# Digital Business Telephone Systems

Your company is about to invest in a new telephone system. Perhaps the old one is overloaded, or you are moving to new or larger premises or maybe you wish to take advantage of new technologies such as ISDN or CLI. You want a system and a company you can depend on. With **aria**, you get the support of three professional companies - LG, the manufacturer, Atlas Gentech, the importer, distributor and service agent and your local professional authorised reseller.

## Leading Suppliers of Digital Telephone Systems

**LG** is one of the world's largest companies with over US\$72 billion in annual sales and a staff of more than 126,000 in over 120 countries. Almost 2,000 staff are engaged in Research & Development for LGIC, the Information and Communications subsidiary of LG and it is the largest manufacturer of telephone systems in Korea. LGIC is committed to incorporating the latest technology into **aria** systems as well as developing new IP based systems for the future.

In New Zealand, **aria** is the largest selling telephone system. During the past 13 years, over 15,000 **aria** systems have been sold in New Zealand so it is safe to say that more companies use an **aria** telephone system than any other.

**aria** telephone systems are imported, distributed and serviced by Atlas Gentech (NZ) Limited, a New Zealand owned company that has been serving the communications needs of New Zealanders since 1972. Today, Atlas Gentech is one of the largest suppliers of communications products in New Zealand encompassing corded telephones, cordless telephones, DECT, headsets, answering machines, faxes, mini-PBX and keyphone systems, cellular and radio telephones, pagers and paging systems, announcers, voice recorders, audio conferencing systems and a broad array of specialty products.

Atlas Gentech services everything that is sold from its service centre based in Auckland. With over 40 staff, you can rely on both professional and efficient service from Atlas Gentech and its nationwide network of authorised resellers of **aria** telephone systems.

## aria is Reliable

You can depend on an **aria** telephone system. Telecom New Zealand has tested and approved all the existing **aria** business systems. Each system has been New Zealand Telepermitted, complies with New Zealand Electrical Safety Standards and the **aria** system DECT cordless has also been approved by the New Zealand Ministry of Commerce.

All **aria** systems are guaranteed under a one year warranty from Atlas Gentech.

## What aria Can Do For Your Business

The **aria** will improve your business communications and assist you in presenting a professional image to your customers and business associates. The **aria** can also save you money by giving you the choice of ISDN or analog CO lines, Least Cost Routing (LCR), SMDR call reporting, and numerous call handling options to save time and money.

## What Businesses Need an aria Phone System?

The **aria** is the best communications solution for all sizes of businesses from retail shops to schools, hotels, large corporations and government departments. There is an **aria** system right for almost any type of company:

- Supermarkets and Retail Chains
- Hotels & Motels
- Accounting and Legal Firms
- Hospitals and Emergency Medical Centres
- Advertising Agencies
- Travel and Real Estate Agents
- Banks and Insurance Companies
- Manufacturers
- Utility Companies
- Importers and Distributors
- Car Dealerships
- Recreational Facilities and Resorts.

## aria has the Answers for Business Solutions

The **aria** 34e, 100 and 186 digital hybrid business telephone systems are designed to meet the telecommunications needs of organizations requiring from 4 up to 180 extensions and either PSTN or ISDN network connection. Their advanced features, together with the ability to integrate with existing analog equipment such as cordless telephones, faxes, modems and answering machines, make the **aria** the answer to your business telecommunications needs.

A complete and affordable business telephone system, **aria** has been designed to meet future technology requirements and represents an economical alternative to larger more expensive telephone systems.

## Digital Business Telephone Systems

### **aria Innovative and Exciting Features**

The **aria** digital business systems has many user friendly features and can interface with an array of user devices as well as be custom-tailored to meet the short and long term needs of the most demanding customer requirements.

- PSTN Connection
- Analog Bothway Direct Inward Dialling Connection
- ISDN Connection - Basic Rate or Primary Rate Access
- S-bus ISDN Connection - ISDN to the Desktop
- ISDN Centrex Call Transferring Capabilities
- Automatic Attendant with up to 9 System Announcements
- Voice Messaging
- Least Cost Routing
- Customer Call Routing
- True Hybrid Operation (connect analog devices)
- Remote Maintenance & Programming
- Direct Inward System Access (DISA)
- Station Message Detail Recording (SMDR)
- Call Traffic Analysis
- Uniform Call Distribution (UCD)
- Asynchronous Serial Data Communications
- System DECT Cordless Technology
- Differential Ringing Tone on Key Telephones
- Dial by Name from Key Telephones
- Call Progress Tone Detection
- External Paging
- Music On Hold (Internal or External)
- QSIG - the ability to intelligently connect two systems
- Modular Design - Easy Expandability
- Stylish, Easy to Use Keyset Telephones
- Compatible with Call Accounting & Voice Mail Systems

## Select Digital Keypad Telephones

### JN3510 aria Select LKD-2NS 2-Button Non-Display Keypad

- Volume Control
- On-Hook Dialling
- Flash (Recall)
- Call Transfer
- Differential Ringing Tone Selection
- 2 Flexible keys assignable as Direct Station Select, Speed Dial or Line Status
- 10 Speed Dial Memories
- Message Waiting Lamp
- Headset Compatible

