TELEPHONE LINE SHARING Solutions for Businesses & Home offices of all sizes.

OPERATE any FAX and/or MODEM on any VOICE line, with or without FaxAbility.

As New Zealand's Line Sharing Company, we are pleased to be able to provide you with separate solutions or technologies, in order to meet your fax or modem reception requirements on any voice line. SAME NUMBER line sharing will allow you to automatically receive fax and/or modem calls that are sent to you on your normal

FAXMATE

Choose our low cost **FAXMATE** device when you wish to use your existing fax machine or modem with the new Telecom FaxAbility service. Diverts calls made to your new fax number direct to your fax device and calls to your other number to your telephone. Connects in minutes to ANY telephone socket.

Provides Basic FaxAbility operation by analysing the first ring of all incoming calls and switching the incoming call to the attached fax device when FaxAbility ring (Distinctive Ring) is detected

Suitable for MOST, but not all Fax Machines and Modems. Please call ph (09) 478 2323, for suitability details on your fax machine or modem.

Our Code **FAXMATE**
Price **\$92.16**

VOICE- FAX

Choose either **EASY-CONNECT PLUS** or **EASY CONNECT JR** for no compromise fax reception on any voiceline! Integrate any fax (or modem) into any telephone line using your existing number and/or a FaxAbility number. No special wiring, any device at any location. **EASY-CONNECT Jr** Provides enhanced FaxAbility operation. Will allow ALL fax machines and modem equipment to operate with FaxAbility. Provides same number operation for fax machines or voice modems with integral answering machine, or where an answering machine is not used.

Our Code **EZCJNR**
Price **\$129.94**

VOICE- FAX

EASY-CONNECT Plus Provides enhanced FaxAbility operation. Will allow ALL fax machines and modem equipment to operate with FaxAbility. Provides same number operation for fax machines or voice modems with integral answering machine, or where an answering machine is not used. Provides same number operation for users of fax machines or modems where a separate answering machine is used. Completely automatic and transparent operation, without compromise.

Our Code **EZCPLUS**
Price **\$163.52**

VOICE- FAX - MODEM

Choose **EASY-CONNECT PRO** for no compromise fax and modem reception on any voice line! Automatic voice, fax and modem, all on one line using your existing number and/or a FaxAbility number and/or distinctive ringing number. Scanning facility allows your fax to be used as a scanner for your PC.

Provides all facilities of the **EASY-CONNECT PLUS** and allows operation of a separate fax device AND also a separate modem device, on one line. Provides for operation of 1, 2 or 3 numbers on one line. Completely automatic and transparent operation, without compromise. Uses the Telecom NZ distinctive ringing number service for direct dial in access to your modem device. Provides our Scan-Link facility, which will allow your fax machine to be used as a scanner or printer for your PC, when used with your modem.

Our Code **EZCPRO**
Price **\$201.30**

OPERATE your MODEM, MULTIPLE MODEMS, or your EFT-POS on your FAX LINE

The use of modem equipment has become an everyday requirement in many businesses. However in most cases, use is infrequent and calls are often outgoing only. **AUTO-CONNECT** will allow an outgoing only modem to share an existing fax line. Incoming calls are received by the fax machine as normal. Both devices can dial out. Modem can receive fax calls whenever the fax machine is switched off. For multiple outgoing devices, **AUTO-SELECT JR** will allow up to 8 devices to

share one line (Two devices per unit). **FMX PRO** provides for both **INCOMING & OUTGOING** data and fax calls. **AUTOSELECT** will allow up to eight devices to share a single line for incoming and outgoing calls. Up to four **AUTO-SELECT** or **AUTOSELECT JR** devices can be fitted to one line, to meet individual requirements. Exclusion facility is provided with all products to ensure that only one device can have access to the line at one time.

AUTO MODEM RECEPTION

Choose **FMX-PRO** when you wish to fit a modem to your fax line and the modem also needs to receive data calls.

Directs fax calls to your fax and data calls to your modem. Barge-in protection is provided to prevent one device interrupting the other while it is in use.

