

ZebraDesigner™ Label Design Software

“Plug and Print” Ease and Speed

With Zebra’s ZebraDesigner label design software for use with the SAP® Business Suite family of business applications, you can easily design and modify label formats within a user-friendly graphical interface—and print directly from SAP’s mySAP™ Business Suite environment. This easy-to-use label design software makes it possible to print to your Zebra® printers from SAP® without the need for middleware or additional programming.

Once label designs are complete, they can be distributed to one or many printers—or stored on your PC for later uploading to mySAP Business Suite. As new labeling needs emerge, it’s “click” simple to create or edit existing designs.

Be in control with versatile, simple tools.

Offering helpful wizards, ZebraDesigner makes it easy to produce complex, fixed- or variable-data-driven labels. For example, with the simple-to-use variable wizard, you can create text and bar code fields to link with and receive variable data from mySAP Business Suite. And easy-to-use design features enable you to leverage your printer’s real-time clock, serial number counters, scalable fonts, and RFID tag support as part of your label content.

Featuring an intuitive, Windows®-based interface and a WYSIWYG label designer, ZebraDesigner makes creating complex bar code label designs and format changes “click” simple.

ZebraDesigner supports the following user-interface languages:

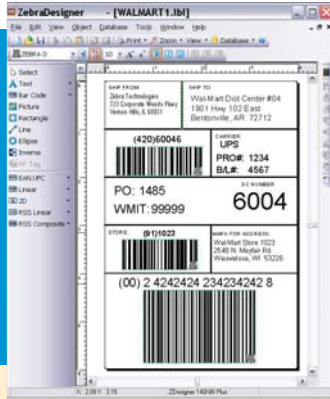

- English
- German
- French
- Italian
- Polish
- Spanish
- Danish
- Dutch
- Greek
- Hebrew
- Hungarian
- Japanese
- Lithuanian
- Portuguese
- Russian
- Simplified Chinese
- Swedish
- Slovenian
- Thai
- Traditional Chinese
- Ukrainian
- Croatian

ZebraDesigner™

Label Design Application
for mySAP™ Business Suite

1

Design

With the help of the software's new design and RFID wizards, it's easy to create complex labels based on fixed or variable data.

2

Deploy

The design distribution wizard makes it easy to send label templates to one or many printers with a single click. Formats can also be stored on the PC for uploading to mySAP Business Suite.

3

Print

Once labels formats are in place, simply print directly from mySAP Business Suite. Variable fields are populated with data, and labels print!

- Supported Operating Systems: 98SE/NT/2000/XP/2003
- Use ZebraNet™ Bridge Enterprise to enhance your printer management capabilities (free version included)
