

# GALAXY Switchmode Rectifier

## 596B4

**+24 Vdc, 100 A, 208 Vac / 240 Vac**

The new GALAXY Switchmode Rectifier 596B4 provides the highest-quality dc power for telecommunications and data processing systems and their batteries.

### The GALAXY Switchmode Rectifier 596B4

integrates the latest switchmode technology with superior power, protection, and control features in a compact, cost-efficient power-conversion system.

Designed as a key element in the Tyco Electronics GALAXY Power System (GPS) 2424 Battery Plants, the 596B4 rectifier converts ac input voltage into the dc-voltage level required to power end-user equipment, as well as to float-charge batteries at precise voltage levels.

Operation over a wide temperature range ( $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ ) makes the 596B4 suitable for controlled and uncontrolled environments.

### Benefits

#### **Compact, Power-Packed**

For high power density, Tyco Electronics' revolutionary technology packs ever-greater power into ever-shrinking packages. The result is a rectifier that packs more power per cubic inch, weighs just 20 lb. (9 kg), requires minimal maintenance, and frees up valuable floor space.

#### **Quick Setup**

Installation is swift and straight-forward. Interconnections to ac-input, dc-output, and control signals are automatic during insertion. No adjustments or settings are required.

**Power Systems**

### Economical Operation

The 596B4 exhibits an excellent 0.98 power factor and high efficiency, thereby minimizing ac usage and contributing to highly reliable, low-cost operation.

### Extended Service Life

For greater reliability and robust operation, the 596B4 features parallel operation with digital load sharing, which evenly balances the load current among multiple rectifiers in the event one fails or is removed from the system.

### Fail-Safe Performance

Hot-insertion capabilities allow for rectifier replacement without system shutdown; softstart circuits and inrush control prevent upstream breakers from tripping. To avoid load or rectifier damage, the 596B4 is

equipped with overvoltage/overcurrent protection. A variable-speed fan maintains safe operation in -40°C to 85°C ambient temperatures. The 596B4 operates with or without batteries.

### Simplified Control/Monitoring

A digital meter indicates current, temperature, or rectifier alarm messages for convenient system status. A microprocessor manages all internal alarm and state decisions, and, for more extensive monitoring and control capabilities, provides serial digital communication with the GALAXY family of controllers.

Overall, the unit is easy to install with minimal labor, lowers typical operating and installation expense, and

delivers the reliable high performance required by the most stringent telecommunication and data processing applications. The 596B4 is UL\* recognized and CE† marked.

### Features

- Microprocessor controlled
- Digital load-sharing
- 2-wire interface
- Three-digit meter: current, failure codes, rectifier ID
- Hot pluggable
- Compact, modular construction
- 3000W output (110A at 27.24V)
- UL Recognized
- CE marked

\* UL is a registered trademark of Underwriters Laboratories, Inc.

† This product is intended for integration into end-user equipment. All the required procedures for CE marking of end-user equipment should be followed.

### Outline Drawing

## Specifications

| <b>Electrical</b>                                   |   |
|---|---|
| <b>Input</b>  |   |
| Nominal Voltage, Single-Phase                       | 208 Vac / 240 Vac, 2-wire plus ground   |
| Voltage Limit, Steady State                         | 176 Vac to 264 Vac  |
| Frequency   | 47 Hz to 63 Hz  |
| Nominal AC Input Current                            | 16.8A at 208 Vac<br>14.6A at 240 Vac  |
| Power Factor  | >0.98 from 50% to 110% load   |
| Total Harmonic Distortion                           | <10% from 50% to 110% load  |
| <b>Output</b>                                       |   |
| Float/Boost Voltage Limits                          | 22 Vdc to 30 Vdc  |
| Regulation (with GALAXY controller)                 | ±0.5%   |
| Ripple  | 100 mVrms   |
| Noise   | <2 mV psophometric  |
| Output Current                                      | -40°C to +65°C: 110 Adc max<br>+65°C to +85°C: derate at 2A per °C  |
| Current-Limit Set Point                             | 30 Adc to 110 Adc   |
| <b>Physical</b>                                     |   |
| Width   | 5.25 in. (133 mm)   |
| Height  | 8 in. (203 mm, 5U)  |
| Depth   | 15.5 in. (394 mm)   |
| Weight  | 20 lb (9 kg)  |
| <b>Environmental</b>                                |   |
| Efficiency  | >86% from 50 Adc to 110 Adc output current  |
| Operating Temperature                               | -40°C to +85°C (-40°F to 185°F)   |
| Operating Relative Humidity                         | 0% to 90% (noncondensing)   |
| Storage Temperature                                 | -40°C to +85°C (-40°F to 185°F)   |
| Storage Relative Humidity                           | 5% to 90%   |
| Audible Noise                                       | 0°C to 30°C: <52 dBA<br>31°C to 50°C: <60 dBA   |
| EMC   | EN55022, CISPR22, Level B, conducted and radiated   |
| <b>Safety/Standards Compliance</b>                  |   |
| NEBS  | Evaluated by independent test lab with NRTL status to Telcordia GR63 and GR1089 (including level 3 testing)                             |
| Safety Standard                                     | UL1950, EN60950/IEC950, and CSA* 234/950  |
| CE Marks  | UL Recognized (Canada and U.S.), VDE† Licensed, CE Marked (meets 73/23/EEC and 93/68/EEC directives)                                    |
| <b>Control and Monitoring</b>                       |   |
| Visual Indicators                                   | ON (green), STBY (yellow), LIM (yellow), ALM (red), FAN ALM (red)   |
| Meter   | Three digit: current, failure codes, rectifier ID   |
| Control Switch (One)                                | ID/ON/STBY  |
| Serial Interface Signaling: Controller-to-Rectifier | Remote sense, load share, voltage set points, current set points, selective HVSD set points, float/boost mode, HVSD, ON/STBY, lamp test |
| Serial Interface Signaling: Rectifier-to-Controller | Rectifier current, rectifier temperature, ID, serial number, manufacturing information, RFA, CB, ON/STBY, ACF, phase fail, TA, fan fail |