Our Code **FMXPRO**
Price **\$201.30**

OUTGOING MODEM or EFT-POS

Choose **AUTO-CONNECT** when you wish to fit a modem or EFT-POS unit to your fax line to make **OUTGOING** calls. Provides automatic connection on dialling. Other device is then locked out. Ideal for connection of payphones, modems and EFT-POS to any fax, key phone system, PABX or any type of Telephone line.

Our Code **ACONNECT**
Price **\$129.94**

MULTIPLE MODEMS

Choose **AUTO-SELECT** when two or more modems need to be connected to a fax or dedicated modem line. Fit up to eight modems, or seven modems and one fax to the same line. Incoming calls are automatically routed to any device. Barge-in protection is provided.

AUTO-SELECT JNR For out-going modem or EFT-POS use on an existing fax line. Two outgoing devices per unit. Up to 4 units per line.

Our Code **ASELECTJNR**
Price **\$140.43**

AUTO-SELECT is ideal for use where two or more modems are required to share the same line, with or without a fax machine, and where all devices send and receive.

Our Code **ASELECTSTD**
Price **\$201.30**

IMPROVE the EFFICIENCY or PROFESSIONALISM of any ordinary TELEPHONE LINE

MUSIC OR MESSAGE ON HOLD FACILITY FOR ANY LINE

MOH1 model provides Music/Message on Hold capabilities for Single Lines, using your normal telephones, just as if you were using a PABX or KEY telephone system. It also works with all telephone extensions fitted to the line. **EASY-INSTALLATION**, just connect it direct to any telephone socket on the line, then connect any audio source to it using a Line Isolation transformer. **MOH2** model has all features of above model and in addition provides a Ring Back Reminder facility,

every 15 seconds, to remind the user that there is a call on hold. **MOH-PRO** has the ability to ANSWER incoming calls after 4,6 or 8 rings and connect the call direct to the Music or Message Source. The call can then be retrieved at any time by simply answering any telephone connected to the same line.

Our Code **MOH1**
Price **\$163.52**

Our Code **MOH2**
Price **\$201.30**

Our Code **MOHPRO**
Price **\$236.98**

DOOR STATION FOR ANY LINE

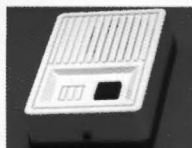

Will allow you to connect all of your existing telephones to a Door Phone (see below) fitted at your front door or gate. Then whenever a visitor presses the call button, the Line Sharer will ring all of the telephones (even if you are on the line) with a special pattern. You can then communicate with your visitor by simply answering any telephone. If you are already on the phone, a 'call interrupt' facility will alert you by superimposing a ring tone into the background of your

conversation and you can switch to the gate by pressing your # key. You can even open the gate by pressing * and then return to your call. Requires professional installation. Open/Release gate mechanism is not included.

TWO LINE SELECTOR

This intelligent and highly programmable unit can be used to connect two separate telephone lines to one Telephone, Fax Machine, Modem or any other telephone device. It will accept incoming calls on either line and will allow you to automatically select either line to make outgoing calls. It is ideal for applications where one important device needs to connect to two separate telephone line sources.

Our Code **LINESEL**
Price **\$163.52**

HIGH QUALITY INTERCOM SYSTEM

INTERPHONE provides LOUD, CLEAR Telephone Quality INTERCOM communication between any two telephones or telephone devices, which can be up to several kilometres apart. Simply lift one telephone receiver and INTERPHONE will RING the other device until they answer. Operation is bi-directional. Uses ordinary telephone wire and a 12VAC power pack. The **INTPHPRO1** provides INTERCOM communication between 2 to 64 telephone devices. Simply dial 01 -

64 (DTMFonly) to dial any other telephone device. Does not connect to a Telecom Line. Requires ONE talk battery unit (supplied with each system).

