## Applications Communication Masts & Antennae

### CASE STUDIES

Antennae Support Guys  
Canada

Antennae Support Guys  
HMS Forest Moor, UK

Suitable products

### PARAFIL® in Communication Masts and Antennae

The first applications for PARAFIL® ropes were in the antenna and electrical industries. PARAFIL® is used in insulating guys, catenaries and support systems where PARAFIL'S high tensile strength and insulating properties along with resistance to UV radiation ensures a long and virtually maintenance-free life.

The use of PARAFIL® in these areas has now been extended across the world. In each instance tailor-made PARAFIL® ropes and specially designed terminations are produced to meet each specific customer's needs – no system is too complex for PARAFIL®.
