

BOARD LEVEL POWER SEMICONDUCTOR HEAT SINKS

<i>Board Level Power Semiconductor Heat Sinks</i>	<i>46-76</i>
<i>219 Series Heat Sinks for TO-263 Devices</i>	<i>48-49</i>
<i>Board Level Heat Sinks for TO-220, TO-218 & Multiwatt™ Components</i>	<i>59-61</i>
<i>Universal 678 Series Vertical Heat Sink for Power Devices</i>	<i>77</i>
<i>One Heat Sink for all Packages</i>	<i>78</i>
<i>Mountain Series Heat Sinks for TO-264, TO-247 Devices.....</i>	<i>79-80</i>
<i>omniKlip™ Series Heat Sink w/ Clip(s) for TO-Devices</i>	<i>81-83</i>
<i>Additional Configurations.....</i>	<i>84</i>

A wide variety of heat dissipators with various attachment mechanisms for surface mount and thru-hole power semiconductors packaged in industry standard plastic, ceramic, and metal cases such as D2Pak, TO-220, TO-3 to TO-247, DO-4 to DO-11, multiwatt, hex-type, and stud mount devices.

BOARD LEVEL POWER SEMICONDUCTOR HEAT SINKS

217 SERIES

SURFACE MOUNT HEAT SINKS

D2PAK; TO-220; SOT-223; SOL-20

Compatible with surface mount technology (SMT) automated production techniques for ease of assembly and a variety of soldering methods, these heat sinks allow greater packaging densities and reduction in PC-board area, increasing the power dissipation of surface mount devices (SMDs) while maintaining and improving manufacturers' component thermal specifications.

FEATURES AND BENEFITS

- No interface material is needed
- Copper with matte tin plating for improved solderability and assembly
- Both the component and the heat sink are installed on the PC-board utilizing standard SMT assembly equipment for "Tape & Reel" and "Tube" formats
- EIA standards and ESD protection are specified
- Can be used with water soluble or no clean SMT solder creams or other pastes

219 SERIES HEAT SINKS FOR TO-263 DEVICES

219-263A

HEAT SINK FOR TO-263 DEVICES

Innovation in SMT compatible heat sinks to meet the needs of newer higher power SMT semiconductors. The 219 Series heat sinks unique design (Patent Pending) combines the technology of automatically assembling the tin plated solderable wires/rods with that of extruded aluminum anodized heat sink body to configure these SMT heat sinks. Rods/wires named "Rollers" are mated mechanically to the heat sink body by forging to reduce the interface thermal resistance between the drains & heat dissipation body.

FEATURES AND BENEFITS

- Increased thermal performance up to 30% over bright copper heat sinks from improved radiation of the black finish.
- Increased surface areas by 3 times therefore thermal performance up to 300% over the aluminum stamped heat sinks on markets.
- Light weight aluminum construction allows faster pick and place assembly reducing the manufacturing cycle time.
- Radius mounted "Rollers" are designed for maximizing heat transfer from component and to avoid "bottle neck" heat transfer like the Aluminum stamped heat sinks.
- Available in bulk packaging or Tape & Reel.

COMPACT WAVE-SOLDERABLE LOW-COST
HEAT SINKS

TO-220 and TO-202

Mounting tabs are pre-tinned to ensure excellent wave-solder bond and good electrical connections for vertical mounting of TO-220 and TO-202 semiconductor packages. These heat sinks are designed for use where minimum PC board space is available. The 288-1AB is a stamped aluminum heat sink, black anodized, designed for applications requiring good heat dissipation from a heat sink occupying minimum space, available at minimum cost.

SMALL FOOTPRINT LOW-COST HEAT SINKS

TO-220 and TO-202

These exceptionally low-cost heat sinks can be mounted horizontally under a TO-220 or TO-202 case style with a maximum height of only 0.375 in. (9.4). For added performance, a 271 Series heat sink can also be used for double-sided heat dissipation. The 270-AB and 280-AB accept one power semiconductor; the 272-AB is designed for two power semiconductors. Specify solderable tab options for the **272 Series** by the addition of suffix "01" or "02" to the standard part number (i.e. 272-AB01 or 272-AB02).

260-4T5E	Epoxy Insulated	0.370 (9.4) x 0.380 (9.7) dia. x 0.290 (7.4)	0.0024 (1.09)	TO-5
260-4TH5E	Epoxy Insulated	0.400 (10.2) x 0.370 (9.4) hex. x 0.290 (7.4)	0.0031 (1.41)	TO-5
260-6SH5E	Epoxy Insulated	0.557 (14.1) x 0.370 (9.4) hex. x 0.290 (7.4)	0.0037 (1.68)	TO-5
Materials and Finish: Cups – beryllium copper, black ebonor “C”; Bases – brass, black ebonor “C”				

Base Mounting Configurations — TO-5

Plain Type — Epoxy bonded, or used with #4 pan head screws.

