A driver that can put you on the fast track: the Konica Minolta Universal Printer Driver.

COUNT ON KONICA MINOLTA

YOU'RE A BUSINESS MANAGER USING MULTIPLE MFPS WITH VARYING SPEEDS AND OUTPUT CAPABILITIES – INCLUDING A MIX OF LEGACY AND STATE-OF-THE-ART EQUIPMENT. OR YOU'RE A MOBILE PROFESSIONAL MOVING BETWEEN BRANCH OFFICES, LOOKING FOR THE RIGHT OUTPUT DEVICE FOR YOUR REPORT. OR YOU'RE AN IT PROFESSIONAL WITH A GROWING WORKLOAD, TRYING TO HANDLE MORE DEVICES IN LESS TIME.

KONICA MINOLTA HAS A POWERFUL NEW PRINT SOLUTION THAT CAN SERVE ALL THESE SITUATIONS – AND SPEED PRINT PRODUCTIVITY AS IT REDUCES ADMINISTRATIVE COSTS.

Select, Set Up and Print: one Universal Printer Driver does it all.

A printer driver that gets you there faster.

Konica Minolta's Universal Printer Driver eliminates the need to access printer drivers on each device. One common interface handles printer selection throughout your network, automatically detecting and identifying printers and MFPs. You can select your printer by device type, color or monochrome printing, 2-sided printing capability and 11" x 17" printing – a capability that no other universal print driver currently offers.

The Universal Printer Driver automatically loads the correct print driver set for each model: Emperon® PCL/PS drivers for Konica Minolta devices using the powerful Emperon Print system, and PCL6/PCL-XL (2.1 or later) and PostScript (level 3) drivers for compatible 3rd-party devices.

Universal Printer Driver: this example of the bizhub C652 driver shows "MyTab" print settings – the quick and easy way for individuals to save and access customized printer settings.

Making network printers even more powerful.

Leveraging the output speed and finishing power of your bizhub® MFPs as well as magicolor®, pagepro® and 3rd-party networked devices, Konica Minolta's Universal Printer Driver drives the process with effortless ease. You'll see detailed information on each device – including name, location, output speed, IP address, MAC address, model number, color or monochrome capability, and PDL (Printer Description Language) supported.

And when you're ready to print, the latest Konica Minolta devices give you another time-saving feature to speed your output: the industry award-winning convenience of MyTab™ printing, allowing individuals to create a customized tab that saves their preferred print settings for quick access.

Automatic detection of networked devices.

With a simple Network Search command, the Universal Printer Driver detects and identifies all the devices on your network.

You'll see individual printers represented by icons and text descriptions, with the key information listed in your MIB – model name, output speed, location and IP address. Advanced search settings allow you to narrow your search for types of printers, color capability, 2-sided or 11" x 17" printing capabilities.

Multiple printer drivers in one simple solution.

The Universal Printer Driver combines multiple print drivers to meet the needs of even complex networks comprising new and legacy devices from several manufacturers. Individual Child Drivers connect to model-specific Konica Minolta MFPs. Common Child Drivers connect to other Konica Minolta models and 3rd-party devices.

Most recent Konica Minolta MFPs will enjoy full print functionality. Older Konica Minolta devices and 3rd-party printers will have basic functionality. And all devices will benefit from automatic detection and identification – an important time-saving benefit that every IT professional will appreciate.
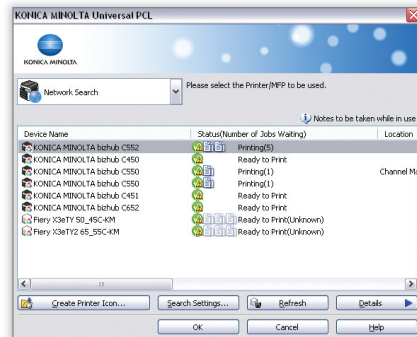

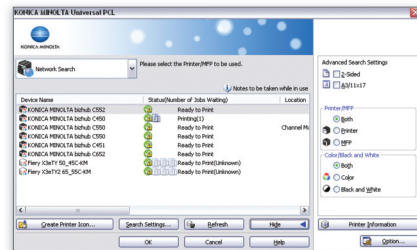

Print management was never so easy.

With a Universal Printer Driver to optimize the speed and convenience of network printing, your IT administrators, individual MFP and printer users, even temporary employees can be more productive – because finding, selecting and setting up devices will be faster and simpler.

Your IT administrators will no longer have to install drivers for each device added to your network. There's no need to test functions. Basic functions can be performed without installing specified drivers – and a common interface reduced the need for operator familiarization or training.

You'll also have the capability to display a history of recently connected printers and MFPs, add and edit information on each device, create printer icons for quick identification.

The result? Speeding output, saving time, and reducing administrative costs. To drive your productivity, Konica Minolta's Universal Printer Driver can provide a big advantage.

Functions by Child Driver		Individual Child Drivers	Common Child Drivers		
			bizhub series	magicolor & pagepro series	PS/ PCL-XL
