

RF MICROWAVE COMPONENTS

# Coaxial Attenuators

**RADIALL**   
The next conneXion

# COMPANY Profile

Founded in 1952 in France, Radiall started as a family owned company making coaxial plugs. Today, Radiall is an international and global manufacturer of interconnect components including **RF coaxial connectors and cable assemblies, antennas, fiber optic components, microwave components, and multipin connectors** for the Automotive, Civil Aviation, Defense, Industrial, Medical, Space and Telecommunications.

## QSE (Quality Safety Environment) POLICY

Radiall maintains a quality management system conforming to international standards, including for environmental protection. Our customers' recognition for the quality of our products and the sustainability of our company, demonstrates the efficiency of our quality system.

## CERTIFICATIONS

Certified ISO 9001 since 1994, Radiall has a pro-active policy in terms of conforming to international standards. Today, all Radiall sites are certified to **ISO 9001:2000** and some dedicated activities are AS9100 or TS 16949. Our process approach gives us the tool for continuous improvement in all our activities.

A major step in our environment policy was the **ISO 14001** certification in 2001 of the Voreppe plant. Radiall complies with European directives such as **RoHS** for hazardous substance restrictions and **EuP** for environmentally friendly designs for energy-using products.

Some Radiall product lines are on **MIL, ESA/SCC** Qualified Product Lists.

Radiall is consequently proud to be recognized by leading industrial customers for the quality of its service and products.

## A WORLDWIDE ENGINEERING & MANUFACTURING CAPABILITY

With expertise centers and manufacturing locations in 3 continents. Radiall offers its customers, through 12 industrial sites, the proximity they need to obtain the best quality of service and delivery performance. Our facilities feature state of the art equipment for the many technologies involved in the design, manufacturing and assembly of interconnect products. Manufacturing plants based in **China, India, Tunisia and Mexico** give the opportunity to offer Radiall quality at competitive prices.

### I DEFINITION

A coaxial attenuator is a linear passive bidirectional transmission line component designed to be inserted between two coaxial lines in order to reduce the input power in a matched system by a predetermined ratio without otherwise disturbing the behaviour of the equipment. The ratio of input to output power is expressed in logarithmic terms where 3 dB as a power ratio is 2, 6 dB is 10, 20 dB is 100 and 30 dB is 1000 etc... The power absorbed by an attenuator is returned to the environment through heat transfer by convection or conduction cooling.

### II GENERAL SPECIFICATIONS

In general, RADIALL attenuators are designed in accordance with MIL and NFC standards.

#### ► TECHNOLOGY

RADIALL coaxial attenuators can be classified technically into 3 main types depending upon the resistive element used.

- High frequency and low power attenuators use Tantalum Nitride thin film deposits on Alumina substrates.
- High frequency and medium power attenuators use Tantalum Nitride thin film deposits on Aluminium Nitride substrates.
- High power attenuators use Ruthenium Oxide thick film circuits printed on alumina substrates sticked to a shape of Aluminium Nitride as a cooling sink.

RADIALL has decided to remove Beryllium material from its whole range of medium and high power attenuators. Indeed, Beryllium Oxide dust is highly toxic when scribing or machining or laser trimming. RADIALL has replaced this material by Aluminium Nitride which has excellent heat conductive properties and is absolutely safe for the environment.

#### ► MECHANICAL CHARACTERISTICS, MATERIALS AND FINISHES

All materials and finishes are in accordance with applicable MIL and NF specifications.

All connectors used in our attenuators are in accordance with applicable MIL, DIN, NF and CEI specifications.

All dimensions in this catalogue are given in inches and (millimeters). The non-specified dimensions are given within  $\pm 0.5$  mm.

#### ► MANUFACTURING AND QUALITY ASSURANCE

Thin film and thick film circuits of RADIALL attenuators are produced in-house, in class 10000 clean rooms, using advanced processing technologies. Our microelectronic laboratory uses a tightly controlled and highly repeatable process, necessary to achieve consistent microwave performances.

RADIALL maintains a state-of-the-art computer aided designed system, a well equipped precision machine factory, a modern component assembly area and an extensive collection of RF test equipments.

Specific testing is available upon request.

### III LIST OF APPLICABLE DOCUMENTS :

List of related standards covering the general mechanical and climatic tests applicable to the devices described in this catalog.

