

# AT-G7N

## Automatic Level

Topcon introduces it's new Construction Level, with improved design and lower price.

**NEW**

### features

The Topcon AT-G7N features include rapid, stable automatic leveling. It's twin horizontal fine drives make it easy to make those critical adjustments when leveling. The AT-G7N has an accuracy of  $\pm 2.5\text{mm}$ , making it perfect for all general construction jobs.

Put the Topcon AT-G7N on a tripod, level the bubble and you are ready to go. The topcon AT-G7N features magnetically dampened Mylar compensator which have superior resistance to cold, heat and shock. The AT-G7N has the same body as Topcon's engineers level AT-G6, and also features a fully waterproof gas filled compensator.

When you need to work with confidence, you need to work with a Topcon AT-G7N Level.

### price

Not only is the new Topcon AT-G7N a higher specification than the AT-G7 it replaced, but it now has a lower price of only \$790 +GST (or \$890 +GST with a tripod).

### reliable

The Topcon AT-G7N has a mylar hung automatic leveling unit (compensator), which unlike the competitive wire hung compensators, does not snap on impact.

### success

Topcon has spent the last 70 years leading the industry in survey and laser systems. They have been making some of the worlds best automatic leveling systems for over 8 years now. They have proven themselves time and time again. That is why the AT-G7 level is the number one choice for almost all the major construction companies in New Zealand.

### Specifications

Magnification:	22x
Objective:	30mm
Minimum focus:	0.5m
Accuracy:	$\pm 2.5\text{mm}$ over 1km of double run leveling
Weight:	1.6kg
Warranty:	5 Year*

\*Topcon offers a 2 year warranty against manufacturing defects, Trig Instruments extends this to 5 years.
