# Custom Printed ID Cards

IDenticard continues to be the leader in the security ID card market, offering more choices than any card manufacturer in the industry.

Custom-printable IDenticard photo ID cards easily accommodate today's many available reader technologies, including bar codes, magnetic stripes, Proximity, and smart cards. Utilizing traditional camera systems or IDenticard's state-of-the-art digital imaging systems, our cards can also be produced to integrate with your access control, time and attendance, data collection, and other services.

[VIEW BROCHURE](#)

[ORDER NOW](#)

# Laminated Plastic ID Cards

Laminated cards are the ideal choice when durability is an important issue. The card information and photograph are printed on Teslin® material which is then laminated for superior protection and long life.

Laminated IDenticard ID cards are compatible with most laser and inkjet printers.

## JetPak™

Developed specifically for inkjet printers, JetPak is IDenticard's newest ID card technology that provides rich, saturated photos of unprecedented color quality. They are available factory-printed with your logo (recommended) to assure maximum print quality and consistency. Available in both single-core and dual-core sheets.

[VIEW BROCHURE](#)

## LaserPak™

Ideal for organizations of all types. Bar codes can be printed directly on the badge.

## IDentiWrap™

A single piece of tough, protective laminate, IDentiWrap extends the life of your custom-designed ID cards by reducing wear and tear.

## BackPak™

Thin photo ID cards that adhere to the back of any badge using Wiegand or Proximity technologies.

## IDentitags™

Laminated luggage tags featuring custom printed logo on one side and business card pouch on the other.

## PVC Cards

PVC cards are an attractive choice for printing ID cards quickly and economically. Captured images are printed directly onto the plastic cards with superb color reproduction. Magnetic encoding or two-dimensional bar codes can also be printed onto the card to provide data entry and tracking.

## Proximity Cards

IDenticard offers a wide selection of Prox cards. Card options include slotted or unslotted, printable or non-printable, and with or without photo ID capabilities. And Prox cards can be produced in just 2-3 days. Effective ranges vary depending on choice of supporting Prox readers.

### Fast turn-around on select Prox cards!

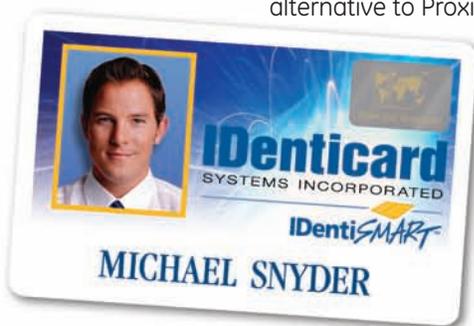

Direct-printable HID ISO prox cards in quantities of 1,000 or fewer can be shipped in two business days\*. That includes programming, numbering, and black text printed on the same side as the card number. Orders for up to 5,000 cards will be shipped in five to seven business days.

\*Orders will be shipped after sample cards are properly tested and proof is approved for text printing.

