Corel Product Profile

COREL® LINUX® OS

Unique Selling Proposition

Corel® LINUX® OS is an easy-to-use, powerful operating system specially designed for your desktop computer. It's easy to install, easy to use and easy to configure. Corel LINUX comes complete with a simple four-step graphical installer, a Windows®-like desktop environment and a newly developed file manager. It comes bundled with Corel® WordPerfect® 8 for Linux and other value-added components.

Byline

Linux Power—Built for the Desktop™

Target Market

Primary – This product is aimed at technology enthusiasts and current Linux® users. These customers love to explore the latest technology and play with the newest applications. They appreciate an alternative operating system that is both powerful and stable.

Secondary – Customers looking for an inexpensive computer solution. These users typically want a second desktop computer to browse the Web.

Catalogue Copy

Experience Linux power designed specifically for the desktop with Corel® LINUX® OS, the Debian-based operating system that combines renowned Linux performance and stability with intelligent simplicity. Featuring an incredible four-step graphical installer that automatically detects most PCI hardware, Corel LINUX OS is easy to install and easy to configure. Enjoy a drag-and-drop environment and easy-to-use graphical Control Center with the enhanced, KDE-based Corel Desktop. Access local and network drives *and* the Internet with an innovative browser-style file manager, and easily obtain system updates over the Web.* With outstanding file compatibility and network integration, Corel LINUX OS is an exciting development in operating system evolution.

Corel's Competitive Advantages

- ***Brand name*** *– Corel and WordPerfect have excellent brand name recognition. Plus, there have been over 1.5 million download requests for Corel WordPerfect 8 for Linux*

- ***Applications*** *– Corel is committed to being a Linux leader and plans to bring all of its major business and consumer applications over to Linux. These include WordPerfect Office suites, CorelDRAW®, Corel PHOTO-PAINT® and Paradox®*

- ***Retail experience*** *– Corel has over 10 years of retail channel experience*

- ***Product value*** *– Corel has built extra value into the open-source technology found in other Linux operating systems*
