

BOX MOUNTING RECEPTACLE MS 3102 E / MS 3102 R

MS 3102 E and MS 3102 R box mounting receptacles are used in junction boxes or as an integral part of equipment. These connectors are identical in construction and will mate with 3106 and 3108 styles. For new equipment customers should specify MS 3102 R.

STRAIGHT CABLE CONNECTOR INTEGRAL CABLE CLAMP MS 3106 E / MS3106 F

MS 3106 E and MS 3106 F straight cable connectors mate with 3100, 3101 and 3102 styles. MS 3106 F is identical to MS 3106 except for 'O' ring under the coupling nut, thus effecting a seal. For new equipment customers should specify MS 3106 F.

90° ANGLE CONNECTOR MS 3108 E / MS 3108 F

MS 3108 E 90° cable connectors (with 'O' ring seal with cable clamp) are used where there is limited space and where wires must be brought at abrupt angles. This connector will mate with 3100, 3101 and 3102 styles. MS 3108 F is identical to MS 3108 E except for 'O' ring under the coupling nut.

WALL MOUNTING RECEPTACLE WITH INTEGRAL CABLE CLAMP MS 3100 E / MS 3100 F

MS 3100 E or MS 3100 F wall mounting receptacles are used to carry wires through walls or bulkheads or to provide a means of disconnection at a bulkhead. MS 3100 E or MS 3100 F receptacles mate with 3106 and 3108 styles. For new equipment customers should specify MS 3100 F.

CABLE CONNECTOR WITH INTEGRAL CABLE CLAMP MS 3101 E / MS 3101 F

MS 3101 E or MS 3101 F cable connectors are used for cable extension requirements, where mounting provisions are unnecessary. MS 3101 E or MS 3101 F connectors mate with 3106 and 3108 styles.

CABLE CLAMP MS 3057 A

The MS 3057 A cable clamp is made for cable connector and receptacles that have an endbell with external conduit threads. The double clamping action provides a balanced, positive hold on the wires and greatly reduces moisture transmission. Provision is made for safety wiring. This clamp is supplied without bushing.

TELESCOPING BUSHING MS 3420

Telescoping gland bushings (used with MS 3057 - A cable clamp, & 3100, 3101, 3106, 3108 styles) keeps dirt, oils and moisture out of endbell. Taping or wrapping wires is eliminated, since bushing protects wires going through clamp. Combinations of bushing may be used to decrease cable entry diameter to improve sealing. Material is Polychloroprene.

PLASTIC PROTECTIVE CAP

Protective dust caps are designed to cover the coupling end of MS connectors where there is possibility of foreign matter accumulating on the interior of the connector or to avoid damage to the threaded parts. Material is red polythylene. Plastic dust caps can be reused, but are not intended to replace the standard aluminium dust caps.

For ordering, specify 3102/3106 shell size DC (Dust Cap).

THRU-BULKHEAD RECEPTACLE

TBF - thru-bulkhead fittings have resilient insulators. It has special double-face male and female contact construction. The TB mates with 3106 and 3108 styles.

S-750 Metric Series is designed and approved to JSS-50860 Specification by LCSO. The Connectors are based on Russian design and are fully interchangeable with the GOST specification types. To suit environmental requirements of our country, the material and finish have been standardised as given here.

Write us for further information.

SPECIFICATION: JSS - 50860
SHELL: Aluminium Alloy-O.D.
Cadmium-Passivated
CONTACTS: Copper Alloy - Silver Plated
INSERT: Polychloroprene