Tapped Base — #4-40 UNC screw (not supplied) fits tapped hole. Care should be taken not to use too long a screw, which could short against the semiconductor case. For correct screw lengths:

Correct Screw Length (L) = $\frac{\text{Depth of Base}}{\text{Panel Thickness}} + \frac{\text{Washer Thickness}}$

Stud Mounting Base. #6-32 UNC. Nuts and washers not supplied. Stud hole must be slightly countersunk to ensure flat mounting.

To determine the correct mounting screw lengths, add dimensions as follows:

Correct Screw Length (L) = $\frac{\text{Depth of Base}}{\text{Panel Thickness}} + \frac{\text{Washer Thickness}}$

Diodes

THERMAL LINKS FOR FUSED GLASS DIODES

258 SERIES

The thermal resistance from diode leads to chassis or heat sink is 12°C/watt, when unit is mounted with TYPE 120 Joint Compound. If a 10°C/watt chassis or sink to ambient impedance is available, the thermal resistance from the diode leads to ambient is reduced from about 150°C/watt to 22°C/watt.

Standard P/N	Dimensions in. (mm)	Material	Finish	Weight lbs. (grams)
258	0.500 (12.7) x 0.250 (6.4) x 0.340 (8.6)	Aluminum	DeltaCoate™ 151 on all surfaces except solder pads and base	0.0018 (0.82)

634 SERIES

SLIM PROFILE UNIDIRECTIONAL FIN VERTICAL MOUNT HEAT SINK

TO-220 and TO-218

These slim profile unidirectional fin heat sinks offer users two assembly alternatives for vertically mounting TO-220 and TO-218 components. Models are available with or without wave-solderable pins on 0.40 in. (10.2) centers, making them ideal for a variety of applications where quick assembly is needed and space is at a premium.

Standard P/N		Height Above PC Board in. (mm)	Footprint Dimensions in. (mm)	Weight lbs. (grams)
Plain Pin	Without Pin

Material: Aluminum, Black Anodized.

MECHANICAL DIMENSIONS

TYPICAL THERMAL PERFORMANCE FOR 634-15ABP

NOTES:

- Thermal compound is assumed between device and heat sink.
- Tab temp with longer heat sink (634-20ABP) will typically be about 15% cooler. Tab temp with shorter heat sink (634-10ABP) will typically be about 25% higher.

BOARD LEVEL POWER SEMICONDUCTOR HEAT SINKS

292 SERIES HEAT SINK FOR SINGLE TO-92

TO-92

Power semiconductors packaged in a TO-92 style plastic case can be cooled effectively at little additional cost with the addition of the 292-AB heat sink. The 292-AB is effective over the typical power range of such devices.

Standard P/N	Height Above PC Board in. (mm)	Overall Fin Width in. (mm)	Thermal Performance Natural Convection	Finish	Weight lbs. (grams)

HIGHEST EFFICIENCY/LOWEST UNIT COST
HEAT SINKS

690 SERIES

TO-3; TO-66; TO-220

These low-cost heat sinks provide the most power dissipation at the lowest unit cost and are available in three standard types to mount and cool one TO-3 or TO-66 metal power semiconductor type or two plastic package TO-220 power semiconductor types. For higher power semiconductors, the **690 Series** can dissipate up to 20 watts while maintaining a mounting surface temperature rise above ambient air temperature of no more than 91°C.

CONVECTION CHARACTERISTICS

MAXIMUM EFFICIENCY OMNIDIRECTIONAL
HEAT SINKS

680 SERIES

TO-3; TO-220

Achieve optimum natural convection cooling per unit volume occupied above the printed circuit board for TO-3 (one semiconductor package per heat sink) or for two TO-220 style cases, when this low-cost heat sink is used. Any mounting attitude will provide free circulation of air in natural convection applications. These **680 Series** heat sinks can also be specified without any semiconductor mounting hole pattern by specifying suffix "K" (Example: 680-5K).

678-39-S & 678-39-C

Wakefield-Vette introduces **Universal 678 series**, high performance, low cost and versatile heat sink with screw or clip for all kinds of standard packages. This type of heat sink provides both vertical and horizontal mounting options on PCB to accommodate natural and forced convection cooling method.

SPECIFICATIONS

- **Heat Sink:** Aluminum Alloy 6063-T5 or Equivalent with either degreased or black anodized finish
- **Spring Clip:** Music Wire, Per ASTM A228 with bright nickel plating
- **Solder Foot:** Cold-rolled Steel, Per ASTM A-366 with pure tin over copper strike. RoHS compliant.
- **Insulator (Optional):** t-Global H48-1, L37-3F and H48-6S. The thickness of the insulating material not to exceed 10 mil (0.01").

FEATURES AND BENEFITS

- **Minimum assembly cost and labor** - Spring Clips make the mounting holes and fasteners obsolete in assembly operations & reduce costs.
- **Design Flexibility** - Universal mountable and “one fits all” give designers total freedom to fit their packaging designs with ideal device pack style and to orient the heat sink to meet their power dissipations with optimized cooling method. (see page 7 of data sheet).

