Note: Air flow, current, power, speed and sound level ratings are at nominal voltage against zero static pressure. NPEL = Noise Power Emission Level. The first character of the model name denotes housing material and mounting flange construction. (C = thermoplastic housing, closed flange, four through-hole mounting positions). Fans in this series are also available as 'B' models (thermoplastic housing with open flange, four mounting holes on the discharge side parallel to four on the inlet side). Power termination and signal options are designated by two-digit suffixes added to the model names: For color-coded 325mm power leads with stripped ends, add "-16" to the model numbers.
