Increasing Productivity Through Innovation

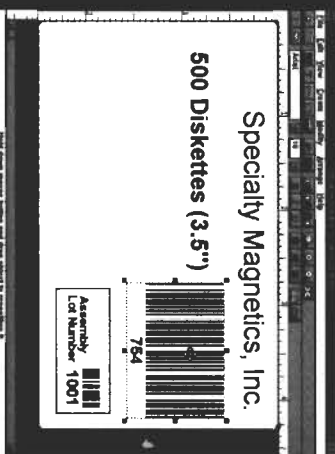

Design Your Next Label In Five Minutes

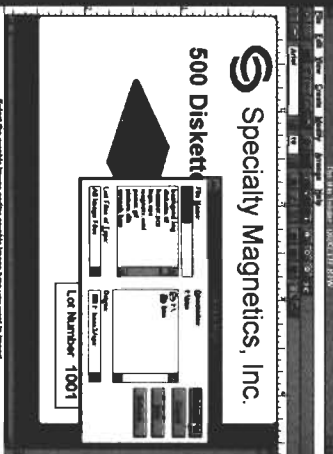

Click your mouse to select an object and click again to place it.

Use the simplest, most obvious motions to move and resize objects.

Use your mouse to place and size bar codes, boxes, and more text.

Import almost any graphics format.

Add more text and use the "toolbar" or menus for customizing.

Special routines compute the most efficient way to output your labels.

Create bar codes with a single mouse click. Resize text almost instantly, just by stretching it on the screen. Whatever your labeling needs, The Bar Tender lets you do more and finish faster than you ever thought possible.

Unsurpassed Design Flexibility.

Print any size and any number of text and bar code fields on any size label. Add pictures and custom logos in almost any format.

Numerous "ready-to-print" label formats are included free. Covering a wide variety of the most common industrial, military, and business applications, they can be used "as is" or modified to fit your exact requirements.

Beautiful Labels On Almost Any Printer.

In addition to the hundreds of printers already supported by Windows, we've developed our own drivers for numerous high-speed specialty printers.
