# GDS 600 Series

A total integrated Hospitality solution

Hybrex's GDS Hospitality Series is a feature-rich platform thoughtfully designed to accommodate as few as 10 rooms to over 600! A single system with multiple integrated solutions means you can say "*goodbye*" to training headaches and servicing various equipment types. Say "*hello*" to a solution that incorporates your desired mix of administrative and guest telephones and the number of outside lines needed for your Hotel. The GDS Hospitality Series is the system of choice for small to medium sized Hotels. On top of that add seamless integration of front desk and guest features that allow you to offer an unprecedented level of service to all that frequent your Hotel.

The GDS Hospitality Package can be flexibly configured to serve not only your basic telephone needs but also acts as an Automated Attendant, Voice Mail, Front Desk Operations, Guest Services, Call Accounting and so much more.

Front Desk Operations

Simple as 1, 2, 3...

Operations at the front desk could not be easier. Accessing features is a matter of pressing a "Hotel" key on the operator console followed by 1,2,3 etc. for the various features and following instructions from the LCD of the operator console, or entering the Voice Services Card and listening to voice guided feature prompts.

Guest Services

That pay dividends...

When a guest enters the GDS Voice Services package, they are greeted with a friendly menu of options, not an array of confusing instructions more suited for business applications. The system maintains it's commitment to user friendliness by offering clear voice guided instructions for using and setting up features. Your guests will be pleased with the services offered and how easy they are to use.

A guest simply dials a code to enter the Voice Services function and follows the following menu.

Dial 1 to play messages
Dial 2 for Automatic Wakeup
Dial 3 for Do Not Disturb
Dial 4 for password control

Key Feature Highlights

Via Digital Attendant Console

- Hotel 1 Check In
