting Form: A plastic mold used to retain and shape the sealing compound during the moisture-proofing, or potting operation.

Potting: A method of moisture-proofing the back of a plug or receptacle and the soldered wire connections by injecting a free flowing sealing compound into a pre-shaped form and allowing it to set. The result is a homogeneous mass, chemically bonded to the back of the insert and around the soldered connections.

Accessories: Those components such as hoods, mounting plates and finger grips which are attachable to a plug or receptacle to facilitate mounting and/or handling of the connector.

XMRA & XMRE Series

Jackscrews & Jacksockets

Jackscrew Locking Devices

Polarized jackscrews offer the ease and assurance of threaded positive coupling. They are particularly desirable for the larger connectors (XMRE 34 and larger) whenever they are to be used in locations that make it difficult to apply enough direct pull to separate the two halves of the connector.

Type C (long-turning jackscrews and jacksockets) or Type D (mono-jacks) must be specified if both jackscrews and hood are required on the same connector half. Monojacks eliminate the need for roll pins, spacers and washers.

Outline Shells – Receptacle

Dimensions are for reference only and are subject to change. Outline drawings on request.

Dimensions Shells – Receptacle

Important Note When Ordering Plug and Receptacle Shells

The shell part numbers given in table show an asterisk (*) where the code letter for the desired polarizing position belongs - example: XMRE9-2*000 becomes XMRE9-2B000 when polarization in position "B" is desired. Specify the same position on the mating shell.

For non-polarized shells, merely omit this position, e.g. XMRE9-2000.

TYPICAL SHELLS FOR MONOJACKS

Shells are aluminum, anodized for protection against corrosion. Either shell style - plug or receptacle - may be used to house the female insert, thus allowing the "live" socket contacts to be cable or panel mounted, as desired. Shells also provide a means by which connector polarization is accomplished - the receptacle shell is slotted for engaging a polarizing pin on the plug shell. Any of seven positions (A, B, C, D, E, F, or G) may be specified for polarization; non-polarized shells have the slot and pin omitted.

Stainless steel shells available for 66 and 104 sizes. Dimensions vary from those shown for aluminum shells, Check Sales for availability and dimensions on all sizes.

Outline Mounting Plates

Dimensions are for reference only and are subject to change. Outline drawings on request.

Mounting Plates for External Miniature Rectangular Connectors, Potting Forms

Mounting Plates enable attachment of a connector to a wall, bulkhead, or other supporting surface. The plate is assembled to the back of a plug or receptacle by employing the same hardware and/or guides used to retain the insert in the shell; No. 4 machine screws are then used to mount the complete assembly against the required surface.

Mounting plates are aluminum, anodized to resist corrosion.

Outline Potting Forms

Potting Forms for External Miniature Rectangular Connectors

Nylon Potting Forms: Each form matches the back opening contour of its appropriate shell. Stays easily in place during the potting operation. Of negligible weight, the form need not be removed from the connector after potting. XMRE and XMRA connector-halves should always be engaged during the potting operation to preserve the contact alignment.

Potting form plan view for 9 to 26 contacts

Potting form plan view for 34, 42, 50, 50-8, 66, and 104 contacts

SLE-SME-SRE Series

Sub Miniature / High Density Rectangular / .025" Dia. / 3 Amps .030" Dia. / 5 Amps / .040" Dia. / 7.5 Amps

SLE
.025 Diameter Contacts — 3 Amps.

SRE
.030 Diameter Contacts — 5 Amps

SME
.040 Diameter Contacts — 7.5 Amps

Within this series, you'll find a standard size connector for which you can select one of three current ratings: 3, 5 or 7.5 amps. Compact and lightweight, they are especially

suited for aircraft, instrumentation and portable equipment applications. Right angle, dip solder, pin or socket contacts are available. Consult factory.