### JN3511 aria Select LKD-8DS 8-Button Display Keypad

- 2-Line Adjustable LCD Display
- Full Hands-Free Speakerphone
- Volume Control
- Dialling from Alpha Numeric Speed Dial Directory
- Flash (Recall)
- Call Transfer
- Differential Ringing Tone Selection
- 8 Flexible keys assignable as Direct Station Select, Speed Dial or Line Status
- 10 Speed Dial Memories
- Message Waiting Lamp
- Headset Compatible

### JN3512 aria Select LKD-30D 30-Button Display Keypad

- Multi-Colour Line Keys
- 2-Line Adjustable LCD Display
- Full Hands-Free Speakerphone
- Volume Control
- Dialling from Alpha Numeric Speed Dial Directory
- Flash (Recall)
- Call Transfer
- Differential Ringing Tone Selection
- 30 Flexible keys assignable as Direct Station Select, Speed Dial or Line Status
- 10 Speed Dial Memories
- Message Waiting Lamp
- Headset Compatible.

### JN3513 aria Select LKD-30LD 30-Button Large Display Keypad

- Multi-Colour Line Keys
- 7-Line LARGE Adjustable LCD Display
- Full Hands-Free Speakerphone
- Volume Control
- Dialling from Alpha Numeric Speed Dial Directory
- Flash (Recall)
- Call Transfer
- Differential Ringing Tone Selection
- 30 Flexible keys assignable as Direct Station Select, Speed dial or Line Status
- 10 Speed Dial Memories
- Message Waiting Lamp
- Headset Compatible

### JN3514 aria Select DSS Console

48 Programmable keys which can be assigned as Direct Line Selection, Direct Station Selection or Feature Keys.

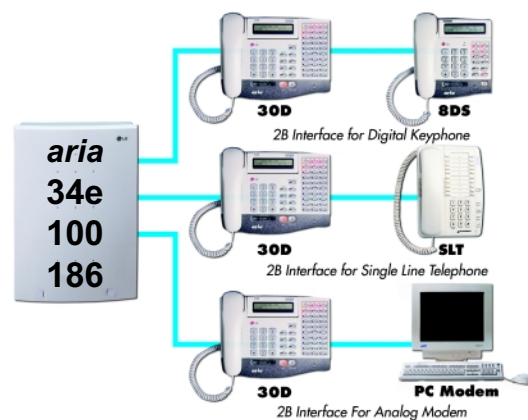

### JN3125 - Digital Door Station

May be used as a door phone or intercom and connected to ring on selected digital keypad extensions.

### aria Select Key Telephone Wall Mounting Brackets

JN3515 - Wall Bracket for Wall Mounting the 2-Button or 8-Button Display Keypad Telephones.

JN3516 - Wall Bracket for Wall Mounting the 30-Button Display and 30-Button Large Display Keypad Telephones.

## Digitally Enhanced Cordless Telephone System

### The Freedom to Move - Optional aria DECT System

The key to any successful business in today's highly competitive environment is customer service. People expect to be served professionally the first time and every time. **aria** DECT ensures that your staff do not miss any important calls even when they are on the move around the premises. **aria** DECT offers total freedom of movement without being out of reach of your customers. You can carry your extension in your pocket or clip it to your belt while still retaining keyphone functionality of your **aria** digital business system. **aria** DECT is GAP compliant and fully compatible with the **aria** 34e, 100 and 186 business systems.

### Improve Your Company's Efficiency.

Mobility helps increase the efficiency and productivity of your company. Staff remain contactable at all times, ensuring important decisions are made without delay and staff are able to manage their day more effectively. Your business will also save money on the number of returned calls that your staff will no longer have to make. When your customers call, they will be in contact with your staff whenever they need them.

### You Are Covered Wherever You Go.

Total coverage of your business premises can be achieved by strategic placement of **aria** base stations. Your staff can roam around your premises effortlessly without calls being dropped - thus creating your own private mobile network. And of course any internal calls will be made free of any toll charges.

### Compact, Stylish and Portable Handset.

The **aria** DECT handset is light, compact, stylish and portable and is perfect for staff on the move. Improved response times and greater flexibility enhance your professional image with your customers.

- JN3520 - **aria** 186 WTIBG DECT Interface Board (96 Handsets & 3 Base Stations)
- JN3521 - **aria** 186 WTIUG DECT Expansion Board (3 Extra Base Stations)
- JN3522 - **aria** 100 WTIBG DECT Interface Board (64 Handsets & 4 Base Stations)
- JN3523 - **aria** 100 WTIUG DECT Expansion Board (4 Extra Base Stations)
- JN3524 - **aria** 34e WTIBG DECT Interface Board (32 Handsets & 4 Base Stations)
- JN3525 - **aria** 34e WTIUG DECT Expansion Board (4 Extra Base Stations)
- JN3526 - **aria** GDC-320BG DECT Base Station (compatible with all 3 systems)
- JN3527 - **aria** GDC-330HG DECT GAP Handset (compatible with all 3 systems)
- JN3527C - **aria** GDC-330HG Leatherette Carry Case with Belt Clip

# Major Digital Business System Features

## ISDN\*

ISDN (Integrated Services Digital Network) has revolutionised the capabilities of your telephone system as it has much greater capacity and speed for transmitting data, voice, video and image. As a digital service, ISDN offers faster and more reliable transmission with near instant connection and fewer errors. ISDN features include Direct Inward Dialling, Video Conferencing, Group 4 Fax and Calling Line Identifications (CLI).