- AIR 7304
- CEI 169.13
- DIN 47295
- GAM EG 13
- NFC 207xx
- NFC 93561
- NFC 93562
- NFC 93563
- NFC 93564
- NFC 93566
- NFC 96315
- MIL C 39012
- MIL A 3933
- MIL E 5400
- MIL STD 202

### IV ENVIRONMENTAL CHARACTERISTICS :

	Operating temperature range	Storage temperature range
All the models	- 55°C, + 125°C	- 55°C, + 125°C

### V MATERIALS AND FINISHES :

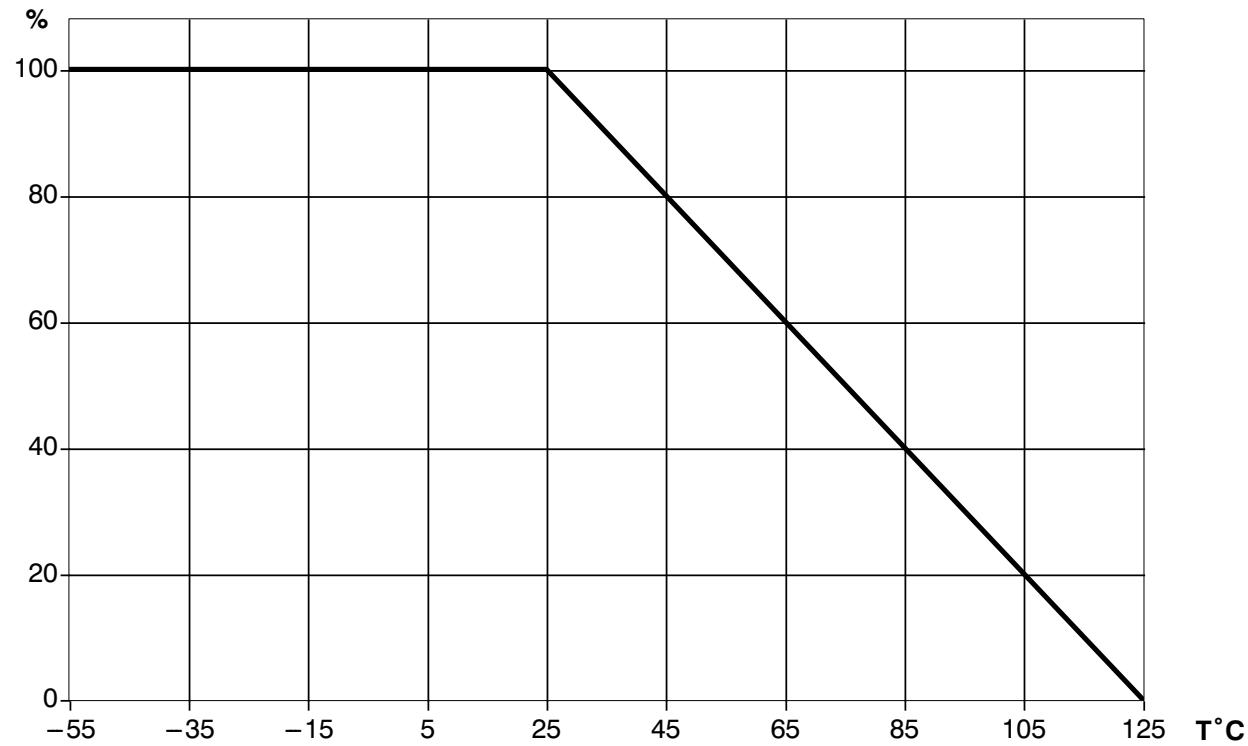

Body	Passivated Stainless Steel or Brass Nickel plated
Contact	Beryllium Copper Gold plated (CuBe2)
Heatsink	Aluminium black anodized
Insulator	P T F E or ULTEM 1000
Resistor circuits	Tantalum Nitride Thin film on ceramic substrates Ruthenium Oxide Thick film on ceramic substrates Tantalum Nitride Thin film on Aluminium Nitride substrates

