Instructions

Product name: CAT8 Ethernet Cable

Models: CAT8E

Bandwidth: 2000MHz

Data Transfer Speed: 40Gbps

Conductors: 26 AWG Stranded Bare Copper

Connectors: Gold-Plated RJ45 (8P8C)

Wiring Standard: 568B

Item Diameter: 0.21 Feet

Compatible Devices:Television, Router, Personal Computer, Modem, Printer

Product characteristics

1. Cat8 ethernet cable supports bandwidth up to 2000MHz and up to 40Gbps data transmitting speed, making it the fastest network cable standard available today.

2. Cat8 internet cable is made of 4 shielded foiled twisted pair (S/FTP) and multi-stranded OFC wires (26AWG) with a gold plated RJ45 connector on each end.

3. Cat8 ethernet cable is designed with round network cable, easy to carry and network cabling. Cat8 lan cables are made of environmentally friendly PVC material, which is waterproof and UV resistant. Suitable for outdoor and indoor use.

4. 50 micron gold plated contact pins in each shielded RJ45 connector are ideal for use in high-noise environments where shielding helps. Pass Fluke test.

5. Cat8 network cabler is ideal for networking switch, routers, ADSL, adapters, hubs, modems, PS3, PS4, Xbox, patch panels, servers, laptops and more. And compatible with Cat7, Cat6, Cat6e, Cat5, Cat5e.