## Smart Cards

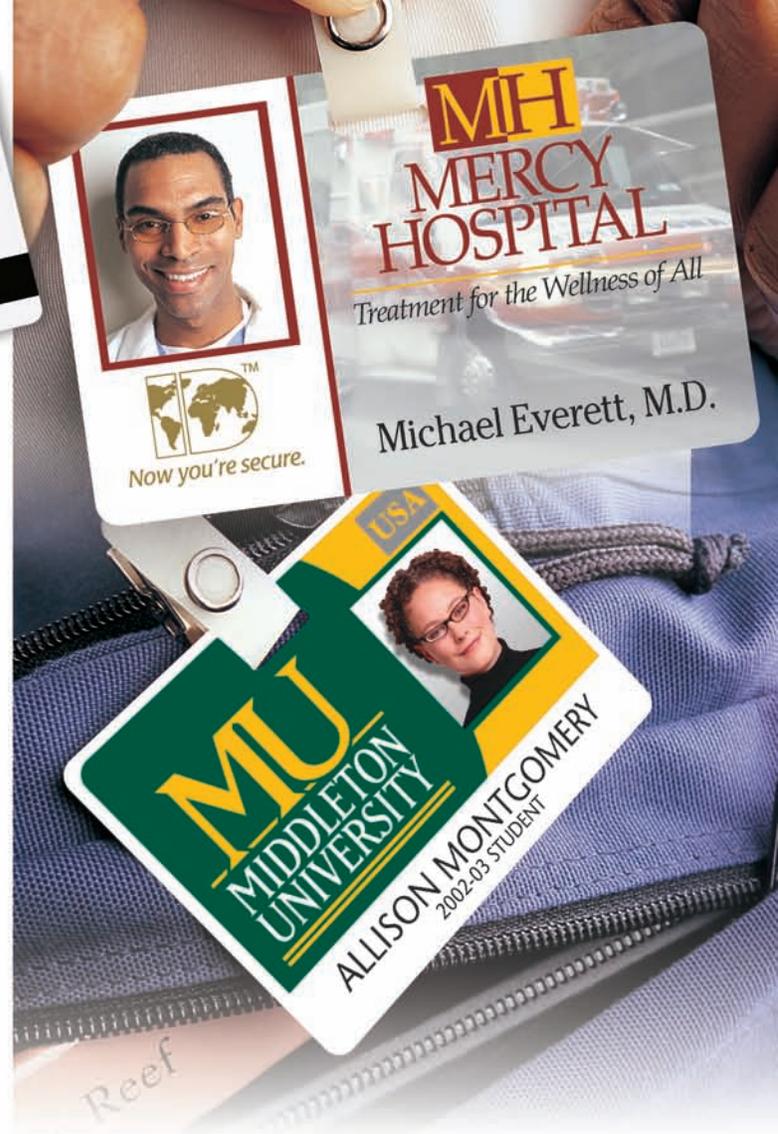

Utilizing the most advanced technology on the market, smart cards can be used for photo ID, access control, electronic cash and financial transactions, inventory management, computer network security, and many other applications. IDentiSMART is a patented, revolutionary MIFARE® smart card designed specifically with the security industry in mind. IDentiSMART cards – available in either standard or custom designs – offer an alternative to Proximity cards for

contactless access control with far greater potential. In fact, IDentiSMART provides security professionals with practical solutions for today's complex security management demands.

(For more information on IDentiSMART, see pages 9-10)

## Selecting the Right ID Card Program

With so many options available on ID card stocks and technologies, the task of choosing the right system for your business can seem confusing. Should you look at laminated or PVC cards? What are the advantages of different reader technologies? We can help you through this process by carefully analyzing your specific security identification goals and then recommending the card system that can best meet your needs. We provide solutions as well as the finest products available in the industry.

 **IDenticard®**

# Digital Imaging Systems

After nearly a decade of digital imaging experience, we know that flexibility and freedom to choose are as important as ease-of-use, reliability and cost.

With IDenticard IVIS® Plus Digital Imaging Systems, all security ID data – photos, signatures, and security data – are at your fingertips for custom-designed identification cards, employees' directories, and dozens of other uses. Regardless of what your imaging needs are, there is an IVIS Plus system that will meet your needs, and is best suited for you. Any IVIS system can be upgraded to meet your specific and changing needs.

IVIS Plus Imaging Systems can be used with any PVC printer and most laser and inkjet printers.

[VIEW BROCHURE](#)

## The IVIS Plus Digital Imaging Series

The IVIS Plus 2000 is the most advanced and powerful digital imaging system in the IVIS family. It begins with an open database architecture. Whether you are developing a new database or using an existing ODBC-compliant database, the IVIS Plus 2000 lets you customize everything – from the fields you capture to the look and placement of your data entry screens.

- Offers time and money-saving capabilities
- Interfaces with access control systems
- Linkable to many employee time & attendance systems
- Offers networking of imaging systems with security access control or automated payroll systems

This system offers all the features of IVIS 2000, except for customized screen and card designs. IVIS 2000 OTS offers next day shipment.

The IVIS Plus 1000 is advanced digital imaging technology – without an advanced price! Through the use of a digital camera, the subject's photo image appears on the screen for easy preview and approval.

Updating and reissuing IDs is a snap. Individuals don't have to leave their jobs to have a new ID photo taken or to sign a new card.

