

POWER BACKED PRODUCTS

Choose our DC to DC converters, encapsulated AC to DC or open card power supplies and you'll get more than just the product.

The hidden ingredients packed into every unit are decades of design, manufacturing and applications knowledge, backed by the financial strength and stability of Computer Products Inc; five plants throughout the world, design and manufacturing right here in Europe, with total commitment to new technology, computer aided design and automatic test equipment.

All this plus guaranteed technical specifications and a full **TWO YEARS** warranty which underwrites our quality confidence.

Distributed by Amplicon from extensive stocks means you get fast delivery backed by a team of professional sales and service engineers, all trained at the factory to know our products and help you apply them.

So pick Packaged Power, go for more value, back the White Horse.

15 WATT TRIPLE OUTPUT DC TO DC CONVERTERS

ES series offer better regulated power from a smaller package than any other isolated triple output DC/DC converters on the market today. Featuring a wide 2:1 input range and efficiency as high as 82% achieved by simplified MOSFET circuitry with 100KHz switching regulation.

Nine models available with isolated, regulated, low noise outputs of 5V/±12V, 5V/±15V or 12V/±5V.

Six sided copper shielding provides EMI/RFI suppression and over voltage protection and 500V DC isolation are standard.