Specifications

Current Rating:	SLE - 3 amps; SRE - 5 amps; SME - 7.5 amps.	Dielectric:	electrification at 1000 VAC. Green glass-filled diallyl phthalate per MIL-M-14, SDG-F.
No. of Contacts:	4, 5, 7, 9, 11, 14, 20, 26, 29, 34, 44, 50.	Guides:	Type NSS stainless steel, passivated or Type N Brass, gold plated.
Pin Contacts:	Brass, gold plated except for SLE which is phosphor bronze, gold plated.	Jackscrews:	Stainless steel, passivated. Aluminum knobs on the jackscrews are equipped with set screws, except JTU jackscrews which have stainless steel knobs equipped with groove pins.
Socket Contacts:	Phosphor bronze, gold plated.	Hoods:	Anodized aluminum. May be applied to either plug or receptacle. Both top and side openings are available for use with either guides or jackscrews.
Termination Types:	.037 diameter solder cup will accept up to #22 AWG stranded wire. Solder cup adaptor (Part No. S45) will accept up to #20 AWG stranded wire. Dip solder terminations available for SRE Series, .030 Dia. Check Sales Department for available lengths. Military versions of SRE are QPL'd to M28748/7 and M28748/8.		
Electrical Data:	The dielectric withstanding voltage is one minute

SLE-SME-SRE Series

Outline

Dimensions are for reference only and are subject to change. Outline drawings on request.

Dimensions

The stainless steel guide pin and socket have good physical strength and are particularly desirable for mounting connectors which will be

subject to severe vibration in service, but not for electrical applications. Optional gold plated brass available for electrical applications.

SREC Series

Sub Miniature Rectangular, Removable Contacts

SREC 14SN

SREC 14PNH13

Tool 107-1012

The SREC series is the first family of subminiature crimp contact rack and panel connectors. While retaining all of the important features of true connector miniaturization, the SREC offers .030 diameter crimp (4 indents) type removable contacts with .094

center to center spacing. Contacts are precision machined to assure solid pin and socket reliability. Compact and light in weight, the SREC Series is especially suitable for aircraft, instrumentation, computer and portable equipment applications.

Specifications

Current Rating: 5 amps

No. of Contacts: 7, 11, 14, 18, 20, 26, 34, 44, 50

Pin Contacts: .030 dia. 4 indent crimp. Lead plated commercial bronze, gold plated.

Socket Contacts: Phosphor bronze, gold plated.

Termination Types: Crimp or .025 sq. wire wrap. Crimp contacts will accommodate #20-#28 AWG stranded wire.

Dielectric: Glass-filled diallyl phthalate per MIL-M-14, SDG-F.

Electrical Data: The dielectric withstanding voltage is one minute electrification at 1400 VAC.

Jackscrows: Long and short turning, passivated stainless steel. Anodized aluminum knurled knobs equipped with set screws for long turning jackscrews. Stainless steel knobs with groove pins for short turning jackscrews.

Guides: Type N is standard - brass for extra mechanical strength. Type K - beryllium copper for high electrical conductivity. Type NSS - stainless steel

Hoods: Top opening hoods are available in all sizes. Side opening available for SREC 50 only.

SREC Series

42 Series

Panel Mount Miniature 22 AWG – .030" Diameter – 5 Amps

Termination Types

Dip Solder:	.125" or .156" standard lengths with other lengths available on special order.	Solder Cup:	Accommodates up to #22 AWG stranded wire.
Grid Spacing:	.100" x .100" grid 50 or 74 contact positions on .100" centers in 3 rows. Two outboard rows for 25 contacts each. Center row either for 24 additional contacts or polarizing pins in specified positions.	Crimp Removable:	Crimp contacts available for #20 through #30 AWG stranded wire. Designed for four indent crimp. See crimp tooling.