- Automatic card logic
- User-definable badge designs
- User-definable database designs
- Data entry and verification station software available

This system offers all the features of IVIS 1000, except for customized screen and card designs. IVIS 1000 OTS can be shipped the next day.

The IVIS Plus 1000S is designed specifically for the K-12 school market. It features a default database of 46 pre-defined fields and can be used to import data and photos from an existing CD. It includes the IVIS Plus 1000 software, digital camera, and tripod.

- Unlimited card designs – ability to create your own designs
- Compatible with most inkjet and PVC style printers
- User-definable security levels

Now you can have digital imaging technology for the price of a film-based camera system. IDenticard's IVIS Plus 250 is an exciting and economical option for replacing traditional film-based ID card systems. The 250 does not feature image storage, but can easily be upgraded to one of IDenticard's database imaging systems as your needs change.

- Uses a digital camera for image capture
- Easy to use
- Can be upgraded to one of IDenticard's database imaging systems

**ORDER NOW**

# Access Control Systems

In developing each of our IDenticard Access Control Systems, we utilized the same fundamental approach that led to the growth of our card and imaging business. We set out to create systems that can be customized to any specifications and that are easy to upgrade as a customer's security needs expand.

Because we realize your access control needs today may be very different from your needs in the future, every IDenticard access system is designed to assure that you never lose your initial investment. From a basic stand-alone system with multiple readers to the speed and power of Windows®-based access control, our systems will grow with you.

[VIEW BROCHURE](#)

## Access control designed for integrated security management

The most recent addition to the IDentiPASS family of access control solutions, IDentiPASS PLUS provides a sophisticated level of security for a rapidly changing world. Designed for exclusive use with IDenticard Series 9000™ Panels and auxiliary equipment, IDentiPASS PLUS offers a comprehensive, integrated security solution. Through connections with remote input/output boards and reader expansion cards, customers can benefit from the advanced security provided by biometric readers, relay-controlled devices and other access control equipment.

With its versatile features designed to harness the power of today's sophisticated security technologies, IDentiPASS PLUS is the ideal choice for your access control needs.

[VIEW BROCHURE](#)

## Around the corner or around the world

Our IDentiPASS system is an ideal solution for facilities of all sizes – from small independent businesses to Fortune 500 companies. The system's superior networking capabilities offer many options for system monitoring, as well as control and database maintenance from multiple locations. With concise, understandable commands, the IDentiPASS system's modern, multitasking capabilities allow you to use the same PC that operates your security program to run spreadsheets, word processing or other programs. Our customizable screen layout makes it easy to graphically manage your information.

[VIEW BROCHURE](#)

## Unsurpassed value in powerful access control

This feature-rich IDenticard system is our introduction to Windows-based access control. It can be specifically tailored to meet the access requirements of up to 6,000 cardholders. IDentiPASS LT offers many of the same sophisticated features as IDentiPASS, such as autodial capability for Series 9000 Panels and the global linking of any transaction or event to actuate any relay or relay group, device driver, WAV file, bitmap or alarm group anywhere in the system. This system can also be upgraded easily to IDentiPASS or IDentiPASS PLUS.

[VIEW BROCHURE](#)

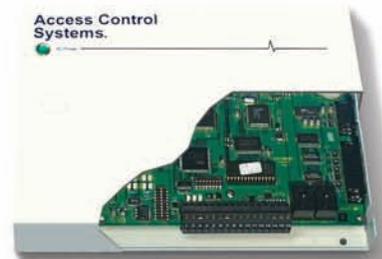

## CENTURION™

RELIABLE ACCESS CONTROL THAT STANDS APART

Reliable access control is simple and affordable for any business with Centurion, a stand-alone, two-reader control panel. Centurion is ideal for use in small applications requiring access control at up to eight doors.

