

ST-1000U/D

INSTRUCTIONS

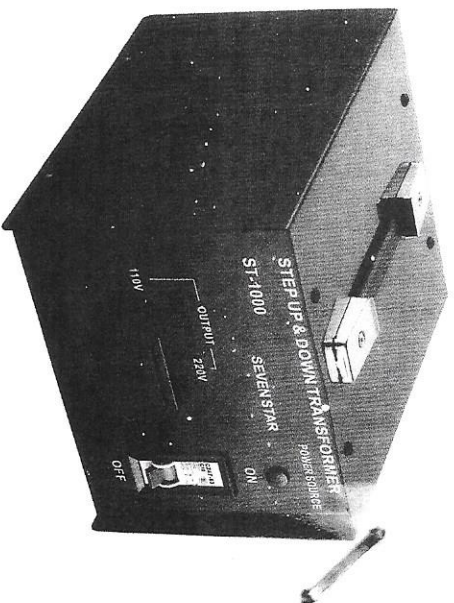

- On back of the transformer. Select input voltage according to country of use.
 - At 110 volts countries such as USA, set the input voltage switch to 110 volts.
 - At 220 volts countries in Europe, Middle East, Asia, Africa, etc., set the input voltage switch to 220 volts.

High Humming sound may be heard if set incorrectly, disconnect immediately.

- After selecting the correct input voltage on the Back of the transformer, push ON/OFF switch to the ON position.
- Check the watts on your equipment to make sure you are not exceeding the max watts of the converter. Please remember to multiply the watts consumption of your equipment by 2-5 times to account for voltage spikes when you first turn the equipment on. Please call the retailer you are purchasing from for more information.
- Do not let it be over the maximum capacity of the transformer.*
- Turn off when not in use.

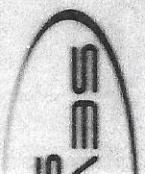

CAUTION

Make sure the wattage and voltage of your appliance or equipment and the wattage of transformer is suitable for your appliances or equipment before you connect the transformer. Custom made in China exclusively for Seven Star®

220V/240V ↔ 110V/120V
