## Description

UHP-2500 series is a 2500W single-output slim type power supply with 60mm of low profile design. Adopting the full range 90~264VAC input, the entire series provides an output voltage line of 24V, 36V and 48V. In addition to the high efficiency up to 96%, that the whole series operates from  $-30^{\circ}$ C  $\sim 70^{\circ}$ C under air convection without fan. UHP-2500 has the complete protection functions and 2G anti-vibration capability; It is complied with the international safety regulations such as TUV BS EN/EN62368-1, UL62368-1. UHP-2500 series serves as a high performance power supply solution for various industrial applications.

#### FUNCTION MANUAL

© The rated current should change with the Output Voltage Programming accordingly.

#### 2. Constant Current Programming (or, PC / remote current programming / dynamic current trim)

% The output current can be trimmed to 20~100% of the rated current by applying EXTERNAL VOLTAGE.

 $\odot$  Output will shut down after O/P voltage is below < 80% of Vset for 5 sec, re-power on to recover.

% Covered by over temperature protection, auto de-rating function works under operation either in PC mode or under control by communication protocol. T1(Typ.): Maximum ambient temperature of full load.

T2(Typ.): T1+5℃.

## 2500W Conduction Cooling with PFC Switching Supply UHP-2500 series

#### 1.Operate with additional aluminum plate and fan

In order to meet the "Derating Curve" and the "Static Characteristics", UHP-2500 series can be installed onto an aluminum plate(or the cabinet of the same size) on the bottom or apply forced air cooled solution. The size of the suggested aluminum plate and configuration of fan are shown as below. And for optimizing thermal performance, the aluminum plate must have an even and smooth surface (or coated with thermal grease), and UHP-2500 series must be firmly mounted at the center of the aluminum plate.
