

## FX1

### FX1 Indicator

The FX1 is the entry level electronic weighing system from Iconix. Simplicity itself - just turn it on and "you're weighing".

There are two weighing modes:

- **FREE** for weighing static loads, such as produce.
- **HOLD** for livestock weighing - after a press of the **WEIGH** key, the accurately averaged weight of the animal is locked on the display until the next animal is weighed.

### Features

- Auto zero at switch-on
- Intelligent zero-tracking. Dirt build-up while weighing is automatically zero-tracked out.
- Tough, weatherproof case rated to IP65
- Mounting bracket is included
- Powered by external 12V battery - battery lead supplied
- Optional AC adaptor for mains operation
- Low battery indicator
- Auto 'low voltage' shut down
- Weighs up to 2000kg with standard loadbars
- Available in English, Spanish and German language versions

### Specifications

- Supply voltage = 11.5V to 19V DC
- Low battery indication = 11.4V DC
- Automatic scale base selection
- Accuracy: +/- 0.5% of displayed reading +/- 1 division where 1 division = 0.2kg, 0.5kg etc depending on weight range
- Temperature range = -5°C to +50°C
- Dimensions = 195 x 180 x 52mm (excluding mounting bracket)
- Weight = 0.9kg (including mounting bracket)
- Auto ranging resolution. With standard 2000kg Load Bar Set:
  - 0 - 20kg 0.1kg steps
  - 20 - 50kg 0.2kg steps
  - 50 - 200kg 0.5kg steps
  - 200 - 500kg 1kg steps
  - 500 - 2000kg 2kg steps