- Accommodates up to 2,500 cardholders in panel database
- Compatible with most industry standard readers
- Automatic lock enable/disable
- Time zone controls with override option
- Antipassback
- Latching relay cards
- Parking lot feature that maintains a running total of cards in an area
- Supervisor rule

[VIEW BROCHURE](#)

## PASSPort

Powered by Ortega™

[VIEW BROCHURE](#)

### Introducing PASSPort for advanced command and control

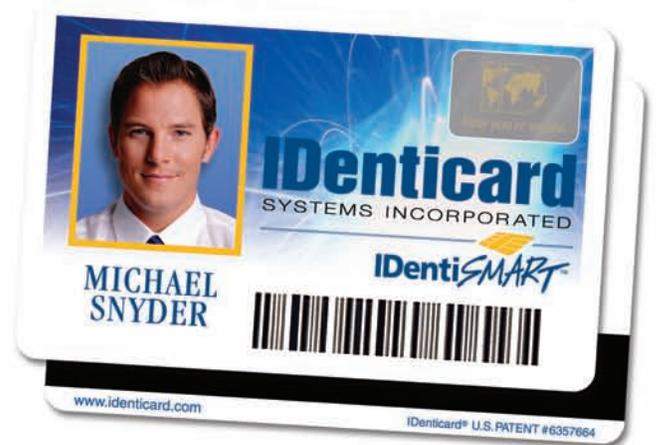

All three IDentiPASS products feature PASSPort – Powered by Ortega. Now, with this dynamic mapping module, you can monitor alarms, relays, and doors through a floor plan/graphic map interface. The user interface to this advanced technology is the standard web browser. And you can view live video from IP addressable cameras. For IDentiPASS PLUS and IDentiPASS, PASSPort provides digital video recorder (DVR) integration by linking DVR action to system events and transactions.

# Smart Technologies

IDentiSMART is the convenient and affordable choice in smart card technology. A patented, revolutionary MIFARE® smart card, IDentiSMART offers security professionals practical solutions for today's security management demands.

Whether you are looking to smart cards for use in access control systems, for tracking personal data, at points of sale, for customer loyalty programs, or many other related applications, IDentiSMART provides an immediate and effective option. Plus, IDentiSMART is an ideal option for incorporating the rapidly emerging biometrics technology into your security program. Used in combination with fingerprint or other biometric readers, IDentiSMART cards – with their capacity to store templates – can add enhanced levels of security protection to your access control system.

## The Smart Choice in Smart Cards

- IDentiSMART cards feature the MIFARE architecture platform, an established standard for contactless smart cards.
- IDentiSMART cards offer the contactless convenience of Proximity cards, but with many more printing options. In fact, IDentiSMART cards can be produced from economical inkjet printers.
- Unlike other smart cards, IDentiSMART cards don't have to be ordered in large quantities. You can order as few as 100 – for a remarkably affordable price.
- Custom-printed IDentiSMART cards can be turned around and delivered within 25 working days of approved proof – regardless of the size of your order.
- You can easily apply additional reader technologies on IDentiSMART cards, including mag stripes, bar codes, and smart card contact stations, for total integration.
- IDentiSMART cards are extremely durable as proven in abrasion and flexure tests. The result is a card that lasts far longer than traditional smart cards, which means less time spent on reissuing badges.

[VIEW BROCHURE](#)

# IDentiSMART™ Readers

## IDentiSMART Series SN Reader

IDentiSMART's contactless MIFARE reader uses programmable smart card technology. The reader's buried LEDs and buzzer allow it to be mounted indoors and outdoors.

- Reads the unique MIFARE serial number from a MIFARE card or tag
- Read-only capability
- Available with wall switch plate adaptor (as shown)

## Fingerprint and Smart Card Reader

IDenticard's V-Smart Reader is a dual factor solution that combines a fingerprint and smart card reader for access control. It uses standard contactless smart card technology and allows for Wiegand communication formats up to 64 bits.

- Template is written to the card using fingerprint reader connected to the PC via a serial cable
- The card number is programmed onto the MIFARE chip via the enrollment software

## Transition Series Readers

Multi-technology reader that is compatible with a wide range of proximity and smart card technologies.

## IDentiSMART MIFARE Serial Number Reader with Keypad

An elegantly styled mullion-mount reader in silver and black which can also be mounted to a single-gang electrical box using the matching wall switch mounting fixture (sold separately).

- Reads the unique MIFARE 10 digit serial number from a MIFARE card or tag
- Integrated keypad for increased security

[VIEW BROCHURE](#)

# Smart products. Smart solutions.

SmartKey™ and SmartDisc™ are the two newest products within our IDentiSMART family of patented contactless smart card solutions. Both products offer many of the benefits of the more traditional contactless smart card, but in formats that may be more convenient for your security identification and access control program.