Our Code **INTPHPRO1**
Price **\$165.59**

DIGITAL MESSAGE CENTRE FOR MESSAGE ON HOLD

HIGH QUALITY royalty free generic or customised digital message for new installations or as a direct 'plug in replacement' for a radio or CD player already connected to any PABX or key phone system. Two Versions available: Playback only & Record/Playback option.

DMC is supplied complete with a pre-recorded, royalty free, 4 or 8 minute GENERIC MESSAGE, which is suitable for all businesses. A CUSTOMISED MESSAGE, prepared specifically for your business by

one of the many message production companies which utilise our equipment, can also be produced for you (for an additional charge). Existing radio on hold users can install this unit themselves by simply plugging it in place of the existing radio. Also available is Record/Playback model (DMCR), so you can record your own messages and alter when the need arises. Also available is a Remote Start model (DMC4R) which can be started by a trigger switch (door opening).

Price **\$8.40**

TALKING DISPLAY UNITS for POINT of SALE, MARKETING & TOURIST CENTRES

TDU will play 1 or more pre-recorded messages as soon it is triggered by a movement sensor, a switch, or at a preset time interval. Ideal for Product Promotions, Product Information, Message Warnings etc. The **TDU** is a completely solid state (no moving parts) mp3 based Digital Voice Message player, which is designed for Retail Messaging use. Message Applications include: Product Promotion, Product Information, Message Warnings or any other message application which requires high quality, high reliability message output up to 4 hours in duration. The **TDU** plays its Message as soon as it is triggered by one of 12 sensors which are connected to it. The full recorded message is then output through a speaker attached direct to the **TDU**, or through an existing in store speaker system. Further triggering after the message is complete will cause the full message to play again, or if additional alternative messages have also been recorded onto the removable MMC card, then they will each play, one at a time. Each sensor triggering will cause one message to play. Once all messages have been played, then the

TDU will again start with the first message. The **TDU** can be triggered by an inexpensive Infra Red Movement (PIR) sensor as used with security equipment, or any push button switch or a wide range of other sensors. Sensors for use with the **TDU** need to be "normally closed" and also need to be modified with a current limiting modification. Sensors can be located up to 100m from the **TDU** unit, or greater than 100m from the **TDU** if low resistance wiring is used. A wide range of 8 ohm speakers can be used with the **TDU** in order to meet individual customer requirements. Unpowered 8 ohm speakers can be used for localised messaging in small areas. Powered 8 ohm speakers can be used for medium sized areas and amplifiers can be used to power large areas. An unlimited number of messages can be recorded on to the **TDU**'s MMC card, up to the full time limit that is available. The full time limit of the MMC card does not need to be used.

TALKING DISPLAY UNIT

TDU will play 1 or more pre-recorded messages as soon it is triggered by a movement sensor, a switch, or at a preset time interval. Ideal for Product Promotions, Product Information, Message Warnings etc.

MULTIPLE INPUT UNIT FOR USE WITH TALKING DISPLAY UNIT

MIU allows for up to 12 separate movement sensors or switches to be connected to the **TDU**. Each sensor triggers its own unique message, output via any 8 ohm unpowered, powered or amplified speaker. The new **MULTIPLE INPUT UNIT** will allow up to 12 separate sensors to be connected to the one Talking Display Unit (**TDU**). The **TDU** can then play one of up to 12 separate messages, held in its memory, depending on which sensor has been triggered. Each sensor triggers its own message. i.e. Sensor 1 when triggered will cause Message 1 to play. Sensors for use with the **TDU** need to be "normally closed" and also need to be modified with a current limiting modification. An optional in line current limiting adaptor is available for those customers wishing to supply their own normally closed switches or sensors. Sensors can be located up to 100m from the **TDU** unit, or greater than 100m from the **TDU** if low resistance wiring is used. The remote sensors connect to the **MIU** via a female 25 pin D type connector. Each sensor has been allocated a specific pin position. While the **TDU** is playing a message, the **MIU** will continue to detect further triggering by the attached sensors and can hold in buffer up to 10 separate further triggers. Then when each message is complete, the **MIU** will instruct the **TDU** to play the message corresponding to the next triggering action. The **TDU** can only play one message at one time. Communication between the **MIU** and the **TDU** is achieved via a single 2 pair telephone cable, which is supplied with the **MIU**. There is no need for any other external connections.