## BASIC RATE ACCESS - BRA (2B+D) ISDN\*

Enhances your telephone service with clear, digital calls, and it allows you to easily upgrade your existing analog service while keeping your existing telephone number and send data, video and image - economically and at high speed.

## PRIMATY RATE ACCESS - PRA (30B+D) ISDN\*

Primary rate access allows voice, data, image and video transfer services. PRA is intended for larger customers with frequent data transfer and multi-line voice applications. It operates at 2mbps and each board consist of 30 "B" channels of 64kbps. Up to 60 PRA channels can be connected to the **aria** digital business sytems.

## S-bus ISDN EXTENSION\*

This feature allows ISDN to the Desktop along with other features such as Calling Line Identification, Multi Subscriber Numbering and Bothway DDI where available. It enables the connection of video conferencing equipment , high speed data transmission and Group 4 fax connection.

## CALLER LINE IDENTIFICATION\*

CLI lets you see who's calling you on a display keystation before you answer the call. This service is available on ISDN lines.

## VIDEO CONFERENCING\*

Save money and time on costly national and international trips with Video Conferencing. By using S-bus ISDN Technology, you can set-up a video conferencing system enabling you to hold successful multi-site meetings at the cost of a telephone call.

## LEAST COST ROUTING

Competition between the telecommunication network providers means that the cost of a call can vary depending on the distance, country, time of day, fixed or mobile phone, even promotional offers. Your **aria** digital business system can be programmed to choose the most cost effective carrier. Least cost routing allows your business system to make the dialling decisions, saving you time and money.

## DECT MOBILITY

DECT (Digitally Enhanced Cordless Telephone) allows you to answer calls from anywhere in the office. **aria** GAP compliant DECT handsets provides digital cordless extensions with access to system features for personnel working away from their desk, in the warehouse, in the workshop, showroom, etc. Mobility helps eliminate lost calls and provides greater flexibility to your business organisation.

## DIRECT INWARD DIALLING\*

DID (Direct Inward Dialling) allows callers to directly access the person they wish to speak to, thus freeing the operator to handle customer calls more effectively.

## UNIFORM CALL DISTRIBUTION (UCD)

Call centre and UCD technology is driving huge gains in productivity, customer service and revenues across all industries. The clear UCD functions of the **aria** range allows you to introduce call handling features at a fraction of the cost of larger, more expensive PBX systems. The **aria** range employs queuing technology to allow you to handle more incoming calls than there is staff available. Call are queued as determined by you across nominated personnel, minimising wait time for callers and spreading the load evenly within the organisation. Efficiency is increased by reducing call answer rings in busy environments such as sales departments, customer service organisations or any areas with a large volume of incoming calls.

## AUTOMATED ATTENDANT/CALL ROUTING\*

Each call is valuable. Many calls are lost due to inefficient call handling, costing your organisation money. The **aria** business system solves this problem with the Automated Attendant feature. The system can be programmed to provide callers with customised greetings, inviting them to use single digit selection to direct calls to a specific extensions, departments, group or wait to be connected to an operator. The Automated Attendant ensures that all your calls are answered within your pre-determined time.

## ENHANCED DIGITAL VOICE INTERFACE BOARD\*

This is the voice of the system. The Enhanced Digital Voice Interface Board provides messaging for the Auto Attendant, Call Queuing, Call Distribution for busy operators. It gives both internal user greeting and voice messaging. By using resources more effectively and no longer missing important messages, productivity is increased and your image to callers is also improved.

## REMOTE MAINTENANCE AND PROGRAMMING\*

Technical visits are expensive. The **aria** has the tools to manage and maintain the system remotely, quickly and efficiently. Help is now only a telephone call away.

## CALL ACCOUNTING & VOICE MAIL INTEGRATION\*

Call Accounting and Voice Mail are important tools for any modern business. **aria** digital business systems seamlessly integrate with any compatible PC based call accounting or voice mail systems.

## HOSPITALITY SOFTWARE\*

**aria** hospitality software is designed to meet the needs of the accommodation industry. It can be used as a stand alone system or be integrated with other hospitality software to cover the needs of small to medium hotels, motels, guest houses, lodges and even nursing homes, retirement villages, emergency accident centres, hospitals and more.

## COST CONTROL\*

Control over your organisation's telephone system expenditure is essential for effective business management. With the built-in call logging facility you can easily print out a total list of actual costs, by extension or department.. It also allows you to control which extensions can have overseas, national or even local access further minimising any excessive expenditure.