With either SmartKey or SmartDisc, you can integrate smart card technology into your existing security system without losing any of your prior investment. Both products, as with our IDentiSMART card, feature the standard MIFARE contactless technology.

## SmartKey

SmartKey is a handy and convenient way to incorporate smart card technology into a security program. SmartKey is designed to fit easily on a key ring or chain and comes with a protective clear plastic cover. When presented at a programmed contactless reader, SmartKey provides access to secured doors. SmartKey can feature custom graphics, logos, and designs, similar to a traditional ID card.

## SmartDisc

This 1 1/4" diameter wafer is ideal for applying on any type of credential (laminated ID card, PVC card, drivers license, etc.) to instantly transform it into a contactless MIFARE smart card. Simply remove the adhesive backing and apply directly onto the existing card surface.

[VIEW BROCHURE](#)

# ID Card Protection

We believe a secure ID program begins with a secure ID card. That's why we've developed several exciting security features that can be easily applied to your cards to give them maximum protection against unauthorized duplication or alteration.

From simple design techniques to more intricate printing applications, IDenticard cards can help enhance the security of your ID management program. And, we've made those options affordable for any business or organization, regardless of the number of cards in your system.

There are many ways to fake ID cards. We can help ensure that your cards are not only the most durable and versatile on the market, but also the most protected.

# IDentiGuard™

Greater protection for your ID cards from the leader in the world of security identification.

A secure ID program begins with a secure ID card. Now you can protect your cards with IDentiGuard, a patent-pending security feature available exclusively from IDenticard. IDentiGuard can be applied to all types of security ID cards, including laminated, PVC, and Proximity. And we've made it affordable for orders of any quantity — from 100 to 50,000.

## IDentiGuard with Custom Graphics

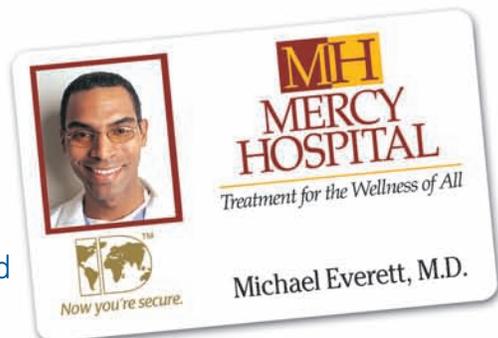

A custom logo or graphic using the IDentiGuard security feature provides maximum protection against any altering or replicating of your ID cards. A custom IDentiGuard image will give your identification cards added security and a unique appearance.

## IDentiGuard with Standard Graphics

Choose from one of several standard IDentiGuard graphics for the fastest turnaround and superior protection.

Both custom and standard graphics are available in seven distinctive patterns – silver, blue, gold, speckled silver, speckled gold, and a holographic silver rectangle with gold overprint.

06

USA

USA

Standard graphics (shown above) are subject to change.

IDentiGuard passes the most stringent security tests:

- Easy to customize
- Short production time
- Difficult to alter, transpose or tamper
- Easily applied to card
- Cost effective
- Difficult to replicate or simulate
- Verifiable by manufacturer or issuer
- Easily recognizable

### IDentiGuard and PVC

IDentiGuard is ideal for protecting your PVC card, too. You can select our standard design featuring a Holographic Silver rectangle with Gold overprint of the IDenticard logo. Or we can apply the same security application to your custom graphic.