Polarization

Available in 50 contact configuration only. Choice of any combination of 24, center positions. Specify polarizing positions required. Positions top to bottom are: A, B, C,	D, E, F, H, J, K, L, M, N, P, R, S, T, U, V, W, X, Y, Z, a.b. When 74 contacts are required no polarization other than hardware polarization is available.
---	---

Specifications

Current Rating: 5.0 amps.	Dielectric: Minimum withstanding voltage is one minute electrification at 1200 VAC.
Pin Contacts: .030" dia. gold plated brass conforming to specification QQ-B-626.	Polarization: Polarizing pins may be used in any combination in center row.
Socket Contacts: Gold plated phosphor bronze.	Jackscrows: Passivated stainless steel, anodized aluminum knobs.
Termination Types: Solder cup, dip solder and crimp removable contacts.	Hoods: Anodized aluminum, top opening only.
Housing Material: Red diallyl phthalate for Dip Solder and Solder Cup Housings. Green diallyl phthalate for Crimp Removable Housings

OUTLINE JACKSCREWS & JACKSOCKETS

Dimensions are for reference only and are subject to change. Outline drawings on request.

Connector with fixed Jackscrews Code designation F

Mating thread size 2-56 UNC except size 104 which is 6-32 UNC.

AND

Mating connector half with turnable Jackscrews-with-Knobs Code designation M

OR

Mating connector half with Hood and turnable Long Jackscrews-with-Knobs Code designation C-0300, C-0400

Jackscrew locking device assures positive coupling of engaged connectors to prevent accidental disconnecting from vibration or physical shock. It also aids easy connection and separation of connector plug and receptacle. Mounted connector-half houses one non-turnable fixed jackscrew and jackscrew to insure connector polarization. Mating-half houses one of the two types of turning jackscrew and jackscrew (M or C) Turnable jackscrew-jackscrew combination (M or C) assemblies on either Plug or

Receptacle, the mating connector-half (either Receptacle or Plug) must then contain fixed jackscrew-jackscrew combination (F).

Both short and long turning jackscrews (M and C) have knurled and slotted knobs for locking by hand or screwdriver. Knob is assembled on shaft with a socket setscrew. Safety wiring of engaged halves is achieved by using the through-holes.

Drawings show extension of standard knobs beyond hood.

SRM Series

Plug Shells

Dimensions are for reference only and are subject to change. Outline drawings on request.

For Use With XSRM Connectors

Receptacle Shells

Dimensions are for reference only and are subject to change. Outline drawings on request.

For Use With XSRM Connectors

Materials

Shells are .031 thick aluminum, anodized for protection against corrosion. Either style - plug or receptacle - may be used to house a female insert, thus allowing "live" socket contacts to be cable or panel mounted.

Shells also provide a means by which connector polarization is accomplished - receptacle shell is slotted for engaging a polarizing pin on plug shell. Non-polarized shells have the slot and pin omitted.

Polarization

The shell part numbers given in table show an asterisk (*) where the code letter for the desired polarizing position belongs - example: XSRM14-2*000 becomes XSRM14-2B000

when polarization in position "B" is desired. Specify the same position on the mating shell. For non-polarized shells, merely omit this position, e.g. XSRM14-2000.

Shell Size	Available Polarization Positions	Shell Size	Available Polarization Positions

PM6 Series

High Voltage, Single Contact / #20 Contacts / .040" Dia. / 7.5 Amps

N Nylon Nut
PM1SLR Plug with lock ring
PM1PLS Receptacle with lock spring
H10 Hood

This connector was developed for applications requiring moderately high voltage ratings, this single contact connector is particularly well adapted to Photo-Flash, Aircraft, Instrumentation and Communications Equipment.

Outline

Dimensions are for reference only and are subject to change. Outline drawings on request.

