

## Alarm Fuse Terminal Type AFT

**AFT** Series provides complete modular system for mounting PO44A fuses. Systems can be easily built up on TS32 rail and then fitted into cubicles, panels etc.

## Combination of System

Common Inputs  
Common Alarms  
Individual Inputs  
Individual Alarms etc.

Extra ways can be added for future extension.

The modern styles of the AFT will blend with other parts of the equipment and would enhance its appearance.

All known requirements of PO44A fuse holders have been met e.g. paint slot for rating identification/correct screw sizes. Special finish on alarm rail. More than 3 turns of thread are provided on all screws. Clamps or ring type connections can be used on the alarm or main busbar.

## Screw Clamp Connections

5A Green	043490		
6A White	043500		

A typical 3-way assembly with Common Input and Common Alarm as illustrated would be built up as follows:-

- 3 Terminal Blocks AFT 033322
  - 2 End Section AP 033302
  - 2 Support Brackets SBr 033316
  - 1 Alarm Busbar ABB 3 ways
  - 1 Main Busbar MBB 3 ways
  - 2 Busbar Connections
- Busbar connections can be made by ring crimps, etc., or by screw clamp connector type BBC 035220

Plus 3 ways of SAKR, or SAK 2.5 if required, for return connection all mounted on a suitable length of TS 32 channel.

## Note:-

Standard SAK terminal blocks can also be mounted on the TS 32 assembly rail for the +VE terminations.

We suggest:-

SAKR for disconnect connections (cross connect, using the required length of QB 25 013400, as necessary).

SAK 2.5 for feed-through connections (cross connect using the required length of QL as necessary).