### 3D Holographic Labels

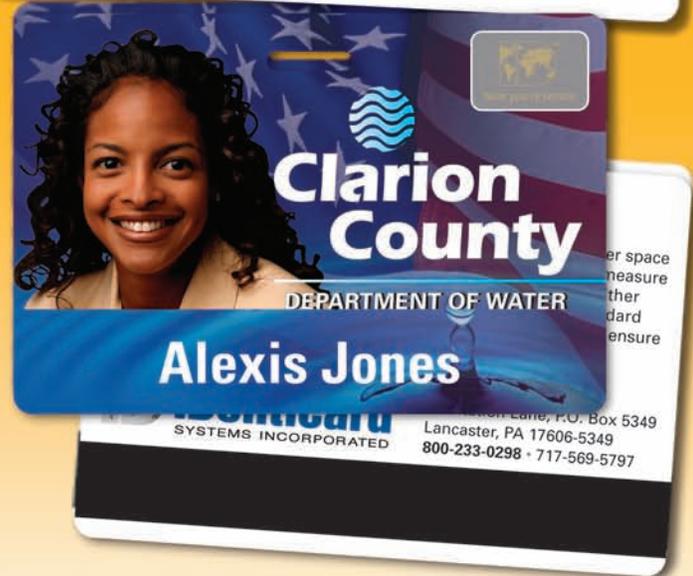

Tamper-resistant, serialized, 3D holographic labels offer a unique and economical solution for enhancing the level of security protection for your existing or new ID cards.

Our 3D Holographic Labels leave an easy-to-spot checkerboard pattern on the card (if removed).

We have many other ways to help ensure that your ID cards are not only the most durable and versatile on the market, but also the most protected. From laminated and PVC to Prox and smart cards, we have you covered.

[VIEW BROCHURE](#)

## Oversized ID Cards

Enhanced security for corporations and institutions.

For an extra measure of protection for your IDenticard ID cards, consider our oversized card options.

- Faster security authorization and clearance
- Enlarged photos for easier identity verification
- Available in all-plastic or PVC stock
- Card sizes: 2 5/8" x 3 7/8" (PVC) or 2 13/16" x 4 9/16" (Plastic)

[VIEW BROCHURE](#)

# Readers

## Access Control Card Readers

A wide range of card readers and entry devices are available for IDenticard access control systems. They blend perfectly with a variety of architectural styles.

### Flush-Mounted Swipe Magnetic Stripe Card Reader

A high-coercivity magnetic stripe reader, weather protected.

### Keypad/Swipe Magnetic Stripe Reader

Combination offers high level of security by requiring entry of PIN number with card swipe.

### Surface-Mounted Magnetic Stripe Card Swipe Reader

This high-coercivity unit is enclosed in a sturdy weather-protected metal housing.

### Bar Code Reader

Direct surface-mounted infrared bar code unit reads moderate density masked 3 of 9, interleaved 2 of 5, or Codabar.

### Extended Distance Reader Kit

Extends the distance between the access point (card reader) and the access control panel to 10,000 feet (available in magnetic stripe or Wiegand).

### RF Reader Extender

Extends access control into areas where it is inconvenient or impractical to run wire (magnetic stripe and Wiegand).

### Proximity Card Readers

May be wall-mounted, flush-mounted, or affixed to any non-conductive material up to six inches away.

### ProxPro with Keypad Reader

Standard Proximity Card Reader with fully integrated personal identification number keypad for heightened security.

### Baran/Tec Wiegand Keypad

A stand-alone keypad that operates under very harsh conditions and is abuse and vandal-resistant.

### Transition Series Readers

Multi-technology reader that is compatible with a wide range of proximity and smart card technologies.

# Printers and Ribbons

## Printers

IDenticard carries an extensive line of PVC card printers from the industry's leading printer manufacturers, including Eltron and Fargo. Among the printer types available are single-side or dual-side and simple monochrome printers to highly complex card printers with encoding capabilities.

### Zebra® Printers

P330i

**P310** – Single-sided printing of PVC cards.

**P420** – Dual-sided printing of PVC cards.

**P520** – Dual-sided printing of PVC cards with heavy laminate.

*P series printers available with three-track magnetic stripe encoder.*

**320i** – An intelligent, single sided plastic card printer with an LCD display and new printer security features.

**ORDER NOW**

### Fargo® Printers

DTC400

**Pro-LX** – Featuring a high-speed, dual-sided lamination station.

**DTC300/400 Series** – Simple to operate card printers that feature the SmartScreen™ LCD Control Panel for easy to understand prompts and commands.

**DTC500 Series** – Featuring single or dual-sided printing, up to 200 card load capacity, and security packages.

**HDP800 Series** – High-definition printers offering optional encoding and lamination modules for printing, encoding, and laminating in one pass.

