Features:

Experience more accurate and natural colours
Samsung developed a special colour technology for our Curved UHD TV called PurColour, which expresses a wider range of colours and shades that are as close to real life as it gets, bringing you closer to what nature intended.

Surround your senses and be part of the action
Samsung's revolutionary Curved TV shows you the finest UHD picture quality, depth and detail a UHD screen can offer. Immersive viewing makes you feel as though you are right in the middle of the excitement. Also, the gently curved UHD screen gives you uniform and balanced viewing from all areas of the screen.

Realistic viewing with automatic depth enhancement
Flat images come to life for a surreal viewing experience with Samsung's Auto Depth Enhancer. Your Samsung Curved TV will give you a greater feeling of depth by applying different levels of contrast enhancement to different areas and objects of the screen, making your entertainment more immersive and enjoyable. You truly have to see it to believe it.

4 times the Full HD resolution
Ultra HD viewing means you can see every intricate detail on the screen clearer than ever. Your Samsung UHD TV offers a resolution four times higher than Full HD, with accurate true-to-life colour. Enjoy a picture that's optimised for even greater clarity and detail than you've ever seen before.

A smarter TV that gets you right to your content instantly
Your gateway to the all-new, smarter TV experience is right at the bottom of the screen, so you never lose sight of your current entertainment. The fun-to-use Smart TV menu bar gives you faster, smoother and truly intuitive access to all the content you love.

Now you can truly enjoy all your Smart TV content and features with ease
Say goodbye to those boring user manuals and say hello to an easier, more intuitive Smart TV that lets you dive straight into the content. It's fast, powerful, full of fun, and most of all, easy to use. It puts all your favourite content right at your fingertips on an incredibly simplified Smart Hub that's blazingly fast, thanks to Samsung's Quad Core processor.

Easily sync your TV and your mobile
Samsung Easy Sharing makes it easy to share content between your TV and mobile. Whether it's a fun video or that must-see TV show Samsung Smart TV picks up the signal when your device is close and seamlessly plays the content perfect for the big screen.

Get your TV to brief you every morning
Do you reach for your smartphone every morning to check the time and your schedule, and then turn your TV on to check the weather and news? Now, you can start the day with a personalised daily brief on your Samsung TV that takes care of all of them, on a big screen.

A more detailed picture made for UHD resolution
Samsung's advanced UHD dimming technology brings the ideal level of contrast and colour to your UHD viewing. The higher resolution of UHD also means that the picture requires more processing for a highly detailed image.

UHD upscaling enhances the quality of all of your viewing
Thanks to the Samsung UHD Picture Engine, you can enjoy various kinds of content, even if it's not from a UHD source. Samsung's innovative 4-step Super Resolution Scaling technology enhances broadcast TV shows and movies as well as video on demand and more.

Instantly switch back and play right from where you left off
What's the point of having all those apps and features on a smart TV if they are hard to use? With Samsung Smart TVs,

switching between various kinds of content is now as easy as changing your TV channel.

Experience life-enriching apps on your Smart TV
Content is everything, and Samsung Smart TV has you fully covered. Enjoy tons of amazing apps and surf the web to your heart's content in the most seamless, intuitive way possible.

Lightning fast Quad core processor
The Quad core processor has outstanding multi-tasking capabilities for improved gaming, multi-link screen viewing, and fast play and return. The processor can handle many functions at the same time ensuring lightning fast performance whatever you want to enjoy.

Get easy access to Netflix with built-in support
Every Samsung TV comes with quick and easy access to Netflix. In fact, it's right there on the very first screen you see. Whether you're a movie buff or addicted to TV shows, there's plenty of entertainment on Netflix for everyone.

More vibrant colours for better images
Using an advanced picture quality improvement algorithm, Samsung's Wide Colour Enhancer drastically improves the quality of any image and uncovers hidden details. Now see colours as they were meant to be seen with Wide Colour Enhancer.

Immersive realism with Samsung Full HD 3D technology
Prepare to see entertainment in a whole new way. Samsung's sophisticated Full HD 3D technology means you can enjoy 3D movies in great detail. It also enhances your 3D picture quality and cuts out ghost images to give you clearer and more immersive viewing. With such a high level of realism, you've never experience 3D like this before.

Bringing a full multimedia experience into your living room
With High Definition Multimedia Interface (HDMI) inputs, the Samsung TV will transform your living room into a multimedia entertainment centre. HDMI provides high-speed transmission of high definition digital data from multiple devices straight into your TV.

Watch movies from your USB
With ConnectShare Movie, simply plug your USB memory drive or HDD into the TV and instantaneously enjoy movies, photos or music.

Access the Internet without wires
With Wireless LAN Built-in, streamline your TV's connectivity capabilities without adding more external devices and maintain its attractive design.
