1x L9110S DC Stepper Motor Driver Board H Bridge

### Description:

- \* Low quiescent current
- \* Wide supply voltage range: 2.5V-12V
- \* 800mA per channel continuous power output capability
- \* Lower saturation voltage
- \* TTL / CMOS compatible output level can be directly connected to CPU
- \* Output built-in clamp diodes for inductive load
- \* Control and drive integrated into a single IC
- \* With pin high-voltage protection
- \* Operating temperature :0-80
- \* Onboard 2 L9110S motor control chip
- \* Module can drive two DC motors or a 4-wire two-phase stepper motor

Tutorial can be found here <http://www.bajdi.com/l9110-h-bridge-module/>

\*\*\*\*\*IF YOU ARE NOT 100% HAPPY WITH THIS PRODUCT I WILL PROVIDE A FULL REFUND IF RETURNED WITHIN 7 DAYS\*\*\*\*\*

COMBINE SHIPPING

\*\*\*If you use the shopping cart spend over \$100 and pay by credit card you get FREE Freight\*\*\*

TecParts NZ LTD (Webtec) also Sell many more Electronic Parts, Arduino Accessories and components we currently have over 700 different parts

“ Seller comment: TecParts NZ Ltd (webtec) aim to have the Highest Quality products at the lowest price - If you find an identical product listed on TM at a cheaper price post a question with the listing number and I will lower the price on this auction to match NOTE !!!!! SHIPPING - we process orders the next day and ship goods on Tuesdays and Thursdays primarily by Post Haste overnight Courier but use NZ Post in areas they don't deliver, email us prior to purchase if you have specific delivery requirements. 3:58 pm, Sun 15 May

Shipping: From \$0.00

More...

I also have these listed in 2 packs and with USB cable search for " TecParts Mega 2560 "

- \* Microcontroller ATmega2560
- \* CH340 USB Chip
- \* Operating Voltage 5V
- \* Input Voltage (recommended) 7-12V
- \* Input Voltage (limits) 6-20V
- \* Digital I / O Pins 54 (of which 14 provide PWM output)
- \* Analog Input Pins 16
- \* DC Current per I / O Pin 40 mA
- \* DC Current for 3.3V Pin 50 mA
- \* Flash Memory 256 KB of which 4 KB used by bootloader
- \* SRAM 8 KB
- \* EEPROM 4 KB
- \* Clock Speed 16MHz
- \* SPI Interface
- \* I2C Interface
- \* USB interface (Used for power supply + Programming)
- \* Free USB cable included

CH340G Driver Download link : (Cut and paste link into your browser)

[https://www.dropbox.com/sh/zf3jkyv1ar1dzm/AAC3DdjbyK\\_YSnWCThoKShB7a?dl=0](https://www.dropbox.com/sh/zf3jkyv1ar1dzm/AAC3DdjbyK_YSnWCThoKShB7a?dl=0)

Note! this is a Clone Mega it is compatible with the Arduino but is not manufactured in Italy hence the cheaper price...

NOTE! Picture is indicative variations in colour and component layout can exist between batches

\*\*\*\*IF YOU ARE NOT 100% HAPPY WITH THIS PRODUCT I WILL PROVIDE A FULL REFUND IF RETURNED WITHIN 7 DAYS\*\*\*\*

# Touch Sensor Switch for Arduino / Pic

Listing #: 1083366741

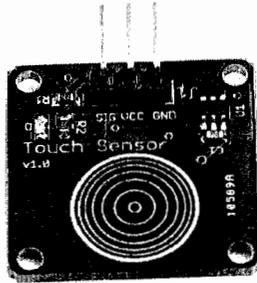

Tauranga, Bay of Plenty, NZ

View Count: 11

New item Pay Now

Closed: Mon 16 May, 7:36 am

Closing price **\$4.95**  
No reserve

1x Touch Sensor

The module is based on a touch-sensing IC (TTP223B) capacitive touch switch module. In the normal state, the module outputs a low, When a finger touches the Sensor the module output high, if not touched for 12 seconds it switches to low-power mode.

Touch works either side of PCB so can be glued onto flat surface if required.

Module can be installed behind thin plastic, glass or non-metallic materials so you can make fancy waterproof control panels or hidden switches.

**Features:**

- Low power consumption
- Power supply for 2 ~ 5.5V DC
- Four M2 screws positioning holes for easy installation

-Control Interface : A total of three pins (GND, VCC, SIG), GND to ground , VCC is the power supply , SIG digital signal output pin ;

- Power Indicator : Green LED,
- Touch area : Similar to a fingerprint icon
- Positioning holes : 4 M2 screws positioning hole diameter is 2.2mm,

\*\*\*\*\*IF YOU ARE NOT 100% HAPPY WITH THIS PRODUCT I WILL PROVIDE A FULL REFUND IF RETURNED WITHIN 7 DAYS\*\*\*\*\*

1x Motor Drive Module for Arduino and Picaxe

I also have these listed in packs of three for economical buying search for " TecParts L298N "

The L298N driver module, can directly drive two 3-30V DC motor, you can easily control the DC motor speed and direction, you can also control a 2-phase stepper motor.

Easy to use with the Arduino

- Driver: L298N Dual H Bridge DC Motor Driver IC
- Motor supply Voltage Vs: +5 V ~ +35 V;
- peak current 2A
- The logical Vss: +5 V ~ +7 V
- Control signal input voltage range:  
Low: -0.3V  
High: 2.3V
- Maximum power consumption: 20W (when the temperature T = 75 Deg C)
