

G-Talk

USB Internet Phone for Skype®

The Genius' **G-Talk** is a USB Internet phone for Skype®, designed to integrate seamlessly with the powerful Skype® software. Using **G-Talk** with Skype® reduces long distance phone bills considerably!

G-Talk not only lets you communicate with Skype users anywhere in the network world, it also provides superior sound quality (just like your home phone) with the new generation of noise-canceling technology. Two external 3.5mm jacks on the side can be used to connect your headphone and microphone, as **G-Talk** has a noise canceling extender to reduce voice static.

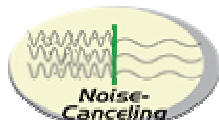

For SkypeOut subscription service, the keypad design allows you to place calls from the Skype® phone book or dial anywhere by just pressing the number keys.

Are you ready to be a professional Skyper? And reduce long distance phone bills? Just pick up the **G-Talk** and dial your friends!

Key Features

- Compatible with Skype software
- Works as a microphone and earphone with Yahoo Messenger, MSN Messenger, MS NetMeeting, etc.
- Hotkey runs Skype software as easy as dialing from a normal telephone
- 3.5mm jacks are compliant to your earphone/MIC on hand
- Echo-canceling function provides superior sound quality

The new generation of noise-canceling function provides superior sound quality just like your home phone.

3.5mm external jacks for your headphone and microphone.
