Colour coding for RF connectors

The SUHNER colour identification system eliminates the risk of incorrect connections, makes it possible for untrained staff to be employed for operating the equipment, and ensures a simple and permanent identification of cables of different lengths or impedances.

The following aids to colour-coding are now available:

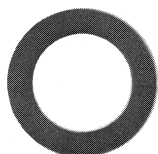

- Coloured plastic caps for SUHNER BNC plugs
- Coloured washers for SUHNER bulkhead receptacles
- Coloured reinforcing sleeves to prevent kinking for SUHNER crimp connectors

Coloured plastic caps for SUHNER BNC plugs

- Fit all SUHNER BNC plugs
- Simply push on
- After snapping into position can only be removed by force
- No tool required
- Can also be used on connectors already fitted
- Does not affect mechanical or electrical characteristics
- Material: Rilsan

Coloured washer for SUHNER BNC and TNC bulkhead receptacles

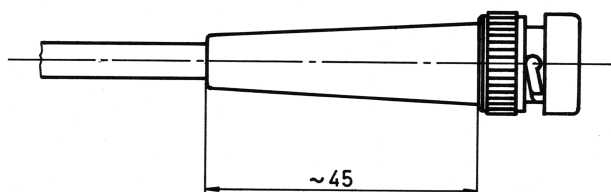

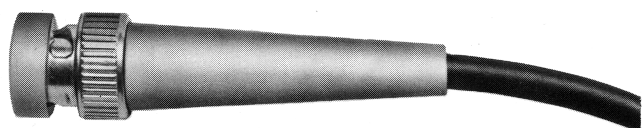

- Can be used with most SUHNER BNC and TNC single-hole mounting bulkhead receptacles
- No additional tool and no alteration of the mounting hole required when fitting
- Material: Anodised aluminium

Washers for use with 1" flange panel receptacles are in preparation

Coloured reinforcing sleeves to prevent kinking for SUHNER crimp connectors

- Outstanding kink prevention
- Increase the life of the lead assembly
- 10 different colours for cable identification
- Can be used for SUHNER crimp connectors of the BNC, TNC, N, UHF, H4 and M series with cable diameters ranging from 5 to 6.1 mm
- Material: Polyethylene, heat-resistant up to 70° C.
