MANUFACTURERS OF POWER, AUDIO, AND INSTRUMENT TRANSFORMERS

August 1979.

Dear Sir,

Due to our increasing involvement in large quantity sales through National Wholesalers, we have had to reconstruct our previous pricing structure. We have therefore produced a new price list which will show "Trade" (or "Counter") prices from which Wholesale discounts will be given.

As well as the basic discounts, extra incentive is given for increased quantities, as increased production efficiency is the only way in which we can make cost savings.

Incorporated in these prices is an increase unfortunately forced on us by recent major cost increases, mainly in Electrical Steel and Laminations.

In view of your previous purchasing history with us, it is our intention to put your Company directly into the "Major Wholesaler/Manufacturer" group in which you will automatically receive a discount of 20% on all stock lines, even in small quantities.

The following discount structure will therefore apply to all catalogue items.

For Transformers 450VA and below.

<u>Quantity.</u>	<u>Discount.</u>
1 - 9	20%
10 - 24	25%
25 - 99	30%
100 up	35%

Above 450VA (including Varitrans, Welder Transformers, and Motor starting Transformers.).

<u>Quantity.</u>	<u>Discount.</u>
1 - 4	20%
5 - 9	25%
10 - 24	30%
25 up	35%

Yours faithfully,  
Transformer Winders Ltd.,