Part Number	Description	Length	Width	Thermal Resistance @ Forced Air Flow
678-39-S	Universal Heat Sink for TO Devices w/Screw Hole, Black Anodize	1.520" (38.61mm)	2.362" (60.00mm)	0.6°C/W @ 600 LFM
678-39-C	Universal Heat Sink for TO Devices w/ Clip, Black Anodize	1.520" (38.61mm)	2.362" (60.00mm)	0.6°C/W @ 600 LFM

ONE HEAT SINK FOR ALL PACKAGES

CPC40055ST PACKAGE

Board level – 2 solder pins Natural convection – Vertical Spring Clip

CPC1998J PACKAGE

Board level – 2 solder pins Natural convection – Vertical Spring Clip

CPC1968 AND TO-264 PACKAGE

Board level – 2 solder pins Natural convection – Vertical Spring Clip

KBU PACKAGE

Board level – 2 solder pins Natural convection – Vertical Spring Clip

L4970A PACKAGE

Board level – 2 solder pins Natural convection – Vertical Screw attachment

TO-247 AND TO-220 PACKAGE

Board level – 2 solder pins Natural convection – Vertical Screw attachment or Spring Clip

SOT-227 PACKAGE

System level – 2 screws Natural convection – Vertical

MOUNTAIN SERIES HEAT SINKS FOR TO-264, TO-247 DEVICES

MTN-264-27

Wakefield-Vette's **Mountain Series Heat Sinks** are high performance, low cost, configurable, scalable and compact with a matrix clip system for TO220, TO-247, TO-264 and other standard packages. This type powerful heat sink provides easiest assembly, largest surface areas, smallest space occupation and all-in-one solution. The power dissipations can be easily increased simply by extending the fin height on each side of the heat sink, while keeping the heat sink height and PCB layout the same. It is the ideal type of heat sink for high power density and small size (1U or 2U) electronic packaging with forced convention cooling.

FEATURES AND BENEFITS										
• Minimum assembly cost and labor - Spring Clips make the mounting holes and fasteners obsolete in assembly operations and reduce costs. • Maximum Thermal Transfer - Maximum surface area per unit volume, efficient cooling fins & consistent mounting force reduces thermal resistance.					• Maximum Repeatability - Constant spring force over repeated assembly/disassembly. • Maximum Reliability - Resilient spring action locks electronic component in place. Fewer parts in assembly and no fasteners and washers required. Prevent short circuit by eliminating metal particles generated from hardware or thread tapping.					

Part Number	Description	Type	Package Cooled	Attachment Method	Length	Width	Height Off Base (Height of Fin)	Thermal Resistance @ Forced Air Flow	Material	Material Finish
MTN-264-27	Heat Sink w/ Two Clips for TO-247 TO-264	Top Mount	TO-247 and TO-264	Clip and PC Pin	1.06" (27mm)	1.740" (44.3mm)	1.56" (39.5mm)	5.5°C/W @ 18 Watts	Aluminum	Black Anodized

omniKLIP™ SERIES HEAT SINK W/ CLIP(S) FOR TO-DEVICES

HEAT SINKS OMNI-CLIP-18-L SERIES

omniKlip™

The Wakefield- Vette **omniKlip Heat Sink Series** are a configurable and patented (Pat. Pending) high performance, low cost and compact solutions for TO-220, TO-247 and TO-264 , or similar packages. This powerful heat sink provides tool and fixture free assembly operation, largest surface areas and smallest space occupation. It is the ideal type of heat sink for high power density and small size (1U or 2U) electronic packaging with forced convention cooling.

SPECIFICATIONS
• Heat Sink: Aluminum Alloy 6063-T5 or Equivalent with black anodized finish. • Spring Clip: Music Wire, Per ASTM A228 with bright nickel plating • Solder Foot: Cold-rolled Steel, Per ASTM A-366 with pure tin over copper strike. RoHS compliant.

FEATURES AND BENEFITS
• Minimum assembly cost and labor - Spring Clips make the mounting holes, fasteners, tools and fixtures obsolete in assembly operations & reduce costs. • Maximum Repeatability - Constant spring force over repeated assembly/disassembly • Maximum Reliability - Resilient spring action locks electronic component in place. Fewer parts in assembly and no fasteners and washers required. Prevent short circuit by eliminating metal particles generated from hardware or thread tapping • Design Flexibility - Maximum flexibility for dynamic device locations and power up grading. <i>"Configure-to-Fit"</i> gives designers total freedom to configure heat sink needed to fit their dynamic design environments.

OMNIKLIPS™

Part Number	Description
OMNI-UC	Universal Clip for omniKlip Heat Sink for any TO except TO220
OMNI-220C	Clip for omniKlip Heat Sink for TO 220

Universal Clip mechanism is rotating the bar by 180°. The eccentric circle will raise 0.09". This deformation will exert the force on the components.

omniKlip assembly model in ANSYS, with 18 lbf load applied to the clip

Under the 18 lbf, the clip deformed 0.09" from its original position to the final

Directional deformation plot as shown.

With the FEA analysis and simulation, the force applied to the TO-series components will be at least 18 lbs.