MIU4 allows for up to 4 separate movement sensors or switches to be connected to the **TDU**. Each sensor triggers its own unique message, output via any 8 ohm unpowered, powered or amplified speaker.

Our Code **MIU4**
Price **\$163.52**

MIU8 allows for up to 8 separate movement sensors or switches to be connected to the **TDU**. Each sensor triggers its own unique message, output via any 8 ohm unpowered, powered or amplified speaker.

Our Code **MIU8**
Price **\$201.30**

MIU12 allows for up to 12 separate movement sensors or switches to be connected to the **TDU**. Each sensor triggers its own unique message, output via any 8 ohm unpowered, powered or amplified speaker.

Our Code **MIU12**
Price **\$236.98**

SPEAKER SWITCHING UNIT FOR USE WITH THE TALKING DISPLAY UNIT

SSU allows for up to 12 separate speakers to be connected to the **TDU** so that each sensor triggers its own separate message, output on its own separate speaker. Background music can be played at all other times. The new **SPEAKER SWITCHING UNIT**, which is designed to operate with the **MIU** and the **TDU**, will also allow up to 12 separate 8 ohm speakers to be connected to the one Talking Display Unit (**TDU**), in conjunction with up to 12 separate sensors. This complete system then provides for 12 independent and separate "zones" each with its own message and local speaker. i.e. Sensor 1 when triggered will cause Message 1 to play on speaker 1. Speakers can be located up to 100m from the **TDU** unit, or greater than 100m from the **TDU** if low resistance wiring is used. The remote speakers connect to the **SSU** via a female 25 pin D type connector. Each speaker has been allocated a specific pin position. Power for the **SSU** and communication between the **SSU** and the **TDU** is achieved via a single 2 pair telephone cable, which is supplied with the **SSU**. There is no need for any other external connections.

SSU4 allows for up to 4 separate speakers to be connected to the **TDU** so that each sensor triggers its own separate message, output on its own separate speaker. The remote speakers connect to the **SSU** via a female 25 pin D type connector. Each speaker has been allocated a specific pin position.

Our Code **SSU4**
Price **\$163.52**

SSU8 allows for up to 8 separate speakers to be connected to the **TDU** so that each sensor triggers its own separate message, output on its own separate speaker. The remote speakers connect to the **SSU** via a female 25 pin D type connector. Each speaker has been allocated a specific pin position.

Our Code **SSU8**
Price **\$201.30**

SSU12 allows for up to 12 separate speakers to be connected to the **TDU** so that each sensor triggers its own separate message, output on its own separate speaker. The remote speakers connect to the **SSU** via a female 25 pin D type connector. Each speaker has been allocated a specific pin position.

Our Code **SSU12**
Price **\$236.98**

AUDIO SWITCHING UNIT FOR USE WITH THE TALKING DISPLAY UNIT

ASU allows the **TDU** to be connected to any existing PA or Background Music system. The existing PA or Background Music system is then muted whenever a **TDU** message is broadcast and then reconnected when finished. The new **ASU** will allow the **TDU** to share the amplifiers and speakers used in an existing in store background music system. The **ASU** will automatically detect and connect the start of the **TDU** message to the in store speaker system and simultaneously remove the existing background music feed. The background music will then be automatically restored at the end of the message. The **ASU** is supplied with two standard plug in 3.5mm audio inputs and one standard plug in 3.5mm audio output. The **ASU** unit must be connected ahead of any amplifiers used for the existing in store background music system. Power for the **ASU** and communication between the **ASU** and the **TDU** is achieved via a single 2 pair telephone cable, which is supplied with the **ASU**. There is no need for any other external connections. The **ASU** unit can also be used in conjunction with the **MIU** to allow up to 12 separate sensors and messages to play via the existing in store background music system.