Specifications

Current Rating: 7.5 amps		
No. of Contacts: 1		
Pin Contacts: .040 dia. brass, gold plated	Mounting:	receptacle with respect to each other.
Socket Contacts: Phosphor bronze, gold plated		Cable or panel mounted. Use nylon nut applied to either plug or receptacle.
Terminations: .048 solder cup will accept up to #20 AWG stranded wire.	Lock Ring (and lock spring):	Applied to plug or receptacle. Prevents connector rotation on panel and when engaged with lock spring, prevents accidental disconnection due to vibration, etc.
Electrical Data: Dielectric withstanding voltage is one minute electrification at 5650 VAC.		Diallyl Phthalate cable hood
Dielectric: Molded Diallyl phthalate per MIL-M-14, type SDG-F. Color Gray.	Hood:	
Polarization: Permits one engaging position only and prevents rotation of the plug and	Weight in Ounces:	Receptacle .05, Plug .05, Washer .005, Hood .07, Lock Ring .017, Lock Spring .019, Nut .015

Specifications

Current Rating: 7.5 amps

No. of Contacts: 6

Pin Contacts: .040 dia. brass, gold plated

Socket

Contacts: Spring temper phosphor bronze, gold plated

Terminations: .048 dia. solder cup accepts up to #20 AWG stranded wire.

Electrical Data: Dielectric withstanding voltage is one minute electrification at 3560 VAC.

Dielectric: Molded Diallyl phthalate per MIL-M-14, type SDG-F. Color Gray.

Polarization: Body design makes it impossible to make connection except in proper position.

Mounting: Cable or panel mounted. Use nylon nut applied to either plug or receptacle.

Lock Ring (and lock spring): Prohibits connector rotation on panel mounting and when engaged with lock spring, prevents accidental disconnection due to vibration, etc.

Hood: Molded diallyl phthalate cable hood may be applied to either plug or receptacle.

Hood with lock shell

The extreme compactness and lightweight of M connectors make them ideal for such applications as strain gauges, telemetry and pressure pick-up installations in aircraft, portable equipment and instrumentation.

Specifications

Current Rating: 7.5 amps

No. of

Contacts: 4, 5, 7, 9, 10, 12

Pin Contacts: .040 dia. brass, gold plated

Socket

Contacts: Spring temper phosphor bronze, gold plated

Terminations: .048 dia. solder cup accepts up to #20 AWG stranded wire. M12 - .043 dia. solder cup accepts up to #20 AWG stranded wire.

Electrical Data: The dielectric withstanding voltage is one minute electrification at 1500 VAC. (2250 VAC for M12).

Dielectric: Brown mineral filled diallyl phthalate. Also available in gray glass filled diallyl phthalate, per MIL-M-14, SDG-F.

Polarization: Body design permits engagement in proper position only.

Mounting: For 1/16" panel mounting of either plug or receptacle use cadmium plated brass nut for M4-10, nylon nut for M12. Add "N" to code number.

Lock Ring (and lock spring): May be applied to plug or receptacle to stop connector rotation on panel. When engaged with lock spring, prevents accidental disconnection due to vibration, etc.

Ground Lug: Can be used to ground any of the 4 contacts on M4 connector. Add "G" to code number.

Hood: Anodized aluminum or brown mineral filled diallyl phthalate hoods may be applied to plug or receptacle of M4-M10. With or without cable clamps to provide additional strain relief for the cable.

M Series

Molded Diallyl Phthalate and Aluminum Hoods

Molded diallyl phthalate cable hoods protect soldered wires and facilitate disengagement of connectors. Cable clamps provide additional strain relief and support. They are supplied on hoods with "C" in the code number. Clamps are cadmium plated with olive drab iridite finish. Anodized aluminum

hoods are precision machined from bar stock to give greater strength than die cast units. Cable clamps are machined as an integral part of the connector. The set screw prevents accidental disassembly from vibration, etc. A polyethylene sleeve liner provides added insulation in the terminal area.

Removable Contacts

6x Actual Size — Typical Removable Contact

Winchester Electronics removable contacts allow quick, easy removal and replacement of any contact without disturbing another - and without discarding the connector. They offer exceptional flexibility in both the choice and revision of circuitry for rack and panel equipment ... at substantial savings in replacement and installation time. In addition, wiring costs are significantly lowered, as wires may be assembled away from the

connector itself. Assembly of contacts to wires is further simplified by crimp type contacts. A contact is slipped on the wire, inserted in the crimping tool, and crimped securely in place in seconds. Compact and self-aligning, these removable contacts provide high retention force and exceptional mechanical and electrical reliability. Solder type removable contacts are available for connectors using MRAC contacts.

