

# Switch Mode Power Supplies

## S-2500/3000W Series

### Application & Features

- Low price, high reliability
- 105°C output capacitor
- AC input power supply is applicable all over the world
- High efficiency and low operation temperature
- Soft start current, effectively reduce AC input impact
- Short circuit protection. Overload protection
- Small size and light weight
- 100% full load burn-in test
- Built-in EMI filter, minimal ripple & noise

| Specification                       | Model | S-2500-12  | S-2500-24 | S-2500-36 | S-2500-(0-48) | S-3000-24 | S-3000-48 |
|-------------------------------------|-------|--|-----------|-----------|---------------|-----------|-----------|
| DC output voltage                   |       | 12V  | 24V       | 36V       | 1-48V         | 24V       | 48V       |
| Output voltage tolerance            |       | ±1%  | ±1%       | ±1%       | ±1%           | ±1%       | ±1%       |
| Rated output current                |       | 208A   | 104A      | 69A       | 52A恒流         | 125A      | 62.5A     |
| Output current range                |       | 0~208A   | 0-104A    | 0-69A     | 0-52A         | 0-125A    | 0-62.5A   |
| Ripple & noise (Note 3)             |       | 150mVp-p   | 150mVp-p  | 200mVp-p  | 200mVp-p      | 240mVp-p  | 480mVp-p  |
| Stability of incoming line (Note 4) |       | ±0.5%  | ±0.5%     | ±0.5%     | ±0.5%         | ±0.5%     | ±0.5%     |
| Load stability (Note:5)             |       | ±0.5%  | ±0.5%     | ±0.5%     | ±0.5%         | ±0.5%     | ±0.5%     |
| DC output power                     |       | 2500W  | 2500W     | 2500W     | 2500W         | 2000W     | 48V-2000W |
| Efficiency                          |       | 84%  | 84%       | 85%       | 85.5%         | 86.5%     | 87%       |
| Adjustable range of DC voltage      |       | ±10%   | ±10%      | ±10%      | ±10%          | ±10%      | 0~48V     |
| AC Input voltage range              |       | 190-240VAC/47-63Hz   |           |           |               |           |           |
| Input current                       |       | 7A/230V  |           |           |               |           |           |
| Surge current                       |       | 50A/230V   |           |           |               |           |           |
| Leak current                        |       | <3.5mA/240VAC  |           |           |               |           |           |
| Over-load protection                |       | 105%-150%: cut-off with automatic reset/recovery (when overload removed)     |           |           |               |           |           |
| Over-voltage protection             |       | 110%-135%VO  |           |           |               |           |           |
| Over-temperature protection         |       | ≥270°C over-temperature cut output (0-50V)                                   |           |           |               |           |           |
| Temperature coefficient             |       | ±0.03%/C (0-50°C)  |           |           |               |           |           |
| Set up? rise, hold-time             |       | 1.5s, 50ms, 20ms   |           |           |               |           |           |
| Resistance to shock                 |       | 10-500Hz.2G 10min/1cycle for 60 minutes on each axis                         |           |           |               |           |           |
| Resistance to pressure              |       | Input/Output: 1.5kVac input and housing: 1.5kVac output and housing: 0.5kVac |           |           |               |           |           |
| Isolation resistance                |       | Input/output: input to chassis, output to chassis :500VDC/ 100MΩ             |           |           |               |           |           |

|                                  |   |  |  |
|----------------------------------|---|--|--|
| Operating temperature, humidity  | -10°C~+60°C (Refer to the output characteristics diagram) 20%~90%RH |  |  |
| Storage temperature and humidity | -20°C~+85°C, 10%~95%RH  |  |  |
| Weight                           | 4.2kgs [are they really all the same?]                              |  |  |
| Safety standards                 | Meets UL1950 requirement (not yet approved mark)                    |  |  |

- Notes:** The test conditions for the above parameters are as follows:
1. 230Vac input, rated load, 25 ° C 70%rh, humidity.
  2. **Tolerance:** including the set tolerance, line stability, load stability (Note 5).
  3. **Ripple test:** 20MHz with "A12" twisted pair wire, interrupt with 0.1uF & 47uF capacitor short circuit.
  4. **Input voltage stability test:** minimum input voltage to maximum input voltage at full load.
  5. **Load stability test:** Load from 0% to 100%
