Fig. 4. Pressure sleeve cable clamp, captive centre contact

- 1. Place clamp nut and plain gasket over cable.
- 2. Trim outer sheath from cable to dimension shown.
- Fold back braid and insert ferrule to trap braid between outer sheath and ferrule.
- 4. Trim off surplus braid as shown.
- Trim dielectric to dimension shown, and check that exposed centre conductor length is as specified.

- 6. Tin centre conductor.
- 7. Slide rear insulator over dielectric to butt against ferrule.
- 8. Mount contact (male for plugs; female for jacks) over centre conductor with shoulder pressed against rear insulator.
- Hold cable and contact firmly together, and solder.
- 10. Slide plain gasket and clamp nut up to ferrule, trapping braid.

- 11. Fit front insulator over contact to butt against rear insulator.
- 12. Press sub-assembly into body as far as possible, and engage clamp nut.
- Holding body and cable rigid, tighten clamp nut to compress plain gasket and retain cable.