*\*Our printer line is constantly being updated to keep pace with changing technology.*

**ORDER NOW**

## Ribbons

**ORDER NOW**

IDenticard offers a complete selection of PVC printer ribbons for single-sided or dual-sided color printing from the leading manufacturers of PVC printers.

For a list of available printers, visit our web site at [www.idcatalog.com](http://www.idcatalog.com).

## PVC Printer Extended Warranty Programs

IDenticard offers two extended warranty programs on major brands of PVC printers.

### Extended Warranty Program with Overnight Loaner

Includes Technical Support Help Desk service, overnight loaner printer during repair, shipping charges, and parts and labor on printer repair (except print head).

### Extended Warranty Program with Overnight Loaner and Print Head Replacement

Includes Technical Support Help Desk service, overnight loaner printer during repair, shipping charges, and parts and labor on printer repair, replacement of one defective print head, and one printer cleaning kit (shipped with printer).

**VIEW BROCHURE**

# Photo ID Cameras, Equipment and Accessories

IDenticard offers a full range of cameras and equipment supplies such as laminators, photo cutters and camera cases.

## ID Card Cameras

- Available in two, four, and six-shot versions.
- Multilingual graphic display guides operator step-by-step.
- Built-in power base allows convenient plug-in for laminator or other units.
- Built-in timer allows you to continue working without interruption to time film development.
- IDenticam 200 Camera produces photos that meet U.S. government passport regulations.
- Uses Polaroid® Polacolor ID Ultraviolet film as well as other film types.

**ORDER NOW**

## Photo Cutters

IDenticard Photo Cutters round photo corners, trim photos neatly to exact size and are designed to avoid jamming. Five styles available for use with two, four, or six shot cameras (1" x 1-1/4"), in passport size (2" x 2"), for IVIS media, or in custom sizes. (F42-PH)

**ORDER NOW**

## Laminators

IDenticard offers a wide range of laminators for ID cards, business cards, season passes and similar items. Protects documents from moisture, fading, tearing and discoloration.

PAK 4C Laminator, 3" x 5"  
(F41-04CPL)

PAK 9 Laminator, 8 1/2" x 11"  
(F41-09DPL)

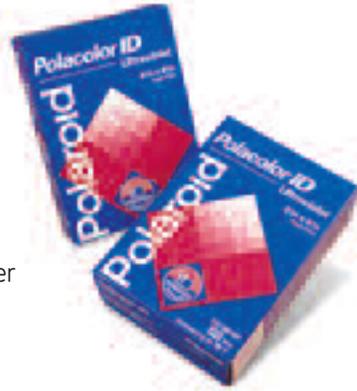

PAK 12 Laminator, 12" x 18"  
(F41-12DPL)

**ORDER NOW**

## Film

IDenticard is a single source for all ID photo equipment requirements, including Polaroid instant color or black and white film. Call for fast deliveries of film and other supplies. (F48-TPUV FILM)

**ORDER NOW**

## Slot Punch

Adjustable glide in this slot punch assures perfect alignment for openings used with various affixing devices. (F45-SLOTP/G)

**ORDER NOW**

## Manual Desktop Slot Punch

Durable all-metal Desktop Slot Punch punches through material up to .060 thick. Adjustable depth, centering, and bottom guides. White. (F45-MDTSP)

**ORDER NOW**

## Metal Badge Racks

Spot your card at a glance in all-metal badge racks.

Vertical (F47-DATBR40V)  
Horizontal (F47-DATBR40H)

Racks hold 40 cards each.

**ORDER NOW**

## Backdrops

Backdrops are an easy, inexpensive way to assure consistent backgrounds on your ID card photos. Made of soft, non-reflective blue felt. (F48-BDBLUE)

**ORDER NOW**

## Tripod

For use with all IDenticard traditional film based cameras. (R60-TRIPOD) Requires a tripod mount. (R60-TRIPDMNT)

For use with IDenticard digital cameras. (F10-TRIPOD2)

## Temperature Strips

To ensure card longevity, temperature strips guarantee laminators are set at the proper setting. (F39-TEMPSTRP)

# Smarter Ideas for 2006

For our complete line of affixing devices, see our "Badge Holder Products" catalog. Page numbers on this page refer to the 2006 "Badge Holder Products" catalog.

