MODEL PC-20BE

Compact, Fully Self-Contained Power Desoldering System

The Model PC-20BE Desoldering System is a lightweight, compact and completely self-contained power desoldering system. Incorporating an internal mini-pump, the system provides true low-cost operation with the same high performance that is standard with all Pacenter desoldering systems.

The PC-20BE features a highly efficient 24VAC Sodr-X-Tractor™ handpiece with exclusive "Thermo-Drive" heat control. The compact power source provides a variable AC output for precise tip-temperature control, zero-leakage vacuum supply with quick-connect vacuum output, dual, high-visibility filtration system including a plug-in "Visi-Filter," auxiliary ground lug, and convenient footpedal-controlled operation.

For convenience, a hot cubby is provided for holding the Sodr-X-Tractor handpiece, and an assortment of long-life Super Tips is furnished with each system.

GENERAL CHARACTERISTICS

- Includes power source, 24VAC Sodr-X-Tractor handpiece, cleaning brushes, air line, external Visi-Filter, Super Tips and hot cubby
- Power Required: 220/240VAC, 50/60Hz
- Dimensions: 23.2cm wide, 21.0cm deep, 12.7cm high
- Total System Weight: 3.85kg
