## GAISIA

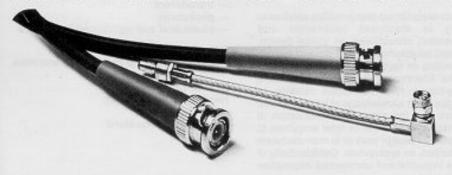

## Coaxial cables with fitted connectors

Test and Instrument leads with clips and probes. Adaptor and entenda leads to order.

Completed lead-assemblies are part of the comprehensive CASA delivery programme. Any combination to client specifications can be produced in solder or crimping technique. In addition specific requirements can be met, e.g. cable markings and colour coding, reflection measurements (VSWR) on a completed lead assembly with relevant test certificates etc. (We also manufacture multiconductor cable assemblies and harnesses).
