

Molveno switches have been designed with special attention to aesthetic requirements as well as practical and performance considerations. All Molveno switches carry European and North American approvals, making them suitable for virtually any market. Because of the huge range and the large number of variations, we have only shown the most popular items on this page. If you have a specific requirement - please ask for the full Molveno catalogue which includes rotary, push button, toggle, slide and lever switches. All switches are available in a range of colours and markings (if required) as well as electrical ratings and terminations.

A1 & A8 Rocker Switches

Z	Y	X
0.7 + 1.25	13 + 0.1	19 + 0.2