## >> Card Clamps™

Newly redesigned for 2006, our patented Card Clamp™ end fittings are even stronger. With a metal casing and stronger holding force, you can say good bye to slotting cards. Card Clamps are available on many of our most popular products. For more information on our Card Clamp™ products see page 18.

## >> Quality Retractables

Yes, our variety is great. But it's the quality of our reels that keep our customers happy. Longer cord lengths, stronger internal springs and innovative end fittings are just a few of the reasons our reels are an exceptional value. And new for 2006, we have added a special Lock-Out Reel that stays extended with the push of a button as well as our new Retractable Carabiner Reels on page 8.

## >> Wide Plastic Hook

Our exclusive end fitting fills the slot in an ID card so your card hangs straight and faces forward. Check out our new Premium Broadloom No-Flip Lanyards on page 9.

## >> Innovative Vinyl Holders

The quality of our vinyl badge holders is well known. But along with quality, we work equally hard to bring you innovative products that you can't find anywhere else. Check out our Half Card Holders on page 24, our new Zipper Seal Arm Band Holders on page 34 and our new Hard Hat Badge Holder on page 37.

*For 50 years the people behind our company have earned a reputation for service excellence and for badge holder products of the highest quality. And as an American manufacturer with eight patents and more pending, we continue our goal to bring new and innovative badge holders and ID accessories to business, special events and the security industry.*

# Contracts, Agreements and Alliances

## IDenticard's GSA Contract

We have been an approved GSA vendor for nearly two decades. Our government sales specialists understand the regulations, documentation requirements, policies and programs involved in government purchases. Several state contracts are also available. For more information, call IDenticard toll-free 800-233-0298 for all your security identification and access control needs.

## Corporate Agreements

IDenticard offers Corporate Agreements to meet the needs of our customers who want to standardize their ID and access control programs at multiple locations within the U.S. or around the world.

## Corporate Alliances

IDenticard has formed alliances with several industry leaders to provide our customers with an impressive range of choices in security systems integration. All of our corporate partners meet our exacting standards of high quality and customer service.

Our product development teams work with alliance members' software developers to ensure fully integrated systems. The IDenticard team can handle every phase of your project

- All-Campus Integration
- Financial Leasing
- K-12 School Solutions
- Laundry Applications
- Loyalty/Frequent Shopper
- Smart Cards/Network Security
- Time and Attendance
- Vending/Copier/Printing

As part of our commitment to excellence in all phases of our business, IDenticard offers one of the most progressive ongoing training programs available in the security industry. The IDenticard University Learning Center (IULC) was established to provide our customers and Partners with the highest level of personalized training on our products and systems.

The IULC curriculum includes courses designed for assisting technicians, installers, and end users. Participants can select from a broad range of training course options:

### Lancaster-based Training

Hands-on training in a classroom setting at IDenticard headquarters in Lancaster, Pennsylvania.

### Regional Training

Classroom-style training available at an expanded number of convenient locations around the country.

### Internet-based Training

Instructor-led, regularly scheduled course modules offered over the internet.

### Customized Internet-based Training

Instructor-led, custom classes tailored to specific organizations and conducted over the internet.

All classes at the IDenticard University Learning Center include comprehensive course content, conducted by experienced instructors utilizing a variety of teaching methods.

[VIEW BROCHURE](#)

## Total Integration

We believe the most important advantage in owning an IDenticard access control system is the convenience afforded by our totally integrated product line. By combining our access control capabilities with the most sophisticated line of security ID cards and digital imaging systems on the market, IDenticard is truly a single-source security identification provider.

All of our ID systems can be seamlessly integrated — your assurance that your access control program is not only perfectly tailored to your business, but fully supported for maximum performance.

## A Network of Support.

Whether you have a small business, or are part of a large corporation, IDenticard offers a variety of security systems designed to meet your individual needs. All are backed by our superb, well-trained partner network of nearly 300 access control specialists located across North America and throughout the world. Our partner firms all have a reputation for high quality, efficiency, integrity, dependability, and professionalism.

For fully integrated security systems from one reliable source, the choice is very clear. Call us today or visit our web site for more information.
