

Floodlight Product Manual

Our this LED floodlight material is of high quality ABS+Aluminum, with an ultra-high brightness light source. It has the characteristics of fashionable appearance, durability and reliability, high brightness, soft lighting, energy conservation and environmental protection.

Light fixture characteristics:

1. Good monochromatic performance, soft lighting, and high luminous efficiency.
2. Low power, low power consumption, green and environmentally friendly.
3. Low energy consumption reduces 80% compared to incandescent lamps with the same luminous efficiency
4. Durable materials with good impact resistance
5. The lamp body design is novel and unique, with modern lighting characteristics that are aesthetically pleasing

Technical parameters:	
Product name	LED floodlight
Material	ABS+Aluminum
Protection level	IP67
Light source type	LED
Installation type	Independent
Voltage	175-265V
Power	10W 20W 30W 50W 100W 150W 200W
Color rendering index	>Ra85
Average lifespan	50000 hours

Note:

There are three wires for the wiring of the floodlight, which are the live wire, the neutral wire, and the ground wire. Simply connect them and turn them on. Safety is the top priority when wiring.