### VI TEMPERATURE POWER DERATING CURVE :

a) FOR MODELS WITH AVERAGE POWER < 10 WATTS

b) FOR MODELS WITH AVERAGE POWER  $\geq$  10 WATTS

### VII DEFINITIONS OF ATTENUATOR RELATED PARAMETERS

#### ► NOMINAL ATTENUATION OR ATTENUATION VALUE

The nominal value of attenuation is the standard value determined by the manufacturer. This parameter is a representation of the power ratio between the input and the output of the attenuator. It is expressed in dB :

$$\text{Attenuation in dB} = 10 \log \frac{P_{\text{out}} (\text{W})}{P_{\text{in}} (\text{W})}$$

#### ► ATTENUATION DEVIATION

The attenuation over full specified bandwidth does not exceed the nominal value  $\pm$  attenuation deviation. This parameter is expressed in dB. For example, an attenuator with 6 dB nominal value and  $\pm 0.3$  dB deviation do not exceed 5.7dB minimum value and 6.3 dB maximum value.

#### ► TEMPERATURE SENSITIVITY

The maximum change of attenuation in dB per dB per  $^{\circ}\text{C}$  over the operating temperature range. Example : If temperature sensitivity is  $5.10^{-4}$  dB/dB/ $^{\circ}\text{C}$ , for a 20 dB attenuator over a  $20 * 20 * 5.10^{-4} = 0.2$  dB attenuation variation.

#### ► CONNECTORS

Microwave connectors have a characteristic impedance from 50 ohms. Adaptation interfaces, materials and platings are in accordance with the applicable specifications quoted in this catalog.

#### ► FREQUENCY RANGE

The frequency range indicated for each device is the range which RADIALL specifies the device performance.

#### ► AVERAGE POWER HANDLING

It is the maximum Continus Wave input power applied for a long time at room temperature, or at the maximum temperature of 75°C. that the attenuator can handle without permanently changing the specifications of the component. Any overpowering beyond this limit can significantly alter the input power handling of the attenuator.

#### ► PEAK POWER HANDLING

It is the maximum peak power which, when applied at maximum room temperature under a pulse of one microsecond every millisecond, will not permanently change the specifications of the attenuator. Any overpowering beyond this limit will alter the input power handling of the attenuator.

### ► V.S.W.R.

The **Voltage Standing Wave Ratio** is a measure of the return loss or level of the reflected signal of a device connected on a transmission line.

V.S.W.R. is linked to the coefficient of reflection ( $\rho$ ) by the equation :

$$\text{V.S.W.R.} = \frac{1 + |\rho|}{1 - |\rho|}$$

( $\rho$ ) represents the coefficient of reflection vector standard

$$\text{with } \rho = \frac{Z - Z_0}{Z + Z_0} \quad \begin{array}{l} (Z \text{ is the component impedance}) \\ (Z_0 \text{ is the characteristic impedance of the line}) \end{array}$$

Variation within 0 and 1, V.S.W.R. equal to 1 represents the perfect adaptation. This value can be expressed in dB's and is known as return loss, when expressed as  $20\log_{10} |\rho|$

### ► CONDUCTION AND CONVECTION COOLING

Heat dissipation for medium and high power attenuators can be done by convection or conduction cooling.

- Convection cooling:

The attenuator is equipped with a heatsink with cooling fins. A heat sink with cooling fins increases the effective heat exchange toward the environment. The heat sink is characterized by its thermal resistance or by the increase of surface temperature per watt (in °C per W). The shorter this value is, the greater the power will be. Cooling shapes and sizes have an important effect on this parameter.

- Conduction cooling:

The component has to be mounted to a heat sink, plate or chassis of the equipment to ensure a good heat transfer. The dimensions of the plate or chassis are calculated according to the characteristics of the components.

RADIALL high Reliability SPACE QUALIFIED attenuators have been designed and are built to satisfy the stringent demands of space environment via intensive manufacturing and quality procedures, such as European Space Agency ESA / SCC.

### 1 - 2 WATTS DC - 22 GHz range :

This range of attenuators can be delivered :

- 1) ESA qualified products (ESA certificate N° 178). They can be supplied to different levels of tracability (B or C) and Lot Acceptance Tests (LAT 1, 2 or 3) according to ESA generic specification ESCC3403 and detail specification ESCC3403005.

## MANUFACTURERS CODE NUMBERS

RADIALL, manufacturer code **F0503** and **F6507**, is a military qualified supplier of attenuators, as well as other microwave components, to various governmental agencies. RADIALL Quality Assurance is fully approved by NATO (AQAP4).