Specifications

Pin Contacts:	Copper Alloy, gold plated.	Specifications:	Conforms to applicable portions of MIL-C-39029
Socket Contacts:	Closed entry type machined from copper alloy, gold plated.	Wire Sizes:	From a minimum 28 to a maximum 14 AWG. All contacts are designed to accept a minimum AWG conductor up to two sizes below maximum gage (each contact.)
Tools:	Complete line available. Includes automatic pneumatic, pneumatic hand operated, hand operated crimping tools, insertion and removal tools.	Termination Types:	Crimp, solder, dip solder or wire-wrap
Military		Current Rating:	7.5 Amps maximum for .040 contacts. 13 Amps maximum for .062 contacts.

To Order: Specify by catalog number

Note: Series 100 Removable Contacts are not supplied with the connector. They must be ordered as a separate item.

107 Series

Crimping Tools and Accessories

Pneumatic And Hand Crimping Tools

Automatic Feed Crimping Tool 600/1200 Crimps Per Hour

Catalog Number **107-0961**

Air operated tool provides for a large capacity reel and foot valve control. Crimp depths are accurately controlled by interchangeable snap-in depth blocks when the tool is bench mounted. Leaves operator's hands free. (Does not include reel or foot valve control.) Includes crimp depth blocks. Automatic Crimp Tool made up of bench mount (107-0962) and crimp tool (107-0960). Used to crimp 100-10**P/S, 100-20**P/S, 100-510**S Series.

Pneumatic Hand Crimping Tool 400 Crimps Per Hour

Catalog Number **107-0918**

Requires 80/120 psi. Crimp depth adjustment made by internal screw. Locators, adaptor sleeves, and gage plugs should be ordered separately. Locator 107-0945 and adapter 107-0950 supplied with tool.

Hand Operated Crimping Tool 200/300 Crimps Per Hour

Catalog Number **107-0903-2A**

(Mil-T-22520 Class II Equivalent)

Gage plugs should be ordered separately. Locator 107-0945 and Spanner wrench 107-1102 supplied with tool.

Miniature Hand Operated Crimping Tool

Catalog Number **107-43300**

This miniature version of the MS crimping tool is suited for the smaller crimp contacts such as the SREC series. It is only 7 1/2 inches long and weighs 10 1/2 ounces. Positioners are ordered separately.

Miniature Hand Operated Crimping Tool

Catalog Number **107-0625**

Miniature tool with a continuously variable crimp depth adjustment. Locators must be ordered separately.

Hand Operated Crimping Tool 200/500 Crimps Per Hour

Catalog Number **107-0970**

MS—3191-2 (Mil-T-22520 Class I)
Ruggedly built hand tools with forged body, and four indentors machined from high grade tool steel. Size approximately 9 inches long. Weight approximately 19 ounces.

Tool Kit

Catalog Number **107K4**

Includes crimping tool 107-0903-2A, locator 107-0945, insertion tool 107-1015, removal tool 107R-1001, spanner wrench 107-1102 and go/no-go gages 5431.

107 Series

Guide Set Tool

This tool provides fast and easy installation of G7 and N7 Guide Sets. Screwdriver type tips are enclosed by cylindrical aligners that hold tips in place in the Guide pin and socket slots to prevent slippage. Tool holds pin or socket in place while hex nut is tightened with hex wrench.

Catalog Number **107-0701**
for MRE / MRA / MRAC G7 / N7 Guide

Catalog Number **107-0704**
for MRE 5-3, 8 / SREC N Guide

Hex Wrench

This tool provides fast and easy installation of guides and fixed jacks. This tool may be used with the guide set tool.

Catalog Number **107-0703**
for MRE / MRA / MRAC (hex size $\frac{3}{16}$)

Catalog Number **107-0708**
for MRE 5-3, 8 / SRE / SREC (hex size $\frac{5}{32}$)