The following is a partial listing of national stock numbers which RADIALL has provided to the French Ministry of Defence.

PART NUMBER	NATO CODE	PART NUMBER	NATO CODE	PART NUMBER	NATO CODE

### CUSTOMS ATTENUATORS

Contact RADIALL for your specific requirements.

This 1 dB 75 Ohms coaxial attenuator was developed with IEC 169-2 male connector. It is suited for Telecom network applications up to 1 GHz.

This ultra miniature 12 Watts panel mounting 3 dB attenuator is designed for use in a classified military airborne ECM system.

This 6 dB up to 1.5 GHz panel mounting attenuator is designed for use in a measuring instrument.

## RADIALL WORLDWIDE LOCATIONS

### EUROPE

#### France - RADIALL HEADQUARTERS

101, Rue Ph. Hoffmann - 93116 ROSNY sous BOIS (Paris)  
 Tel. : +33 1 49 35 35 35 Fax : +33 1 48 54 63 63  
 E-Mail : info@radiall.com

#### Finland - RADIALL SF

Pilot Business Park - Lentokatu 2 - FIN-90460 OULUNSALO  
 Tel. : +358 852 70 130 Fax : +358 852 70 105  
 E-Mail : info@radiall.fi

#### Germany - RADIALL GmbH

Carl-Zeiss Str. 10 Postfach 200143 - D63307 RÖDERMARK (Frankfurt)  
 Tel. : +49 60 74 91 07 0 Fax : +49 60 74 91 07 70  
 E-Mail : infode@radiall.com  
 Regional office : Munich

#### Italy - RADIALL Elettronica SRL

Via Concordia, 5 - 20090 ASSAGO MILANO  
 Tel. : +39 02 48 85 121 Fax : +39 02 48 84 30 18  
 E-Mail : radiall@tin.it  
 Regional office : Roma

#### Netherlands - RADIALL BV

Hogebrinkweg 15b - 3871 KM HOEVELAKEN  
 Tel. : +31 33 253 40 09 Fax : +31 33 253 45 12  
 E-Mail : infonl@radiall.com

#### Sweden - RADIALL AB

Sjöängsvägen 2 - SE-192 72 SOLLENTUNA (Stockholm)  
 Tel. : +46 844 434 10 Fax : +46 875 449 16  
 E-Mail : infose@radiall.com

#### U.K. - RADIALL Ltd

Ground Floor, 6 The Grand Union Office Park, Packet Boat Lane  
 UXBRIDGE Middlesex UB8 2GH (London)  
 Tel. : +44 1895 425 000 Fax : +44 1895 425 010  
 E-Mail : infouk@radiall.com

### AMERICA

#### North America

##### RADIALL

6825 West Galveston Street Suite 11  
 CHANDLER, Arizona 85226, USA  
 Tel. : +1 480 682 9400 Fax : +1 480 682 9403  
 E-Mail : infousa@radiall.com

##### RADIALL-AEP

104 John W. Murphy Drive  
 NEW HAVEN, Connecticut 06513  
 Tel. : +1 203 776 2813 Fax : +1 203 776 8294  
 E-Mail : aepsales@aep.us

#### Brazil

##### RADIALL do Brasil

Largo do Machado, 54 sala 706 - Catete  
 22221-020 RIO DE JANEIRO  
 Tel. : +55 21 2558 05 76 Fax : +55 21 2245 97 63  
 E-Mail : huberm@radiall.com.br

### ASIA

#### China - SHANGHAI RADIALL Electronic Co., Ltd

N° 390 Yong He Road 200072 - SHANGHAI  
 Tel. : +86 21 66 52 37 88 Fax : +86 21 66 52 11 77  
 E-Mail : sales.rsh@radiall.com

#### Japan - NIHON RADIALL

Shibuya-ku Ebisu 1-5-2, Kougetsu Bldg 405-TOKYO 150-0013  
 Tel. : +81 3 3440 6241 Fax : +81 3 3440 6242  
 E-Mail : kunii@radiall.co.jp

#### HongKong - RADIALL Electronics Ltd

Elite Industrial Centre, Room 212, 2/F  
 N° 883 Cheung Sha Wan Road - KOWLOON HONG KONG  
 Tel. : +852 29 59 38 33 Fax : +852 29 59 26 36  
 E-Mail : contact@radiall.com.hk
